Any German drive on the Suez Canal will have to be a land and air campaign, for British warships still control the eastern Mediterranean. Map shows highways and railroads Nazi troops would probably use for a pincers assault on Suez from positions now held in Greece and Libya.

- HAVE YOU HEARD?

The high-speed salesman had joined the Army, gone into action, been wounded. For several days he lay delirious, but eventually on the first day of his recov ary he was surprised to see all nurses standing around his bed, offering him money.
"What's this for?" he asked.

"Why for the radio and refrigerators, you sold us while you were unconscious," they chorused Teacher: "Robert, what are

you going to do when you grow up?" Robert: "I'm going to be a grandfather and just sit around telling everybody how cold the winters were when I was a boy."

One of John's best friends had died so he called on the widow be express his sympathy.
"John and I were friends," he said. "Isn't there something could have as a memento of him? She raised her velvety brown syes, which a few seconds before had been wet with tears. "How would I do?" she asked.

Brown: If you had \$20 in your pocket right now, how would you feel? Hawkins: I'd think I had meone else's trousers on.

The prisoner was a very toughlooking customer. He was asked whether he could read or write. "I can write but I cannot read,"

was the reply. He was then asked to write his name and after he had scrawled huge letters over the page was asked what it meant. "I dunno," said the man, "
told you I can't read."

The Nazi leaders were playing contract bridge in Hitler's mountain retreat. "Three diamonds," said

"No bid," said Goebbels. "Five diamonds," said von Ribbentrop.
"One club," said Hitler. "Pass."
"Pass."

Dog Often Has Cause to Bite

Toronto Humane Society Defends Canine Offenders, Unless They're Plain Victors

Although the Toronto Humane society kennels frequently have dogs under observation for the city sealth department, they have never known a genuine case of rabies. "This indicates how little the Toroute public has to fear 'dog days,' Mrs. E. R. Lamb, an enthusiastic humane society worker, states. For 19 years, Mrs. Lamb has heard complaints lodged with the society. "Most dogs bite only for excusable reasons, not because they victous," she contends.

THASED BY CHILDREN Mrs. Lamb explained that dogs sctained for observation have been suity of biting some person. "The animal may be startled; children tease and annoy him, or comeone unknowingly treads on his feet or tail. The response is auto-matic and usually the dog is as

tary loss of self-control," she said.

Begin Building Seven Airports

To Connect Edmonton and Whitehorse in Yukon; Will Ald U. S.

Coincident with the report from Washington that United States has embarked on air base and other defence projects in Alaska to cost more than \$55,000,000, transport department officials in Ottawa late in April were advised work on each of the seven airports connecting Edmonton with Whitehorse in the Yukon has been started.

"Men are on the ground at en ery site chosen for an airport across northern Canada from Edmonton to near the Alaska border, a department spokesman said, "We are confident all the bases will be completed during the summer." He said that with the completio

of these seven bases, United States planes could cross the border at any point, connect with the trans Canada air route and use its beams and other facilities to Edmonton where they could swing onto the Edmonton-Whitehorse route also provided with all modern facilities to take them into Alaska. The Edmonton-Whitehorse route was decided upon following recommendations from the Canada-Unit the bases are being built by

What Science Is Doing

BRAIN FLUID SLOWS HEART The brain contains a chemical which can slow the heart beat, and lemon peel another that re-duces blood pressure. These discoveries were reported last week to the Federation of American Societies for Experimental Biol-

ogy.

The brain chemical seems to be produced continuously in the head, and presumably in the brain itself. It passes along the blood stream and acts directly on the heart.

> NEW SLEEP DRUG A new sleep-producing drug, oxazoledione, which is safe because an overdose is virtually impossible, was announced last week to the Federation of American Societies for Experimental Bioloby. More than half a pound can be given a 150-pound person without bad effects.

CANCER AGENT EVERY. WHERE

Evidence that the mechanism of cancer is dormant in all healthy tissue cells in the form of minute particles about one three-hundredand-fifty thousandth of an inch in diameter was presented last week.
The suspected particles are

known as mitochondria. PLASMA FROM CATTLE

BLOOD Blood plasma, the life fluid u gently needed by bomb-stricker Britain, soon may be obtained from the blood of slaughtered cattle, Dr. Morris Fishbein, editor of the journal of the American Medical Association, declares. Researchers working toward that end have produced promising results, Dr. Fishbein says.

How Can 1? BY ANNE ASHLEY

How can I make my te Apply a solution of perol ide of hydrogen diluted with one-half water to the teeth.

Q. How can I cause paint to

adhere to new tin?

A. Rub the surface of the tin first with pumice powder, or sandpaper, and apply shellac. Be sure the tin is free of grease before beginning the work.
Q. How can I clean white woodwork most effectively? A. Heat a pint of milk in pirt of water, and then add one tablespoon of kerosene. Apply and polish immediately with a soft

from serge?

A. Sponge the serge with hot vinegar before pressing it.

Q. How can I remove perfume spots from furniture? A. Perfume spots on furniture hould be smeared with linseed oil, olive oil, or camphorated oi immediately. Mop up, and apply

more oil on a woolen cloth. Q. How can I keep a kitcher sink free of grease and disagree able odors? A. Try pouring a strong solution of hot water and salt through the sink and drain at least once a week.

The Force of Example This lesson has primarily to do with the teaching and practice of temperance in the home. It is strongly suggested that if par-ents will live wholesome, happy, sincere Christian lives before their

It is often difficult to gather the top of a knitted skirt to fit the waist elastic properly. First measure the elastic firmly round the waist and join ends, then stretch this over a chair back which is the same width as the top of the knitted skirt and seam the knitting to the elastic with matching wool or silk. When removed from the chair the skirt will have even fullness and will stretch to the right hip measurements when it is being pulled on.

Amateur Knitter?

First Airman England's first airman is said to have been James Sadler, of Oxford. He made the first successful ascent in that country in 1874.

Gardening

ARTICLE No. 10 ardeners are advised to divide

their vegetable seeds into at least three parts, sowing a third as soon as the weather permits, a third a little later, and the balance at the very tail-end of the plant-ing season. In this way if frost does cut down the first batch there will be more plants coming on and the season will be length-ened by the last part of the gar-den sown. Of course there are some exceptions to this general rule. One should not plant out-side tender things like tomatoes, peppers, melons, etc., until danger of frost is over. Sow Grass Early

Grass makes growth in the cool weather of Spring and Fall. On this account, lawn work of a new or repair nature should be carried out just as After digging, the ground should be allowed to settle for a few days at least, and then levelpeat this process several times The top soil should then be raked fine and on a windless day the grass sown at a liberal rate, once across and once lengthwise. This double sowing insures an even distribution. It is always best to get a good mixture of high qual ity grass seed blended by exper

Canadian seedsmen.

Good Took Help Experts advise one thorough digging or spading in the late Fall or Spring, or if the lot is a large one it will be better to get it plowed. Just before either operation, if the ground is poor is a splendid idea to have som good rotted manure turned under. After this spading or plowing it will only be necessary to cultivate fine with a rake. One thorough cultivation like this once a year should keep the soil in shape and permit one to carry on easily with a small hand cultivator, or Dutch hoe. Either of these inex pensive tools can be operated without bending the back and both will be sufficient to keep

the soil stirred and the weeds down during the remainder of the
