

SUNDAY SCHOOL LESSON

THE VOICE OF WISDOM.—
Proverbs 4.
PRINTED TEXT, Prov. 4: 10-27.
GOLDEN TEXT.—
Keep thy heart with all diligence:
For out of it are the issues of life.
Prov. 4: 23.

THE LESSON IN ITS SETTING.
Time. No definite date can be given for the writing of these chapters, but the author of most of the book of Proverbs, Solomon, flourished about 1000 B.C.
Place.—No geographical location is mentioned anywhere in this chapter.
The emphasis throughout the opening section of this chapter, as indicated throughout the entire book of Proverbs, is on the priceless value and infinite importance of wisdom. Wisdom has been defined: "In all the complex relations of human life and conduct, to know and do God's will." Wisdom is to understand, so far as it is permitted to man's finite intelligence, the manifold adaptation and harmony, the beauty and utility, of God's works and ways, and to turn our knowledge of them to practical account.
In this lesson we have a remarkable illustration of the infinitely surpassing value of parental instruction, especially in the matters of true character and religious faith.

Rewards of Wisdom
Four inevitable blessings are promised in this chapter to those who truly and consistently embrace such wisdom in their own life, and let it instruct them in all that they plan and undertake: 1. Wisdom will keep such a person from trembling; 2. Wisdom will make such a man's life balanced and sane and healthy—whatever he undertakes will succeed; 3. wisdom will bring honor from his fellow citizens to such a man; 4. finally, such a man, as he goes on in years, will find his whole life beautiful and adorned with a character of strength, a character lived and tested, a heart at peace because God is known and trusted.

Two Paths of Life
The father here informs his son concerning the two paths of life, and which one to follow, Prov. 4: 10.
11. Hear, O my son, and receive my sayings; And the years of thy life shall be many. I have taught thee in the way of wisdom; I have led thee in paths of uprightness.
12. When thou goest, thy steps shall not be straitened; And if thou runnest, thou shalt not stumble. Widening of the steps is as a Christian figure for the bold and free movements of one in prosperity, as the straitening (narrowing) of them is the constrained and timid action of one in adversity.
13. Take fast hold of instruction; let her not go: Keep her; for she is thy life.
14. Enter not into the path of the wicked, And walk not in the way of evil men.
15. Avoid it, pass not by it; Turn from it, and pass on.
16. For they sleep not, except they do evil; And their sleep is taken away, unless they cease to do so.
17. For they eat the bread of violence, And drink the wine of contention.
18. Instruction of a positive nature, the son is to walk in the way of wisdom is now followed by instruction of a negative form, warning the son to keep far, far away from the path of wicked men.
19. But the path of the righteous is as the shining light, That shineth more and more unto the perfect day.
20. The way of the wicked is as darkness. They know not at what they stumble.
21. The path of the righteous grows like the light of dawn. It is small in its beginning. The newborn Christian is like a rising sun struggling through the mists of morn.

Life of True Integrity
22. My son, attend to my words; Inclining thine ear unto my sayings.
23. Let them not depart from thy heart; Keep them in the midst of thy heart.
24. For they are life unto those that find them, And health to all their flesh.
25. Keep thy heart with all diligence; or out of it are the issues of life.
The fountains and wells of the Best were watched over with special care. A stone was rolled to the mouth of the well so that "a spring shut up, a fountain sealed" became the type of all that is more jealously guarded. So it is here. The heart is such a fountain; out of it flow the issues of life.
26. Put away from thee a wayward mouth, And perverse lips put far from thee.
The Hebrew word here translated "wayward" means literally distortion, and the phrase indicates a twisting of the truth; perverse lips are those that turn aside from the truth.

27. Let thine eyes look right on, And let thine eyelids look straight before thee.
28. Make level the path of thy feet, And let all thy ways be established.
29. Turn not to the right hand nor to the left: Remove thy foot from evil.
30. Rewards of Wisdom
Four inevitable blessings are promised in this chapter to those who truly and consistently embrace such wisdom in their own life, and let it instruct them in all that they plan and undertake: 1. Wisdom will keep such a person from trembling; 2. Wisdom will make such a man's life balanced and sane and healthy—whatever he undertakes will succeed; 3. wisdom will bring honor from his fellow citizens to such a man; 4. finally, such a man, as he goes on in years, will find his whole life beautiful and adorned with a character of strength, a character lived and tested, a heart at peace because God is known and trusted.

Canadian "Glads" Are Planted in American Soil

Hon. T. B. McQuesten, Niagara Parks commission chairman, and Ontario minister of highways, presents to Margaret Anne Mather cuttings of Canadian gladioli to be planted in American soil. Occasion: Almona Mather, 21, Chicago and Los Angeles industrialist, who donated the land. The park is the only memorial in Canada to a living American. The girl is a cousin of the donor.

28. Make level the path of thy feet, And let all thy ways be established.
29. Turn not to the right hand nor to the left: Remove thy foot from evil.

Farm Notes . . .

Weeds: Farmer's Perpetual Enemy

Weeds are the farmer's perpetual enemy and must be fought continually says John D. MacLeod, Crops, Seeds and Weeds Branch, Ont. Dept. of Agriculture, Toronto. It is unfortunate that nature endows weeds with more ability to maintain and perpetuate themselves than it does cultivated crops.

Here are a few figures as quoted in the "Seed World" showing the reproducing qualities of weeds and the number of years they will maintain their germination:

RADIO REPORTER

By DAVE ROBBINS

GOOD DEED CLUB
When next Saturday morning rolls around and the clock points to 6:45—be sure your radio is tuned to 1120 on the dial—for once again the Good Deed Club of the air will make its bow to the launch good deeds unlimited for the eighth season in a row.

For those of you who aren't acquainted with the Good Deed Club, it's a radio show whose members have merited their certificates by doing worthwhile deeds. And you too, Johnny and Mary, can win a membership, and possibly a wrist watch or four war savings stamps, if you write in to the Good Deed Club and tell them what you have done. The Hamilton Good Deed Club stays close to the rule that all their performers must not be more than 16 yrs. of age, so many thousands have passed through the orchestra, choir and specialty groups that have been broadcasting for the last seven years.

These youngsters are real kids and put on a real show—so listen in next Saturday morning at 9:45!

NOTES AND NEWS
The National network made no mistake when Percy Faith, one of Canada's best musicians, was named to the conductorship of the Contended program, heard over the red network Monday nights at ten. Enjoy yourself by dialing in Music by Faith next Monday evening.

NO! I'M SURE I DON'T!
TO GET THE SALT OUT!

A Seed Shortage Coming In 1947?

Dominion Agricultural Supplies Board Believes Certain Biennial Field Roots May Then Be Short — Cabbage, Beets, Cauliflower, Parsnips

The Seed Supply Committee of the Agricultural Supplies Board, which was formed after the outbreak of war last September, has been following closely Canadian seed supplies of cereals, fibre flax, forage crops, field roots and garden vegetables seeds. For the seed season of 1946 normal seed supplies were found available and the prospects for 1947 seed supplies now are favorable.

Careful investigation of seed stocks on hand, seed imports and exports and contracts for delivery in 1947 and 1948 indicates a probable shortage in 1947 of certain biennial field roots and vegetable crops including Mangel, Swede, Garden Beet, Cabbage, Cauliflower, Parsnips and also two annual crops Radish and Spinach.

Respective seed shortages from these crops are due to the cutting off of supplies from Holland and Denmark and to uncertainty as to quantities that may be imported from Great Britain.

This situation was reported to the Agricultural Supplies Board, at the conference with representatives of principal Departments of Agriculture, held in Ottawa, July 15 to 20. It was agreed at that time that as an insurance against possible shortages in 1947 the production of seeds in Canada from approved seed stocks of these crops of certain definite quantities under a joint plan between Provincial Departments of Agriculture and the Board should be undertaken.

Western Ontario, Water-Soaked, Is Weeks Behind Schedule — Central and Eastern Areas Report Much Better Progress

Western and Southern Ontario, water-soaked and with less than half of its spring grain crop garnered the first week end in September, showed marked contrast with the counties in Central and Eastern sections of the Province, according to the weekly crop report issued by the Department of Agriculture.

Cardiacs, for example, reported "splendid harvesting weather." Frontenac reported "80 per cent" of the "milk production is falling somewhat due to drying of pastures." Prince Edward reported "4, if there is some production in Northern Ontario. In Northumberland, more than 90 per cent of spring grain crops had been harvested. ENOUGH FEED FOR STOCK? Agricultural officials were hopeful that enough grain was to be harvested in Western and Southern Ontario to supply feed for stock, but were not betting on it. They definitely feared that the sections would not be able to produce seed grain for next spring. Potatoes throughout the entire districts were being attacked by blight, and it was estimated, scores of fields would be a total loss.

The survey reveals that hundreds of acres of fall wheat, which normally should have been harvested in July, were still in the stalk. Sprouting had started in every county in the two areas.

Britain Buying Quebec's Eels

New Market For Catch Found Previously Sold to Germany and Italy

A new market for Quebec's eel catch, which was sold almost entirely to Germany and Italy before the outbreak of war, has been found in Great Britain, Hon. Oscar Drouin, Quebec Provincial Minister of Trade and Commerce, announced last week.

The honours for honor of the week must go this time to Kate Smith, who said the other night while talking about a certain eel: "He has in his shop the same sweetmeats that were in Damascus when Christ was there!"

An order of \$7,000 pounds of oil will soon be shipped to England, the Minister said. About 2,000 pounds of the largest oils will be sent along as samples. The Minister expressed the hope that export of the product would increase steadily.

THIS CURIOUS WORLD

THE LAKE NOW ACCUMULATING ABOVE BOULDER DAM WILL CONTAIN ENOUGH WATER TO COVER THE ENTIRE STATE OF NEW YORK TO A DEPTH OF ONE FOOT.

THE SAHARA DESERT RECEIVES THREE TIMES AS MUCH ENERGY FROM THE SUN IN A SINGLE DAY AS IS CONTAINED IN ALL THE COAL BURNED ON EARTH IN AN ENTIRE YEAR.

OUR FOOD DOES NOT JUST SLIDE DOWN WHEN WE SWALLOW IT IS CARRIED TO THE STOMACH BY A MOST COMPLICATED TRANSPORTATION SYSTEM.

ENGINEERS calculate that, in the tropics, the sun bakes a single square mile during an eight-hour day, energy equivalent to that released by the combustion of 7400 tons of coal.

NEXT: How much turpentine has been taken from the limbs of the U. S. in one year?

By J. MILLAR WATT

One of the queerest "ranch" in the world raises mosquitoes for the express purpose of giving people mild attacks of malaria. This is because certain types of mental disease can only be cured when the tissue is attacked by the malaria germ. For this purpose the eggs of mosquitoes are collected, and, when hatched, the young are fed on malaria blood and kept in bottles. When a patient is singled out for curing, the open mouth of the bottle is placed against the leg and the vicious mosquitoes do the worst. It takes that number to ensure that he will be cured, but the patient gets malaria in only a mild form.

union in Uniform — Movie Actors in Air Force

Another 40,000 pounds of preserves are possible and Department of National Defence said.

America bought Alaska in 1867 for \$7,200,000.

A Pole was passing through Berlin with his small son. The boy saw a statue of Hitler and inquired who he was.
"Why, he's the man who freed us from our chains," the father said. "You know, mother's nice gold chain and my watch chain?"

The doctor was awakened by the 'phone jangling at 3 a.m.
"What is it?" he asked sleepily.
"Well, you see, doctor, we've been having a big party and I'm terribly worried about one of the guests," came from the other end of the wire.
"But why bother me? I'm seeing elephants or something," the doctor asked, annoyed.
"That's the trouble," was the reply. "The room is full of 'em and he can't see any!"

Need Clothing For Refugees

Red Cross Is Asking For Donations Suitable For Older Boys and Girls and Adults Sheltered in England

More and more garments for girls and boys over ten, and for adults, are urgently needed in England to clothe the more than 100,000 refugees from the Channel Islands and the continent of Europe, according to despatches received by the Canadian Red Cross Society.
Members of the more than 700 women's groups who resumed their war time work for the Red Cross in Toronto this month are being asked to devote much of their efforts for the next few months to providing clothes for these people who have, in many cases, been moved about so many times that they have lost what clothing they had. Workers are reminded that warm winter clothing will soon be needed, and for the English climate and for children who may come to Canada in the next few months.

WARM WINTER ONES
Letters coming in to Red Cross headquarters tell of the great appreciation felt for what has already been sent by Canadian women who have been working constantly, alleviating the distress among refugees, writes to her mother, "We simply burst into tears when we opened the box from Canada. Everything was of such good quality, so well made, and so exactly what we wanted."

All the garments that are shipped to England are made from new material, it was pointed out by Mrs. George Royce, acting director of the Women's War Work for Toronto Branch. She says the women of Toronto have done wonders in obtaining supplies of good material. Many are extremely clever at making garments out of small pieces of goods.

Heads "Suicide Squad"

The survey reveals that hundreds of acres of fall wheat, which normally should have been harvested in July, were still in the stalk. Sprouting had started in every county in the two areas.

What Science Is Doing

HIBERNATION FOR CANCER
A new type "hibernation bag" in which a cancer sufferer forget his pain and a narcotic diet found "complete cure" was described last week.

CURE FOR DYSENTERY
Sulfathiazole, a baby member of the amazing sulfanilamide family, is bidding strongly for recognition as the long-sought, effective weapon against dysentery bacilli.

Atlanta, Ga., physicians have seen this drug score repeated, spectacular victories over acute dysentery in children over three years old.

DARKENS GRAY HAIR
Discovery that panthothenic acid turns gray hair dark in rats is announced in Science, official journal of the American Association for the Advancement of Science.

This acid is one of the numerous fractions of vitamin B.
For three years dieticians have reported that something in vitamin B has the ability to turn gray hair darker. When gray hair has been caused by lack of this vitamin, the mysterious vitamin fraction, the restoration has been complete.

Films — average 20,000 feet in length when shown; but usually about 35,000 feet have been taken. This means a wastage of 15,000 feet for every film.

HAVE YOU HEARD?

A Pole was passing through Berlin with his small son. The boy saw a statue of Hitler and inquired who he was.
"Why, he's the man who freed us from our chains," the father said. "You know, mother's nice gold chain and my watch chain?"

The doctor was awakened by the 'phone jangling at 3 a.m.
"What is it?" he asked sleepily.
"Well, you see, doctor, we've been having a big party and I'm terribly worried about one of the guests," came from the other end of the wire.

"But why bother me? I'm seeing elephants or something," the doctor asked, annoyed.
"That's the trouble," was the reply. "The room is full of 'em and he can't see any!"

Mothers Junior is getting more like you every day.
Father (absently): "What has he done now?"

A certain actor who walked across the stage in a street scene of a third-rate drama was fond of telling his friends what he would accomplish when he had a speaking part. No matter how small it was, he would show them some real acting.

For three weeks he rehearsed all sorts of gestures, expressions, night before the mirror trying tones, until he felt perfect.
The eventful night arrived when the curtain was to rise on the new play for the first time, and the actor impatiently waited his cue. It came. "And so this is the end!"

With his best tragedian air he stalked to the centre of the stage, and in a voice of thunder cried: "It is!"

"You sold me a car two weeks ago."

"Yes, sir."

"Tell me again all you said about it then, I'm getting discouraged."

How Can I?

BY ANNE ASHLEY

Q. How can I wash delicate lace?
A. This can be done effectively by wrapping them around a milk bottle, fastening the ends and dipping the bottle up and down in soapy water until the lace is clean. Rinse in the same way, using clear water. Long pieces of lace are best washed in the bathroom sink.

Q. How can I make a good stuffing for pillows?
A. Old silk garments, cut into very fine pieces, make an excellent stuffing for pillows. They are soft and cool and as easily shaken out as feathers.

Q. How can I keep plants moist?
A. Water-soaked newspapers twisted around the roots of the plants, against the dirt, will keep the plants moist.

Q. How can I remove sun tan?
A. Buttermilk applications will usually prove effective. Or, mix 1/4 ounce of glycerine, 1 ounce of rosewater, the juice of one small lemon, and apply.

Q. How can I remedy disfiguring scratches on wall paper?
A. Moisten a scrap of the paper which has been saved and then carefully scrape off the coloring with a sharp knife. Apply this coloring to the scratch and when dry it will scarcely be noticeable.

Canada is the world's leading producer of asbestos. Shipments by Canadian producers in April amounted to 30,449 tons as compared with 24,921 in March. During the first four months of 1946 shipments aggregated 103,247 tons as compared with 101,605 during the corresponding period in 1939.

Leave Masks Behind Them

Less Than Half The People in England Are Now Carrying Their Gas-Protectors

Gas masks which nearly every Englishman carried at the outbreak of the war, have been disappearing from the streets gradually but steadily until less than half the population carries them habitually.

An Englishman thinks nothing of hurrying himself daily with an umbrella and an attaché case in which he may carry anything from papers to lunch and a change of socks.

TOO MANY FORGOTTEN
But he was a bit upset when possession of a gas mask, as well as a ticket, was demanded for admission to a movie.

The movies soon found the accumulation of spectacles too great to cope with, and dropped the rule.

There was a marked drop in the number of gas mask carriers immediately.

Women still generally carry them, as well as accompanying toddlers who lug containers almost as a matter of course.

ONLY FALSE ALARM
When German gas attacks failed to materialize, attempts to get the public accustomed to wearing masks were chiefly limited to newspaper appeals and warnings.

Some business establishments still insist on their employees donning gas masks at intervals for practice in working in them.

Since the start of the war London has had one gas attack alarm, and it was a false alarm.

Rumania's Latest "Strong Man"

General Ion Antonescu, long a bitter foe of Magda Lupescu, the new strong man of Rumania. He was called upon by King Carol to form a new government amid nationwide turbulence. He laid down his own terms for accepting the call, one of which was the exile of Magda Lupescu. Shortly after Antonescu became military dictator, King Carol abolished in favor of Crown Prince Michael.

Apple Crop Decrease Over Million Barrels

Preliminary estimate of the 1940 Canadian apple crop places it at 4,221,000 barrels compared with final estimate of 5,791,900 barrels in 1939.

Production of pears is estimated at 550,400 bushels compared with 577,100 last year while the peach crop production is considerably lower at 784,400 bushels compared with 935,000. The 1940 grape crop is placed at 42,800 pounds compared with 55,595,900.

ISSUE 38-40

Northern Ontario Sporting Heaven

It's A Paradise For The Hunter and Fisherman in the North-West Section of the Province

When the autumn leaves tint the landscape in beautiful colors and cool, bracing weather provides ideal conditions for fall hunting and fishing, many sportsmen will be out in the woods and on lakes and streams of Canada, according to C. K. Howard, head of the Fish and Game Department, Canadian National Railways.

CLIFF LAKE SECTION
Among the many territories making a sportsman's paradise is the Cliff Lake section of Northern Ontario, not only noted for its big game hunting but also as one of the finest muskie fishing areas in America, stated Mr. Howard.

"Comfortable log cabins have been erected on the shores of this lake for the accommodation of sportsmen fishing the district on fishing or hunting trips," he said. Fishing consists primarily of muskies and salmon trout, although there is a good supply of pickerel and great northern pike while the fall canoeing enthusiasts are the almost unlimited possibilities of the region for canoe travel.

Access to this district provides very good hunting for big and small game, as well as waterfowl, stated Mr. Howard. Of special interest to the fall canoeing enthusiasts are the almost unlimited possibilities of the region for canoe travel.
