natural resources is a vital mat-ter to the people of the Province but it is as well to remember that other regions of the country and the world have ever more pressing problems caused by depletion. Professor P. B. Sears, an authority on land erosion, speaking at Philadelphia mentioned some of these prob-lems. Highly developed civilizations in all regions of the world have depleted their resources un disappeared. Floods in China deserts in the lands around the Mediterranean, reversion to jur gles of the central villages of dexico are in part traceable to bad management just as our western Dustbowl was caused b the ranczer, the sod of the short grass prairie. GET TOGETHER ON IT

An important point | brought out by Professor Sears is the way in which separate small groups, attacking sectors of the conservation problem, are now coming together in a unified effort to stop depletion and restore the countryside. The anglers were only concerned with restoring their fishing. Hunters want-ed more game. Foresters were protecting the woods and planting the trees. But each group has found that the limits of their work passed over into other phases of conservation. The fishermen now realize that they cannot protect the fish unless they stop soil erosion and pollution; the forester and hunter are finding that wild life and forests are linked together.

These two lessons are important to all naturalists and conservationists. We must know the history of other regions and of other times so that we can avoid their mistakes. We must unite our efforts; the farmer and the city dweller, the naturalist, the hunter and the angler, attacking depletion as a whole and restoring the woods, the waters, the soil and the wildlife, if our civilization is not to vanish as did Rome and Greece.

would be the height of foolishness for Canada to continue to feed Jap-an with material which might be used against her -Owen Sound Sun-Times. "MIXED FARMING" IN WEST? "Why are you such improvident wheat miners," the Lethbridge Herwld says that the East asks in effect of the Western prairie

farmers, "and why don't you raise more stock and why generally don't you go in more for mixed farming?" The answer of the Lethbridge paper is that the Alberta farmer, at any rate, is not merely not an exclusive wheat man but that he actually, in proportion. raises far more hogs than Ontario does. The relevant comparison is that Alberta, with a population of 800,000, raised 1,371,000 hogs last year while Ontario, with a population of 3,000,000, raised 1,997,000. The Lethbridge Herald insists that it is hasty assumption that Alberta could relieve the present glut of Canadian wheat by feeding 100 million bushels of wheat to hogs and raising 6,000,000 hogs. The trouble is that it would be just as hard for Canada to market 6,000,000 logs as it is for Canada to market 500 million bushels of wheat.

Canada's Prime Minister Congratulates The Navy

Visiting easiern defence stations, Prime Minister King took the opportunity to congratulate the officers and men of Canada's navy on their splendid work. He is shown here inspecting the officers of a destroyer at anchor in an eastern port.

THE WAR-WEEK-Commentary on Current Events

IS THE TIDE TURNING IN BATTLE OF BRITAIN?

the defeat of Great Britain, Sir Norman Angell, well-known English economist, declared in an interview at Boston last week. The destruction caused by air raids on Great Britain during the winter, he felt, would be offset by assistance from overseas - from Canada, the United States, Australia and India. Britain Wins First Round

That the defending forces had won the first round in the Battle of Britain was becoming increasingly evident last week. The R. A. F., while maintaining mastery of the home skies was carrying the war with steadily mounting strength to enemy territory; the Royal Navy controlled the Channel and continued to enforce a strict blockade of Axis-held countries fronting on the North Sea, the Atlantic and the Mediterranean; the British people were resisting the savage attacks of the Luftwaffe with magnificent spirit; North America was feeding Great Britain an endless stream of planes, ammunition and other war material. Even the Russians admitted that the British were more than holding their own. Red Star, official organ of the Soviet Army, declared that Germany's air offensive against Britain had failed. The

paper said that not only were the British continuing to defend themselves but were able "effectively" to carry the battle to Germany. No Invasion Till Spring? Vincent Sheean, world-famed foreign correspondent who wrote "Personal History," though frank in an opinion that Great Britain would have to have more help in

war materials, said that he believed actual invasion of England would people could withstand the air bar-Reports of three separate invasion attempts by the Germans which had been beaten off by the R.A.F. appeared in all the newspapers last week. Featured most prominently was the story of a big attempt on Sept. 16th, the day after Goering flew over London. Big Offensive Planned

Talk of a coming "great offensive" by the British was heard last week from Prime Minister Churc hill and three Cabinet Ministers (Lord Lloyd, the Colonial Secretary, A. V. Alexander, First Lord of the Admiralty, Aircraft Production Minister Lord Beaverbrook) This raised questions in everyone's mind: Would the offensive com on land, in the air, or by sea? Would it involve reconquering the entire continent of Europe by fight-

The coming winter will not see | chine off the map? Would it wait until France, Belgium, Holland, Norway, countries full of grave unrest and widespread sabotage, turn ed against their masters and tried to throw off the Nazi voke? Would it begin with large-scale military operations in the Axis rear the eastern Mediterranean?

Crisis Nears In Mediterranean Events appeared to be shaping hat way in the Near East last week. A British diplomatic offens ive was suggested by the meeting in Istanbul of the British Minister to Yugoslavia, Turkey and Bulgaria, considered as a prelude to formin a new Balkan bloc to stop an Axis drive southward; the London Times urged in an editorial that Britain seize Greek naval bases and strengthen her position at the enemy's expense; the visit of British War Secretary Anthony Eden to the Near East, seen as part of an attempt to promote Egypt's intervention in the conflict against Italy and create & Balkan-Arabic bloc against the Axis, obviously was worrying Germany and Italy.

Turkey's Attitude Vital The crux of the Balkan-Med erranean situation lay in the attitude of Turkey, and by reversion, to the attitude of the Soviet diplomats from whom Turkish leaders appeared to be taking their cue The trend seemed unmistakably to be towards stiff resistance by Turkey to the demands of Germany and Italy. With Turkey in the war Axis plans in the Mediterranean could very easily go sour.

Gibraltar and Dakar But Hitler, as we have all learned by now, is a master of the feint. With everyone's attention concentrated on the eastern Mediterranean, he could hardly choose a h ter moment in which to make a thrust through Spain (a whole Gen man division was reported to be poised there) to blitzkrieg Gibraltar and close the door of the western Mediterranean with the help of the Vichy government, once France was persuaded to re-enter the war. Thence on to Dakar . . Colonel Frank Knox, Secretary of the U. S. Navy, envisioned such a pos-

sibility when he declared last week that the fall of Gibraltar would be of "immeasurable" importance to the United States if it should result in a German move down the west coast of Africa to the vicinity of Dakar, which is only 1,600 miles from American shores. Japan Backing Down?
The Far Eastern situation appeared to have quieted down some-

tish-American solidarity in the Far East indicated that the Japanese felt they had lost the initiative in the Pacific, at least for the time being, and would delay any plans they might have had for early ac-tion in the Netherlands East Indies and elsewhere in Southeast Asia. At the same time, German agents all over the East were reported to be working to foment an open cash between Japan and Britain and the United States . . . and the Burma Road, China's lifeline, just re-opened by Britain, was Gandhi's "Last Campaign"

In India, the 72-year-old wizened Gandhi, leader of millions, inaugurated an Indian Nationalist disobedience campaign which he hoped would effect a reconciliation "not only between Britain and India but also between the warring nations of the earth." (Reconciliation between Britain and India to come, in his eyes, only when the in-dependence of India is granted). Describing it as the "last campaign" of his life, Gandha stated that he did not expect it to result in his arrest, since the imprisonment of such a popular idol would embarrass the authorities.

Japan's reaction to growing Bri

Election Race Hot On this side of the globe, the U. s. elections retained top position in the news. The race was getting hotter, the margin between Roosevelt and Wilkie narrowing hourly, as the big day was only half-a-week wway. For the first time, this column considered the election of Willkie as a possibility worthy of serious consideration. Was President Roosevelt scared when he took the stump for the last rounds of the 1940 political battle?

The contest to the south of us doubtless drew a great deal more attention than it was .worth. The outcome could not matter very materially to Canada - nor to Great Britain, since both candidates were pledged to give her all aid, short of war. Nevertheless the presidential race was an exciting thing for anybody to watch.

Toward the end of the week the Dominion was becoming more and nore concerned with the business Parliament just about to convene, prorogue and reconvene. All parties made ready to jump into the debate on the address in reply to the Throne Speech . . . Defense Minister Ralston postponed a trip overseas, War Services Minister Gardiner hurried back from Britain for the opening. Mr. Gardiner's filling of the post of Minister of Agriculture, as well

as the war Services Ministry, was viewed as unsatisfactory in many quarters of the Dominion. Farm onferences meeting in the west called for his removal, citing his failure to do anything in the face of the drastic wheat situation . . When asked if Premier Godbou of Quebec might be named to suc-ceed Gardiner, Prime Minister King smiled last week, and did not commit himself.

How Do You Cough?

means of expelling congestion from the breathing system, and there is a right and a wrong way to cough, a medical authority tells us. The correct way is to fill the lungs with air, then sud-denly expel it. The air should be drawn through the nose, filling the stomach and then the chest. If it is admitted through the mouht, it is not pre-warmed, and may therefore contract the passage and drag the obstruction deeper into the lungs. To cough correctly, take a full, deep breath through the nose and then cough with great force. That this method is effective was demonstrated by a medical man who, with one correct effort, expelled a pea which had lodged in his

Hallowe'en Party Entertainment

bing For Apples, Reading Your Fate In the Fire and Other Traditional Games

Of all the festivals of the year there is none more enjoyed by young people than All Hallow Eve, because it is an informal frolic where best clothes and company manners have been left

The invitations should be little out of the ordinary-tele phone messages or jolly little better. Cards adorned with ing the words "come and learn your fate on Hallowe'en at the following verse may also be used: "At our house on Hallowe'en your presence is requested. There signs and omens will be seen, and fortunes will be

Very often a big kitchen is the scene of the festivity as here all the apples and flour and water tricks can be played without much room may be decorated in the usual Harvest Home style with pumpkins, strings of corn, dried red peppers, autumn leaves or any spoils of garden or wood-land. Candles stuck in bottles may have black cat shades. Black

ISSUE 44_'40

kid gloves stuffed with wet bran should be placed where guests will come in contact with them, while skulls and long bony hands may be cut from black paper and hung from walls and chandeliers. Paper cloth and napkins with appropriate designs may be bought in the shops, also inexpensive favors, as horseshoes, rabbit-fobs, four-leaf clover, black cats, witches, brooms and wishbones.

FORTUNE TELLING Among all the Hallowe'en games the following will afford much merriment: Fortune Telling by Saucers - seven small saucers are placed in a row, their contents respectively a bit of scarlet cloth, a handful of moss, a scrap of blue cloth, a branch of thorn, a cord tied in a double knot, some clean water and a twig with forked ends. The person whose fortune is to be told is blindfolded and touches a saucer with the left hand. If he pulls out a handful of moss, a life of luxury! Thorn, unhappy life; red cloth, the army, military husband; blue cloth, the navy, a naval husband: forked stick, marry a widow or widower; clean water, single blessedness; double knot, mar-

riage near.
Another game not so time honored as many others, is played with a tin dipper and a washtub filled with water. The hostess sprinkles a handful of soup paste letters on the surface of the water. The player closes his eyes and scoops up some water. If he or she gathers in any letters they are the initials of the future

FATE IN FIRE An open fire adds much to the success of the Hallowe'en party, because the nut test can be tried. Two hickory nuts, one named for

Pride and Prejudice

Adapted from the Metro-Goldwyn-Mayer Picture

GERTRUDE GELBIN Copyright 1940 by Loew's Inc.

Since marriage is a girl's only career in the 1800's, Mrs. Bennet, mother of five marriageable daughters-Elizabeth, Jane, Mary, Lydia and Kitty-campaigns like a general to capture two rich London achelors, Mr. Darcy and Mr. Bing ley, for her two elder girls. Jane and Bingley fail in love at first sight; but Darcy's pride in his family and rank, prejudices Elizabeth against him despite the fact that they are warmly drawn to each other. Darcy finds Elizabeth' family impossible. Her gentee father is completely overshadov by her vulgar, scheming mother ad her sisters, outside of Jane Mary is a pretentious bore. Lydia and Kitty are unmannerly boister-ous. Elizabeth is completely incensed at Darcy's treatment of George Wickham whom he refuses to meet She credits his refusal to the fact

that Wickham is the son of Darcy's late steward. Darcy, disgusted with the Bennet family influences Bingley against Jane. Jane is heart-broken. Then Darcy realizes that family or no. he cannot conque proposes and she rejects him with ontempt.

CHAPTER NINE Family Skelton And then tragedy overtook the entire Bennet household.

Lydia, without bothering to stop for a marriage license, eloped to London with George Wickham. Mrs. Bennet took to her bed, overwhelmed by the disgrace which followed in the wake of her daughter's mad caprice. Not only did the lopment set Lydia outside the

pale, its scandal ruined forever all other daughters. Jane, returning from London, and Elizabeth, back from her visit to Charlotte, accepted this result with grim silence. Since Bingley was lost bands. Elizabeth, having flatly refused Darcy's offer to marriage settled her mind to the fact that

she'd live and die a spinster. Through Charlotte's husband, Mr. Collins, Darcy heard of the scandal. His immediate reaction was to take the first coach to Mery ton, and upon arrival, set out at once for the Bennet home.

Mary rushed to tell Elizabeth that Darcy was in the parlor waiting to speak to her. of fashion in this Anne Adams outfit for a small school belle!

she answered bitterly. "To offer my services, kindly. Her amazed stare gave him momentary pause. "Miss Bennet," he continued, "I told you the other day that, where Wickham was con cerned, I chose to be silent. What has happened to your sister has made me change my mind. You have a right to know the truth about Wickham. One must know the worst in order to be able to guard against it. Your sister's case was not the first, Miss Bennet." Elizabeth paled. "Do you mean that Wickham has done this be fore?" she cried.

"To my own sister," he said un-"Your sister?" Elizabeth's unjust accusations against Darcy in regard to his attitude toward Wickham swept through her. Her acute distress that he should now be forced to take her into his confidence on a matter so painful and personal to him, made her speechless with grief and regret.

"My sister, Georgiana, was only fifteen when she fell under Wickham's spell," he said heavily. "She has a considerable fortune in her own right. His plan was to elope with her and then, under the threat of publishing her disgrace, to force

the maiden and the other for the over, are laid in the fire side by side. If they burn quickly a happy courtship and marriage is assured, but if they fly apart there is trouble ahead. Another nut test determines the faithfulness of a lover. Three nuts are named and placed side by side in the ashes. The nut that cracks stands for an unfaithful lover, the one that blazes bespeaks a high regard for the maiden, but the one that burns steadily she will wed.

By the mercy of Providence, I discovered the plot in time. Your sister has been less fortunate." A painful silence fell between
