than at the present There was a period in Jeremiah's Subscription Rates

world and the moral foundations upon which He has founded human affairs, who had never given a thought to these matters before. That 12,000 persons should assemble in and around Moscow Cathedral to pray as soon as their nation was plunged into war is but an illustration of the wide-spread awakening of the religious instincts of men. In spite of this there are, however tens of thousands of Canadians who never attend Church services and as compared with 25 years ago there is a marked decrease in church-going. The motor car has no doubt something to answer for in this matter, especially in the summer and the Radio not a little, particularly in the winter.

The broadcast services, with great organs, fine choirs and famous preachers are often more attractive than the coveries of the local church. The coveries of the local church for the coveries of the local church for the coveries of the local church. The provides of the local church for the coveries of the local

organs, fine choirs and famous preachers are often more attractive than the services of the local church. They can be enjoyed by the side of a good fire and there is "no collection."

But these are not the onty reasons for the change. Though there is as much real faith as there ever has been, there is far less unthinking acquiescence in traditional lectiffs. This is an age in which everything is questioned, and an age in which superstitious fear of "The Anger of the Deity" is no longer larly means far more than it did. It is evidence of real hunger and thirst after God.

Twenty-five years ago the majority of persons were inclined to profess more religion than they really had - to day the average person is inclined to profess less.

I find too, that quite a large numrgans, fine choirs and famous preathem was wasted. He urged them frequently and regreathers are often more attractive than to remain - to be the instruments in ourselves together.

ress more religion than they really had - to day the average person is inclined to profess less.
