

Sunday School Lesson

LESSON XII
THE SEPULCHRE: TRIUMPH OVER DEATH.—Matthew 27: 57-66.
1 Cor. 15: 20.

GOLDEN TEXT.—Now hath Christ been raised from the dead, the first-fruits of them that are asleep. 1 Cor. 15: 20.

THE LESSON IN ITS SETTING
Time.—Christ's burial occupied some time before six p.m. on Friday, April 7; the visit of the women to the sepulchre occurred early Sunday morning, April 9, A.D. 30.

Place.—Calvary and the nearby tomb of Joseph of Arimathea were both a short distance outside the walls of Jerusalem.

67. And when even was come, there came a rich man from Arimathea, named Joseph, who also himself was Jesus' disciple: 68. This man went to Pilate, and asked for the body of Jesus. Then Pilate commanded it to be given up. Joseph of Arimathea was a man of means of refined mind, a member of the Jewish Sanhedrin, and held in good repute among his fellow countrymen. It was this man with his mind already enlightened by Jesus, and his heart drawn to him, who stood under the cross of Christ. Remorse or his past shrinking smote him, he forthwith sought the body of Jesus to bury it in his own grave, prepared for his own costly burial.

Laid in the Sepulchre
69. And Joseph took the body, and wrapped it in a clean linen cloth, 69. and laid it in his own new tomb, which he had hewn out in the rock; and he rolled a great stone to the door of the tomb, and departed. The body was laid in a loculus in the tomb, formed by a slab of stone placed across one side of the tomb so as to form a coffin-like recess below the entrance. The tomb of Joseph of Arimathea was a remarkable fulfillment of Isa. 53: 9, which foretold that the Messiah would make his grave "with the rich in his death."

61. And Mary Magdalene was there, and the other Mary, sitting over against the sepulchre. The Mary mentioned here together with Mary Magdalene, must be Mary the mother of James and Jesus (see v. 56). These were the women who had ministered to Jesus throughout the three years of his public ministry.

By DAVE ROBBINS

NEXT: TELEVISION

Television is on the way slowly but surely. In the New York area there are some 2,000 television receiver owners, with a potential audience of about 10,000. But don't let this excite you into buying a television set just yet. Did you ever consider just what television would mean? Suppose you decide to televise a drama once a week for some sponsor like the current Monday night theatre. They'd have to get it to you in a week, yet Hollywood will spend a year making a movie. If it becomes possible to get all sport activities like hockey, boxing and so on, who will go to the sport without fans to pay the shot at the box office? Television will make changes in our activities that are not even dreamed of yet.

DRAMA ON THE AIR

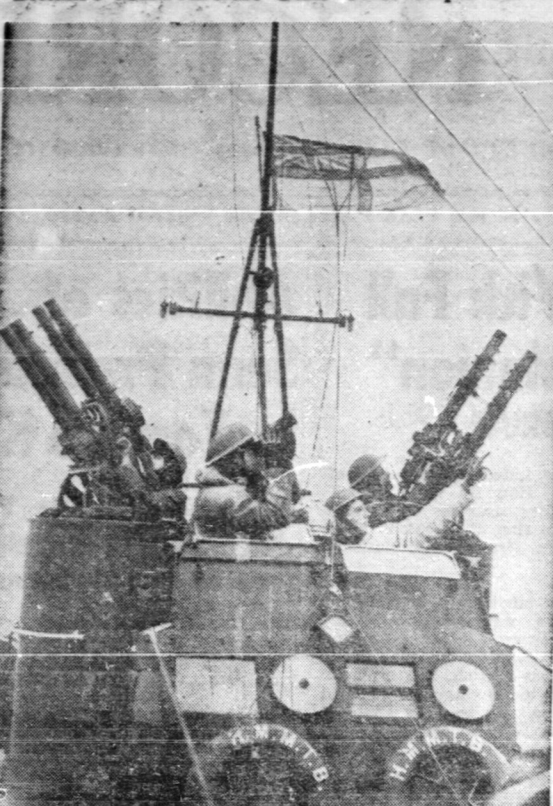

The radio offers many excellent dramas—but the other day while reading a little bit of exploring we came on one that in our mind ranks with the Lux theatre of the air—and it had no top names in the cast either. The program was Mary, Queen of Scots, a chapter from Cavalcade of Drama, heard from CKOC at 7.30 Monday, Wednesday and Friday.

Paul Whitman stars in an outstanding show from the CBS chain each Wednesday night at 8.30. The program is as big as Paul himself. It's heard in this part of the country from WGR.

For something entirely different you should catch Stranger Than Fiction—a really novel five minutes—from 11.20 each morning at 8.55. All the oddities from everywhere.

RURAL ONTARIO
The small towns of Ontario are going on the air—on one of the week, over CKOC, Hamilton, Thursday evening at 6.45. Announced by the "Tomp Orie".

Britain's Multi-Aircraft Guns Offer Triple Threat

A brace of multiple anti-aircraft machine guns look skyward from the bridge of one of the British navy's newest racing motor torpedo boats, which Britain now has a large fleet on coastal duty. The boats, capable of great speed, are armed with torpedoes for use against surface craft; depth charges for dealing with submarines and these guns for taking care of attack from the air.

Christ And The Birds

Before the first faint hope of dawn could lay its slender fingers on the purple sky, Christ issued from His tomb on Easter Day. And passed the sleeping soldiers softly by.

The birds, so early waking from their sleep, Roused in their nests the way He went along, Knowing the promise that He rose to keep, They meant to greet their Master with a song.

He laid His fingers to His lips, and turned To indicate the guards, heads drowsy-bent, And then He smiled, but in His eyes there burned Rich pleasure at the little birds' intent.

So, long ago, Christ walked before the light In Joseph's garden, heralded by none, Watched over by the feathered host at night, He went His way. The miracle was done.

—JOHN GALLINARI WHIDDING

The Guard Watches

62. Now on the morrow, which is the day after the Preparation, the chief priests and the Pharisees

were gathered together unto Pilate, 63. saying, Sir, we remember what that deceiver said while he was yet alive, After three days I rise again. 64. Command therefore that we watch the sepulchre until the third day, lest haply his disciples come and steal him away, and say unto the people, He is risen from the dead; and the last error will be worse than the first. 65. Pilate said unto them, Ye have a guard; go, make it as sure as ye can. 66. So they went, and made the sepulchre sure, sealing the stone, the guard being with them.

The Jewish authorities used Jerusalem apparently could not rest after Jesus was dead. Haunted by his prophetic words, in which he declared that he would rise from the dead on the third day, they went back to Pilate, requesting that a guard be placed at the sepulchre. The Pharisees used political arguments to influence Pilate. They contended that, if the disciples purloined the body, they might cause a far more serious rioting than had occurred at the triumphant entry, in consequence that he would rise from the dead on the third day, the Messiah.

The Resurrection
Matt. 28: 1. Now late on the sabbath day, as he began to dawn toward the first day of the week, other Mary to see the sepulchre. It was not until they were well on their way that it occurred to them to ask how the great stone, which they had seen rolled away from the door, was to be removed. The difficulty, however, melted away almost as soon as it was realized. The stone was already gone.

To be Heard... March 22, CBL 7.00 p.m. CBC Singers present special Good Friday choral program... 8.00 p.m. CBY Stabat Mater Oratorio from Montreal... March 23, 9.00 p.m., CBL National Hockey League Playoff from Toronto... March 24, 1.30 p.m., CBL "Christ the Arisen," biblical play... 4.45 p.m., CBL Hart House Carillon.

POP—Picking Up
I HAVEN'T SEEN A SIGN OF MY HUSBAND SINCE WE STARTED SPRING CLEANING!

Movie-Going Jury Humored

"May we have the evening off?" a jurymen asked at Montreal last week when the trial of Romeo Focault on a charge of murder was adjourned for the day.

"I suppose you want to go to the movies," said Mr. Justice Wilfrid Lacombe.

"Well, if the police captain can pick a picture that is fitting for you to see, you can go," the judge decided after the request was discussed with counsel.

2. And behold, there was a great earthquake; for an angel of the Lord descended from heaven, and came and rolled away the stone, and sat upon it. 3. His appearance was lightning, and his raiment white as snow; 4. and for fear of him the watchers did quake, and became as dead men. 5. And the angel answered and said unto the women, Fear not ye; for I know that ye seek Jesus, who hath been crucified. 6. He is not here: for he is risen, even as he said. Come, see the place where the Lord lay.

Had the tomb remained sealed and guarded, the world would have had stronger grounds for denying the resurrection and would have claimed as it does today, with far greater force, that the judge's decision after the request was discussed with counsel.

Farm Forum

(Continued from page 1)
Guelph, assisted by other members of the O.A.C. faculty)

Q. I have a 50-acre farm of sandy soil. As I have not enough barnyard fertilizer for both places, I am hauling the fertilizer to the sandy soil and intend setting time for clay soil. Will you please let me know if this is a wise thing to do? If so, will you please advise me what quantities of time to use? If there is a better method of enriching the soil for this year's crop will you please let me know, if it is not more expensive?—S. R. Duffin, Simcoe.

A. You are doing well to have the manure put on the lighter soil. It may be that the heavier clay soil will benefit materially from a light application of manure.

Regarding applying lime to clay soil, I would say that you should find the soil tested first to find if lime is needed. If the soil is already neutral or alkaline, it is a loss of time and money to put lime on it. If you will have a sample of soil taken according to the instructions on page 23 to 25 of the enclosed pamphlet and forward the same to the Dept. of Chemistry, at O.A.C. Guelph, we will have it tested and will then be able to let you know whether or not lime is required. Lime is not a manure or a plant food, it is simply a soil conditioner.

Q. I wonder if you would give me some information regarding sulphur as an additive to soil. I have considerable difficulty with alkaline water, although aluminum sulphate will correct it. I have been told that sulphur has a longer lasting effect than aluminum sulphate, but am not familiar with the properties of sulphur.

Any advice you would give me in this matter will be greatly appreciated. W. G. York Co.

A. I would say that Flowers of Sulphur used at rates of 30 to 60 lbs. per acre will produce desirable activity in controlling scale on potatoes. If the Sulphur is broadcast just after the land is plowed, and before discing, Sulphur can be added most effectively. One experimenter advises that on soils that lack Sulphur-oxidizing bacteria, it is advisable to use inoculated Sulphur.

During 1938 the Yukon Consolidated Gold Corporation handled 8,550,000 cubic yards of gravel, which yielded 60,055 fine ounces of gold and 14,419 fine ounces of silver.

Weather-Phone

Telephone subscribers throughout greater New York may now receive authoritative forecasts of weather conditions. Information for these announcements is supplied hourly between 7 a.m. and 11 p.m. by the local office of the U.S. Weather Bureau on a radio-telephone connection. The weatherman only to telephone bureau and he receives the ordered message.

THIS CURIOUS WORLD

By William Ferguson

TREES
CANNOT MANUFACTURE STARCH IN THE DARK, BUT AFTER IT IS MADE, THEY CAN CHANGE IT TO SUGAR AND USE IT IN THEIR GROWING TISSUES DURING BOTH DAYLIGHT AND DARKNESS.

The biggest great lakes shipping season of the past decade is expected this year as shipyards get busy repairing freighters long out of service, for the movement of ore, coal, grain, stone, steel and other commodities. In the shadow of a big lake boat, men are shown laying out the steel work for a new freighter at Detroit.

Q. Is smoking a question of morals?
A. No, but it surely is a question of manners. Neither a man nor a woman should smoke where there is a possibility of it being objectionable. And the person who deliberately or thoughtlessly directs a hand of smoke across a table into another person's face really deserves a reprimand.

Q. Isn't it bad taste to "talk over" a hand of bridge that has been just played, or a rubber, calling attention to mistakes, and discussing how it was played?
A. Yes. This is very boring to a great many people. One should forget it and concentrate on the next hand.

Q. How should Jean Norton, who is eighteen, be introduced to Mrs. Marshall, who is sixty?
A. "Mrs. Marshall, this is Jean Norton."

Q. Should a wedding guest congratulate the groom, even when the guest feels that the groom is making an unfortunate marriage?
A. Yes. In the first place, the groom may be entirely wrong in his opinion; second, if he is correct in his judgment the poor groom will be hurt and settled. Apply it at night.

Q. How can I cool a hot food, pudding, or any cold hot food, quickly?
A. Set the dish in a pan of cold water which has been liberally salted.

Q. How can I clean white window shades?
A. Dip the shade and spread on a soft cloth dipped in magnesia and water. Treat both sides in the same way. Allow to remain on the sheet until dry.

Q. How can I prepare a dandruff remedy?
A. Dissolve one ounce of flour of sulphur in one quart of soft water. Do not use it until it is thoroughly mixed and settled. Apply it at night.

Q. How can I make a good frosting and filling for cake?
A. Take two pounds of sifted powdered sugar and moisten it to the right consistency with orange juice.

Q. The pessimist fearfully asks, "Is there any milk in the pitcher?"
The optimist confidently says, "Please pass the cream."

"Well, Pat," remarked the foreman, "I'm sorry you're leaving the works. Aren't the wages all right?" returned Pat, "But I keep having a guilty feeling all the time." "About what?" "I'm all the time thinking I'm doing a horse out of a job."

Barley production in Canada for 1939, according to the second official estimate, is now placed at 108,224,000 bushels, an increase of 4,017,000 bushels over the estimate made in September, 1938. The barley production in 1938 was 104,207,000 bushels.
