THE NAVY THAT FLIES

Story Behind the Epic of Taranto by a Naval Correspondent

Once referred to as the Navy's youngest child, the Fleet Air Arm today has grown into a young stalwart that has nothing whatever to learn about air fighting.

For many months of the war the naval Air Arm came little into the news. The traditions of a "Silent Service" are its traditions too. Little or nothing was said of the thousands of miles of the North Sea and Atlantic ceaselessiy patrolled, of the clashes with enemy aircraft, the sighting and sinking of enemy U-boats In the Atlantic, searching for enemy raiders, the "Ark Royal" covered the strength of the same and torpedo-bombers they have more than proved their traditions.

Mr. D. C. Allen and Orvil C. Dell attended the annual convention of Western Ontario Dairymen's Association in London yesterday. Mr. Lea Marshall who is President of the Association in London yesterday. Mr. Lea Marshall who is President of the Association in London yesterday. Mr. Lea Marshall who is President of the Association in London yesterday.

arshall who is President of the cate of illness.

Today the Fleet Air Arm lives in Britain's growing fleet of aircraft in warships carrying up to

shes with enemy aircraft, the sighting and sinking of enemy U-boats. In the Atlantic, searching for enemy raiders, the "Ark Royal" covered 75,000 miles while her 'planes reconnoitred five million square miles of sea.

Then came Norway. Within a few days of that gallant, ill-fated expedition the deeds of the Fleet Air Arm leapt into world prominence, when if played a great part in protecting our troops and ships against enemy bombers, and launched its own daring attacks upon the enemy bases warships, transports and supply ships.

Admiralty's Praise

"We are proud of the Fleet Air Arm was the signal made by the Admiralty to the young fliers at the conclusion of these operations. It is rare for the deeds of the Navy to be so warmly commended.

There was a Royal Naval Air Ser vice before 1914. In 1917 the R.N. A.S. became part of the R.A.F. Most of its pilots and all its observes were provided by the Navy while the

They still spelled onions.

The observer reported to the navigating officer, the navigating officer asked the pilot to take a look. Everybody took a look. Far below the little light was still flashing longs and shorts and they still spelled on-ni-o-n-s. That's all, just onions.

The observer got out his code book, but it was no help. As far as the code book could tell, onions did not mean a submarine underfoot or a Heinkel overhead or a time bomb in the stoke hold. It didn't mean
