MARRYING MARK

Violette Kimball Dunn CHAPTER 23

CHAPTER 24 Mark took Valerie to the den tists's the next morning, which seemed to Dorothy an answer to prayer. She was fresh from her day with Elise, and worked up to an increased state of righteous in-dignation. If her sister's child was not freed from the influence of a creature like the Tredway girl before another twenty-four hours, because there was no decency she assured Elise, it would be in

the world.

Loucy was in her own sitting room when Dorothy knocked. Lucy got up courteously, although she could see even now that courtesy was not going to play much part in the conversation. Will you sit down?" she asked. Dorothy came in and closed the

moment without answering. "I won't pretend that this is a social call," she said at last. If she expected Lucy to question her further, she was disappointed. The girl merely went on with her

"You were unknown to this house on my last visit,' Dorothy said. "Or at least, I suppose you were. You established yourself after I had gone back to my own responsibilities. You probably know that I was here to bury my sister. Seven short months ago!"
"Nine, wasn't it?" Lucy asked cheerfully. "Almost a year ago.

"If you mean how long is it since Mr. Alexander engaged me to tutor Valerie, I'm afraid I don't know exactly. Sometime in the early summer of last year. "Have you a mother?"

"No," said Lucy flatly. She added nothing to the statement. "That may explain it. At least artially. How old are you?" Lucy put down her darning. She was very careful about it, laying

Neat squares of it, suitably dressed, are equally at home on the banquet table or at dinner in the kitchen. It doesn't go to Britain.

And what about pig's feet And hocks? Pickled trotters may not look enticing, but they have within them that certain something which defies description. They are, in the best sense of the word, toothscme, whether the tooth be natural or store variety. natural or store variety.

natural or store variety.

Sausages need no brief from any one. Served au naturel with apple rings, with tomato slices with ketchup or relish or plain mustard, they take second place to no meat at breakfast, dinnef or supper. Little sausages or big ones, flanked by scailoped potatoes or baking powder biscuits—ah me! The flavor lingers!

Last but not least, there's headcheese. It's messy stuff in the making, but the end justifies the means. The ugiy head, resolved into its meaty parts and moulded into a quivering jelly was a standby in pioneer times. It helped to nourish brawny men and noble women. It does the same nowadays, when it gets the chance. There are those who claim it is quite the choicest of all pork tidbits. We'd nardly go as far as that. Suffice it to remack that nectar and ambrosia wouldn't stand a chance on a cold winter's evening in the lamplight when the headcheese is set out on the table in all its glory. what it is you want?"

Goebbels Has A Premonition

Propaganda Minister Goebbela writes in the weekly Das Reich that the "Axis powers are really fighting for bare existence, and the worries and distress which we the worries and distress which we all must bear in the war would pale in the face of the inferno which would await us if we were to lose."

The article says that Hitler's work "often enough hung on a silken thread," and that "the chance which the German nation processes is indeed its greatest,

possesses is indeed its greatest, b.t also its last." The article tells the German people "not to ask when victory will come, but rather to see to it that it comes."
Victory, Goebbels wrote, would

require a "gigantic national ef-fort" from which no one could be exempted.
"We can be victorious and we will be victorious," he continued.
"Just as a war which is won will benefit us all so a war which is lost would smash us all up. As always in the great hours of history our people has its fate its own hands."

Arctic Indians Donate \$432.00

The Old Crow Indians who live north of the Arctic Circle in Yu-kon territory near the Alaska boundary have sent to Resources Minister Crearar \$432 for the relief of bombed out children in the United Kingdom, it was learned at

Ottawa.

Dollars come hard to the Crow Indians, most northerly of all North American bands in Canada, so this gift meant much to them. Indians rarely live as far north as the Arctic Circle, usually considered Eskimo territory, but Crow Indians have hunted and trapped along the Crow River for

generations.
This summer they took their catch of last winter to a trader in Alaska and were paid in United States dollars. Then Chief Moses, who had been told of the bombings in London, took up a collection in the band. He headed the list with \$100 and some 24 Indians made up the balance. The chief tied the bills in a red cotton handkerchief and turned it over to the Royal Canadian Mount-

Bird Conservation Must Be Continued

Conservation work might be continued in order to maintain the migratory bird resources of North America, reports the Department of Mines and Resources. Trained investigators of both Canada and the United States agree that their observations of migratory game birds in both countries indicate moderate gains and minor losses, affording a bas-is for restrained optimism. Information gathered at many points, from southern Mexico to the Arctic coast, indicates that the wild ducks and geese of North America have, in general, in-creased in numbers during the past year, but that the increase is smaller than is desirable. Coots or mud hens are abundant in their normal range, but rails have suffered both from shooting and from severe winter weather. The population of wood-cock, while showing some local improvement, has continued, in general, below normal. Wilson's snipe has been decreasing stead-ily in numbers for some years and has reached such a low level that the hunting of this bird has

been entirely prohibited through-out the United States. A Busy-Day Cake For Busy Workers
