Total War

New and tragic meaning has been given to the phrase "total war" by the recent march of events. The home front is now the theatre of the struggle. The citizens of Oslo, ground under the heel of a barbaric conqueror, are in the air—face to face with the heroic Belgians, their homes overrun by the tanks and flying columns of an implacable foe. Our own fighting men on land and sea are in the air—face to face with the monster of force the twisted mind Hitler has created—two too kind to "total" war means.
