

Canada's Navy keeps the seas: through fair weather or foul, in rain or fog, ships of the Royal radian Navy maintain their vigil at sea. Here one is seen, looming out of the mist, while in one

Canada's Navy keeps the seas: the last of her canada's Navy maintain their vigil at sea. Here one is seen, looming out of the mist, while in one of her consorts a seaman stands his watch.

Canada is celebrating "Navy Week."

Throughout the Dominion, from the Atlantic to the Pacific, in industrial centres and prairie villages, the Navy League of Canada is calling the nation to pay tribute to the men of the sea who are winning the war of the Free Peoples.

Navy Week, sponsored by the Navy League of Canada, in this second year of war means more than ever before to a Canada which has seen her Navy grow, since war was declared, from less than than ever before to a Canada which has seen her Navy grow, since war was declared, from less than 2,000 officers and men to more than 25,000 officers and men — each of whom is helping in Canada's large part in the war at sea.

What Science Is Doing

WHAT SCIENCE IS DOING? SQUEAKING DIAMONDS

Touch a diamond and almost any pearl with a piece of dry ice and they squeak. Imitations don't. So reports Miss Mary D. Waller, of the London School of Medicine for Women.

The explanation is simple.
When dry ice (solid carbon dioxide) is heated it turns at once into a gas and skips the liquid stage. Touch a metal plate with a point of dry ice, and heat passe from the plate to the dry ice, whereupon gas is formed. stream pushes away part of the plate in front of it, whereupon it stops and the plate springs back.
This happens about 1,000 to 4,-000 times a second, so that we have high-pitched sound vibra-Touch a piece of glass or some other non-conductor way and no squeaks are heard. Miss Waller has learned the trick of producing continuous, very high musical notes from diamonds and pearls. A very light, steady touch is demanded to make a gem sing, and so is a sense of

OCEAN YIELDS MAGNESIUM Recovery of metallic magnes-ium from seawater at Freeport, Tex., by the Dow Chemical Company of Midland, Mich., recently was called the outstanding chemi-cal engineering achievement since

At the Freeport Plant, some 800,000,000 gallons of raw ocean water are daily processed to produce 100,000 pounds of metal well as large quantities

Magnesium alloys (known as Downietal), are the lightest being one third lighter than alun inum with comparable strength and toughness. Today 100 per cent of Dow's output goes into defence uses, particularly in cast ings for airplanes, each of which on the average will contain 1 000 pounds of this remarkable

Science Has Hopes Of Defeating Moth

Science held out hope to the nousewife and others today of making woollen articles safe from moths and heavy-handed laund-resses. The Bureau of Standards and Textile Foundation of the United States announced discovery of a chemical treatment which shows promise of making wool less edible for moths, less sensitive to Alkaline factors in soap and less likely to shrink.

The production of maple syrup and maple sugar in Canada in 1941 is estimated in terms of maple syrup at 2,276,400 gallons. *****************

How Can I? BY ANNE ASHLEY

A. It is a wise plan to keep a comfortable pair of shoes on hand that are waterproof for out-door use. Apply a dressing made by melting together two parts of bees-war to one part of mutton fat. Apply at night, and remove the next morning by wiping with a piece of flannel.

Q. How can I clean a sotled felt A. Rub it very lightly with a fine grade of sandpaper, rubbing with the nap. Then rub over with

gasoline and allow to stand in the air for a while. Q. How can I prevent icing from hardening if I am interrupted by the doorbell or telephone while

icing a cake? A. Place a damp cloth ove. the owl containing the frosting. Q. What are some of the values of various vegetables?

A. Lettuce is good for the nerves. Beets and turnips contain iron. Tomatoes are good for the liver and stimulate it. Celery is good for rheumatism. Spinach is good for the bowels. Carrots are good for clearing the complexion. Asparagus is good for the kidneys. Q. How can I mend a loose umbrella handle?

A. If the umbrella handle becomes loose, pour some melted resin or sulphur into the hole. Quickly force in the umbrella rod and hold for a few minutes until the substance hardens.

Mark 7:20-23; Rom. 1:18-32; 6:23; Gal. 6:7, 8; James 1:13-15; 1 John 1:5-21: 6; Rev. 22:10-12 PRINTED TEXT-Gal. 6:7,8; I John 1:5-2:6. GOLDEN TEXT-If we confess our sins, he is faithful and rightsous to forgive us our sins, and to cleanse us from all unright HE LESSON IN ITS SETTING

Tme—The event recorded in the book of Genesis took place at the very beginning of human history, the time of which we do not know. The 14th Psalm was written by David and thus was penned some me between 1045 and 1015 B.C. The passage taken from Jeremiah may be placed about 601 B.C. The words of our Lord were uttered in April, A.D. 29. The Epistle to the Romans was written in A.D. uss written probably A.D. 58. The Epistle of James may have been written about the same time. The First Epistle of John, and the Book of Revelation were written about Place—The fall of our first par-

ents took place in Paradise, though we do not know where this may been located. The 14th Psalm may have been written near Jerusalem. The passage from Jermiah is to be related to the City min is to be related to the City of Jerusalem. The words of our lord wore spoken in Capernaum. The Epistle to the Romans was written from the City of Corinth, well as 'he Epistle of the Galatians. The Epistle of JaJmes w. z written in Jerusalem. John probpenned his First Epistle in le City of Ephesus. The visions the Book of Revelations were even to John on the Island of

Law of the Harvest not deceived; God is not socked; for whatsoever a man sweth that shall he also reap. t For he that soweth unto his own feel shall of the flesh reap corption; but he 'nat soweth unto Spirit shall of the Spirit reap nal life." The law of the ha it is true in the material world, from sinful practices. After all, equally so in the moral and that is the only kind of life that ual world. Such as the seed really satisfies. such will be the harvest ared. By the flesh here one probably understand fleshly

sance, and the gratification shly desires. That which man saved, and that which he has ed, will turn to decay. A course self-indulgence corrupts the moral nature and needs in destructon. By sowing to the Spirit, the ipostle simply means living aca man who lives spiritually knows i. "And this is the message announce unto you, that 'tod light, and in Him is no larkness all. 6. If we say that we have hip with Him and walk in darkness, we lie, and do not the truth. 7. But if we walk

the light, as He is in the light have fellowship one with an-ther, and the blood of Jesus His cleanseth as from sin. 8. If asy that we have no sin, we Melve ourselves, and the truth lot in us." One can hardly conof any man saying he has and yet there are men that i just like that, Christian m 1. called. The Apostle says these sally believe what they say, the truth is not in them. Men

say they have no sin do not what sin is. nfession and Denial I'll we confess our sins, He thful and righteous to forgive our sins, and to cleanse us all unrighteousness." When onfess sin, we acknowledge we are guilty of some particu God has told us that we veness of sins through lood of the Lord Jesus Christ, ising this, He is ever ful to what He has said, when fess sin, by forgiving and

ve say that we have not we make Him a liar, and word is not in us." This is a tion of verse 8, making a the fact of sin to lous, in that we thus God to be a liar, and that His word is not

y little children, these write I unto you that ye n. And if any man sin, ve an Advocate with the sus Christ the right-The word Advocate means alled to another's side, to time of need. In an hour the Lord Jesus immediately

is the propitiation for and not for ours only, so for the whole world. 3. we know that we know we keep His commar ie that saith, "I know him" eth not his command

AIR CADETS OF CANADA

Members of the newly-formed Air Cadets of Canada take the same elementary flying course as their big brothers in the RCAF. Abave, Cadets Pierre Lebeau and Andre Jobin, of No. 2 Jean de Brebeuf Squadron, Montreal, study a scale model of the solar system.

Youth wants wings. And Cana- | form. It is, actually, a "junior air da's 'teen-age boys are going to get them in the newly-organized Air Star Cadet League, which will train them in the preliminary program of the RCAF.

The dream of a pilot's life won't come true—immediately. But the elementary training these boys will undergo will prepare them to be Canada's future pilots, navigators, observers, gunners, ground crews. For the league's set-up follows closely the senior air force pattern of ranks, training and uni-

ments, is a liar, and the truth is not in him; 5. but whose keepeth His word, in Him verily hath the love of God been perfected. Hereby we know that we are in Him: 6. He that saith he abideth in Him ought himself also to walk even as He walketh." If we say that we abide in Christ, and derive our life from Him, that we know Him, and love Him, then it ought certainly to follow that we should walk as He walketh and should live according to the command-ments of the Lord. The Christian religion, making a perfect provision for sin, is at the same time that which insists upon a life separated

Started under the auspices of fence in Ottawa, the new organization is similar in scope to the British Air Cadet Defense Corps, which has a membership of 190,0 0. The Canadian Air Cadets exp ct

to have 25,000 boys enrolled for the new school year. Course Covers 216 Hours Canadian boys between 12 and 18 years of age are eligible for training. The basic course covers two years, a total of approximately 216 hours. Subjects covered include aircraft recognition, maps and map reading, a study of airplane engines and airplane construction drill, airplane armament, model building theroy of flight, signaling, first aid, knotting, mathema-

tics, physical training. Advanced training, to include aerial navigation, aerial photogra-phy and radio, is planned for cadets who have passed this elementary training.

Boys join the air cadets on a voluntary basis, and parents must approve, Each boy is given a medical examination, and only those physically fit to stand the training program are accepted. The organization headquarters are at Ottawa, out local organizations will be in erarge of local school boards, ser-

THIS CURIOUS WORLD By William Forguson

WHEN RESTING COPR. 1938 BY NEA SERVICE, INC. 3-21 THE actual pull of the moon on the surface of the earth depends on the varying distance at which the moon is to be found. But the results obtained depend on whether or not the moon is working in co-operation with the sun, or against it. A full moon and a new moon have the sun's help, but during the quarter phases the moon must counteract the pull of the sun.

NEXT: The strange case of the bashful canary.

vice clubs and other responsible organizations which must provide adequate adult leaderhip and s nance the local unit.

Minimum unit is a flight of 50

boy between 15 and 18 years of age, junior units being permitted for boys from 12 years up if senior is in existen senior is in existence.

As in the RCAF, the boys dress in air force blue, and their badge is an albatross with maple leaf above and Air Cadets Canada below. Squadron markings are worn at the shoulder, and rank badger are similar to those of the air orce, with cadets being able to climb to non-commissioned office ranks. Cost of uniform is set at approximately \$15 per cadet.

The Air Cadet League has come existence as an answer to request for training from airminded Canadian boys too young to join the air force. Private air cadet corps had previously been started in several cities. The present organization is closely tied in with the air force, with a number of air force officers acting as liaison between the cadets and the air force, and inspections being made by air force officers. Boys joining the air cadets do not automatically on attaining 18 years have to join the air force, but it is hoped that most will, and that the training they receive in

the air cadets will save many months of air force training. The air cadets meet after school hours once or twice weekly. In some schools the air cadets have been formed as a part of the school cadet corps. -By James Montagnes, NEA
