THE LESSON IN ITS SETTING Time.—Luke wrote his Gospel sometime between 63 and 68 A.D., and the book of Acts not long after the death of the apostle Paul, probably about 68 A.D. The events described in the first chapter of Luke occurred 6 to 4 B.C. Luke and Paul were together at Philippi abou 52 or 53 A.D.; the epistle to the Colossians and the Second Epistle Timothy were written during Paul's imprisonment in Rome, be tween 61 and 65 A.D. The place where Luke wrote the third Gospel and the book of Acts we do not know. The events recorded in the first chapter of Luke took place in Jerusalem, in Nazareth, and in the hill country of Judea. The city of Philippi was in the northeastern part of Macedonia. Paul wrote Col-Pimothy from the city of Rome. The purpose of this lesson is t

sians and the Second Epistle to give us an opportunity for studying St. Luke and his writings. The name Luke or Lucas is a shortened form of Lucanus. Both the name and profession of Luke prove him to have been a Gentile - most of the doctors at this period were either Greeks who had been slaves, or sons of freedom, Luke was probably-the son of a freed slave. Luke

was originally a heathen. He Investigated Accurately The first four verses of the chapter give us a lively picture of the evident universal interest felt by the early church in the story of the Lord Jesus. Apostles were constantly telling what they had seen and heard, circulating their messages amongst believers. 1. Forasmuch as many have taken in hand to draw up a narrative concerning those matters which have been fulfilled among us. This verse might paraphrased "concerning those things which have become widely known among us Christians." 2. Even as they delivered them unto us, who from the beginning were eyewitnesses and ministers of the word. Luke was a secondary, not a primary, witness of the event. But he had access to both written and oral sources. 3. It seemed goo to me also, having traced the course of all things accurately from the first. Accurate writing can only follow accurate investigation and research. Luke has sifted the evidence he found, and has given us the wheat, not the chaff. To write unto thee in order. "Order" may mean "rational order", omitting nothing that is essential for ful and proper understanding. Some experts think that Luke aimed at chronological order, on the whole attaining it. Most excellent Theophilus. This man is mentioned only twict in the New Testament. From the way that Luke speaks of his friend it would seem that he was a man of high rank in official life.

Historical Foundation 4. That thou mightest know the certainty. Luke is determined that shall know that the faith which he has embraced has an impregnable historical foundation. Some religions can be independen of historical fact, and move entirely upon the plane of timeless truth. Christianity cannot. It rests upon the affirmation that a series of events happened in which God revealed himself in action for the salvation of men. The Gospels protess to tell us what happened. Con cerning the things wherein thou wast instructed. The world here translated "instructed" is the one from which we derive our word Luke's Gospel is the longest of

all the four Gospels. If we think of the whole course of Christian history in the Gospel and in Acts, the work is chronological. The figures are drawn with lifelike power. and the greatest drama of human history is set forth with supreme literary skill. The book is a scholar's attempt to picture and to interpret the life of Christ for the world at large. Luke's other work, The Book of Acts, begins with a prologue which gives a condense summary of the conclusion of our Lord's life on earth as recorded in the Gospel, Acts 1: 1. The former treatise I made, O Theophilus, con cerning all that Jesus began both to do and to teach.

Paul's Companion When the Apostle Paul was in Galatia, he had been hindered from preaching the word in Asia, hinderod by a severe sickness, and it was immediately after this illness that Luke, the beloved physician, became his companion. He went with Paul from Troas into Macedonia and finally on to Philippi, where they abode some time. He was Paul's companion at Miletus, Tyre, laesarea, and Jerusalem. He was with him in his journey to Rome

Once Franco's Prisoner, "Whitey" Dahl With R.C.A.F.

Harold E. (Whitey) Dahl, American flier who fought for the Loyalists in the Spanish civil war and was captured and almost executed by the Franco regime, has joined the Royal Canadian Air Force. He is shown, LEFT, with Flying Officer J. W. Reid before a high altitude test at Camp Borden. After a refresher course, he and other experienced U.S. pilots will take instructors' courses.

orisonment, and comforted him in his labors. He was the apostle's faithful companion during the last scenes of his life. Scripture tells us no more about Luke; but traditions, uncertain and untrust worthy, have completed the stor of his life. He is said to have preached the gospel in Italy, in Macedonia, and in Gaul; to have lived on to an advanced age, and to have died a martyr. Luke was the first scientific physician who laid his skill at the feet of Jesus. Thousands have followed in his steps, and, like Luke, have taken Christ with them into the sick-

In his epistle to the Colossians (4: 14) Paul writes: "Luke the be loved physician, and Demas salute you." Again in 2 Tim. 4: 11a: "Only Luke is with me."

Justice Impartiality is the life of justice, as justice is of all good govern-

Justice is itself the great standing policy of civil society; and any departure from it, under any circumstance, lies under the suspic ion of being no policy at all. -Burke.

Justice delayed, is justice denied. -Gladstone. Justice and truth make man free njustice and error enslave him.

-Mary Baker Eddy. God gives manhood but one clue success, utter and exact justice; that, he guarantees, shall be always

RADIO REPORTER By DAVE ROBBINS

AROUND THE DIAL Among others forced to leave England, temporarily at least because of Hitler's habit of dropping mbs and other unpleasant things all over the place, are Al and Bob

Harvey. Al and Bob are a pair of Canadian entertainers who went to England some years ago and were immediately "accepted" by the British public. They rose to become one of England's most popular vaudeville and music hall team, and were well on their way up the ladder before the Blitz. Back in Canada now. Al and Bob are now heard in a series of programs on the CBC chain, broadcasting Tuesday evenings at 8.30.

The women will like a feature

on WHAM each morning at 9.15 titled Ladies Only. It's all about this and that in the feminine world. Smartly styled and smoothly pacger in his neighbor's back. And that's a lot of listeners on any pro-

THE FUTURE IN RADIO The other day we spent some time absorbing some technical radio knowledge as we watched Marconi engineers installing the new CKOC transmitter - and the gave us an interesting piece o news. They say that within four years frequency modulation will be n general use — and that means the scrapping of all broadcasting equipment and home receiving sets as they are today. But on the other hand frequency modulation will bring "absolutely true" broadcast ing - without distortion or any fades - and with no less of vocal or musical quality. What a step forward that will be to radio!

Bill Tuttle, director of the "Big Sister" show, recently advertised for some household help. "I under-It has been estimated that 48,stand," said an announcer pal, "that you're looking for a new maid!"
"Yes," explained Bill, "the last one 000,000 people listened to President Roosevelt's famous speech when he accused Mussolini of sticking a daghandled China like Japan!"

Farm Notes . . Testing Soils

After Harvest Shortly after the crop has been removed is the most suitable time to take soil samples. Bacterial life and chemical activity in the soil are still at their best, just as they were when the growing crop was making its greatest demands on the plant food, says G. R. Snyder, well-known Canadian Soil Chemist, Soil samples taken at this time show the fertility condition of the soil during the growing season, and the test will indicate which link_or links in the fertility chain -organic matter, lime, nitrogen, phosphate, potash, calcium, sulphur, magnesium, etc.—are being de-pleted most rapidly.

Crops lodge easily, mature late and unevenly when the nitrogen supply is out of balance with the mineral plant foods. New seedings of grass and clover fail when the soil is strongly acid in reaction or exceptionally low in phosphate and potash. Potatoes scab badly in soils high in lime. Pastures and mead ows thin out and become weedy when there is a lack of lime, or ganic matter or mineral plant food. Livestock develop mineral deficiency diseases when the feed they consume is low in phosphorus and Learn State of Fertility

A soil test gives the farmer definite information concerning the lime supply and state of fertility of his fields, thus permitting him to adjust the manurial and fertility practices according to the crop quirements. The procedure for sampling fields depends somewhat on the

problem being studied. If the field fairly uniform, all that is nec essary is to take a small shovelful of soil to plow depth from eight o ten different paces, mix them horoughly and send in a cupfu or half pint of the mixed soil. With rolling land, the high land should be sampled separately from the low. In the case of problem areas, a sample representative of the poor spots and another of the proluctive areas nearby should be pro-Information concerning previous

cropping practices, condition of crops and crops to be grown for the next two or three years should be provided in a covering letter. Samples submitted to the soil testing laboratory in the fall can be given a more thorough checkup than is possible during the rush period of spring, and the sender is sure of receiving the report in time to make use of it in planning next year's cropping programme

Bigger Stores Doing Better

Increased income at home, to gether with virtual elimination of tourist shopping in the United States or abroad, resulted in a 25 per cent increase in Canadian de partment store sales in August over August, 1939, the Dominion Bureau of Statistics reports. Every province shared in the increase. Sales were 14 per cent above July, 1940. On making adjustments for number of business days and for normal seasonal variances, August purchases were 23 per cent higher than a year ago and two

per cent higher than in July. The

unadjusted index (on the base 1930

equals 100) stood at 76.7 for August

July, 1940. Hog Grading Plan Changed

Carcass Basis of Judgment as From September 30, Ottawa States

In order to insure more hogs of suitable quality for export to the United Kingdom, carcassgrading of hogs is now the of-ficial method of grading through-out Canada, Agriculture Minister Gardiner has announced. This became effective Sept. 30. The present hog grading regulations, which provide for livegrading of hogs and have been in effect since 1922, are re-

cinded as from Sept. 30 and live-

Many Office Safes Are Not Fire-proof

The words "fireproof safe" should imply security. Under this title it has become common practice to market many types of safes, both new and second-hand, sares, both new and second-hand, all supposedly giving fire protection. But surveys show that about 40% of safes tested by fire fail. This is logical when we investigate gate many of the receptacles sold under the name "fire-proof." In some of these safes we find the walls are only an inch thick, whereas in a proper, full-strength safe, it should be approximately six inches. Then we find all types of insulation, some merely consisting of an air space. Large in-stitutions with branches, having fire experience, know the unreability of many so-called "safes." Though more able to take losses, they do not take chances. The wise firm does not trifle in making certain he really has reliable

Modern Etiquette BY ROBERTA LEE

When a young man takes a girl out to dinner, and she knows he doesn't earn much money, should she be very modest in what she orders?

2. Should one turn down the corner of a borrowed book to

mark his place? 3. Can you give a list of about six subjects that should be avoided in general conversation? 4. When sending invitation to a dance, should exactly the same number of men as girls be invited?

5. At a church wedding, on which side of the main isle should be reserved for the bride! family and the groom's family? 6. Should peas be eaten with the fork or spoon? Answers

ited rational historic sites in East-ern Canada during the four-month 1. Yes, but she shouldn't overdo it. The young man would not period ended July 31, 1940, accordhave invited her if he didn't have ing to reports of attendance rethe money, and if she ordered ceived by the Department of Mines merely a sandwich and coffee, he and Resources, Ottawa. The rec-orded attendance at the museums would resent it. 2. Never; nor should he do so in any book. It is just as easy to use a piece of paper. Or a good way is to use a rubber band, placing it around the pages read, 3. Yes, six topics that should be avoided are accidents, disease, death, dress, at five of the larger sites was as follows: Fort Chambly, Qu 6,811; Fort Wellington, Ontario, 4,769; Fort Beausejour, New Bruns-wick, 3,809; Louisbourg Fortress, Nova Scotia, 3,082, and Fort Anne, Nova Scotia, 2,543. cidents, disease, death, dress, Although a comparatively young money, and personal domestic af-fairs. 4. It is wiser to invite a country, Canada has a rich histor-ical background, and more than few more men. Then all the girls are insured partners. 5. The left side for the bride's family, three hundred historic sites which have been judged to be of sufficthe right side for the groom's.

6. The fork should be used.

Grow More Flax In North Ireland

Northern Ireland has more than loubled its flax crop. The 1940 crop covers 45,000 acres and next year his figure should be substantiall increased, it is officially stated.

Production has been made cheap er by the introduction of pulling machines, of which 70 have beer ordered by the government.

How Can I?

BY ANNE ASHLEY

Q. How can I make a hole A. First cover the area where the hole is to be with putty, making the hole the size desired in the putty. Then pour into this hole a little melted lead and if the giass is not exceptionally thick, a perfect hole will result. Q. How can I make ordinary

fabric waterproof?
A. To make ordinary fabric waterproof, dissolve equal parts of isinglass, alum, and soap separately in water. Then mix the three, and brush the mixture on the wrong side of the aleth the wrong side of the cloth.
Q. How can I clean medicine

A. Medicine droppers may be cleaned effectively with pipe

Q. How can I stone raisins?
A. Pour hot water over the raisins and allow it to remain for five or ten minutes. Drain, and with cook articles. and rub each raisin between thumb and finger until the seeds come out clean. Dry before us-ing, and if using for cake, rub them in flour to prevent their sinking to the bottom.
Q. How can I regulate "gathers?"

A. Gathers can be regulated by lengthening the stitch on the sewing machine and loosening the tension. Stitch two rows Draw up the two under threads. regulating the gathers with the free hand.

Peppermint Oil

The mint harvest is on, and four farmers are busy distilling them 30-acre crop of peppermint.

Fred Malloy, Fred Donald, George Jamieson and Arnold Harris are the farmers engaged in the unique harvest. With the exception of a small still which is in operation just north of Stratford, these men believe that they're the only people in Canada who are distilling people in Canada who are distilling people. in Canada who are distilling pep-permint oil on a commercial basis.

Their rich deep soil is as well adapted to the growing of pepper-mint as it is to the growth of some of the finest celey grown is abliof the finest celery grown in this

province. Peppermint oil, according to Mr. Malloy is worth \$2 a pound at the moment and some 12,000 pounds are imported into this country by whole sale drug and pharmacertical hous-es. Most of it comes from the United States and England. They dis-till about 18 pounds of oil from a ton of peppermint leaves. Pepper mint is cut in the same way as hay, and left to wilt in the field for s short time. It is then put into the still and distilled under steam pressure.

******** What Science Is Doing

TOPICS

ASTHMA Like hay fever, asthma is not caused by the pollen of plants conveyed by bees or other insects. It is caused in some cases by windborne pollen. Inherited sensitivity, as in hay fever, is at the bottom of it, writes Dr. John W. S. Mc-Cullough of the Health League of

Causes The windborne pollen of plants.
Foods, food dusts, face powders,
animal dusts and dandruff and
feathers, especiall those from ducks, turkeys, chickens and geese. People whose asthma is due to feathers usually show attacks of asthma early in life. This is because they have slept on feather pillows as infants and have become ensitized to that particular type of feather.

Many cases of asthma develop in children who play with cats, dogs,

The dandruff of cattle, horses, sheep and swine is a common cause of asthma. Foods cause about 10% of all asthmatic attacks, but in children the percentage may reach 25 per cent. Many cases of asthma in children are caused by eating foods made from wheat, oats or eggs whose protein content is high.
The use of nuts is a common cause, but fruits and vegetables rarely cause the affection. There are people who are ten-

sitive to milk.

Sensitiveness to certain may manifest itself by eczema and hives in early life, and, later on in their early teens or twenties, the persons develop asthma.

An attack of asthma begins with difficulty in breathing and is ac-
