

SUNDAY SCHOOL LESSON

LESSON IV
THE TEMPTATION OF JESUS
Matthew 4:1-11; Mark 1:12, 13; Luke 4:1-13

PRINTED TEXT, Matthew 4:1-11.
GOLDEN TEXT—For we have here a temptation of Jesus, one that has been in all points tempted like as we are, yet without sin. Hebrews 4:15.

THE LESSON IN ITS SETTING
Time.—The spring of A.D. 27.
Place.—A wilderness, probably on the west side of the Jordan, though its location is not definitely known.

Satan's Desire
1. "To be tempted of the devil." Satan's deep and constant desire, as the enemy of God, is to thwart God's purpose, to prevent God from saving man, and to make it impossible for the Kingdom of God to be fulfilled.

2. "And when he had fasted forty days and forty nights, he afterward hungured." We should always bear in mind that our Lord's temptation occurred immediately after His baptism, that is, immediately after the hour He was officially anointed by the Holy Spirit to undertake His great ministry. The number "forty" frequently recurs in the scriptures in relation to circumstances not altogether dissimilar from this event.

3. "And the tempter came and said unto him, If thou art the Son of God, command that these stones become bread." The tempter puts the matter in this form in order to invite Jesus to establish the fact by a miracle and in order to intimate that he certainly has the right to satisfy his hunger. Jesus was tempted to work a miracle in order to reveal his hunger. But he never performed miracles merely for his own benefit; they were all wrought to do good to others, and so Jesus' divine hunger was not satisfied by a miracle.

4. "But he answered and said, It is written, Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God." In each of the three temptations, Christ answers by quoting the passage from the Old Testament Scriptures. What is this word of God which we are to live by? It is the word of divine truth, the word of God's promise, laying God's strengthening comfort upon the heart. Note carefully that the moment Christ utters the word of God, Satan ceases a particular temptation.

5. "Then the devil taketh him into the holy city, and saith unto him, If thou art the Son of God, cast thyself down; for it is written, He shall give his angels charge concerning thee: and on their hands they shall bear thee up, lest thou dash thy foot against a stone." Jesus stands on the lofty pinnacle of the Tower, or on the Temple porch. He is surveying the scene and by his side is the tempter, watching him. This was the time to act upon his trust. But so to have done would have been to trust—far less the heroism of faith—but presumption. Such temptation as was here presented to our Lord can occur in our own lives.

6. "Again, the devil taketh him into an exceeding high mountain, and sheweth him all the kingdoms of the world, and the glory of them; and he said unto him, If thou wilt fall down and worship me, I will give thee all these things." The one thing that Satan wanted was so simple to state yet so vast in its implications, namely that Jesus should fall down and worship him. When we worship, we serve. By bowing down we submit to the one before whom we throw ourselves prostrate. Should Jesus have bowed his knee to this monster of iniquity, then he would have come under Satan's power.

Two Principles
10. "Then saith Jesus unto him, Get thee hence, Satan; for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve." This passage reveals the two fundamental principles dominant in our Lord's life, namely: an intimate knowledge of what the will of God is in any particular crisis of life, and, secondly, a determination to adhere to the will of God, no matter what the cost might be. When these two principles are dominant in the life of any believer, that life is safe from collapsing in the hour of temptation; that life will be one constant triumph of increasing strength and of abiding joy.

ANDY HARDY TAKES A BRIDE

Yes, it's Andy Hardy—all grown up and playing the real life role of bridegroom. The 21-year-old film star is pictured with his 19-year-old bride, the former Ava Gardner, of Wilson, N.C., shortly after their wedding in the Presbyterian Church of Ballard, Calif.

Winston Churchill Values Punctuality

Premier Winston Churchill is one of the world's busiest men and to such men punctuality is a virtue. Concerning this virtue Mr. Churchill has expressed himself as in agreement with the sentiments of a friend who could never understand the point of view of persons who make a habit of being 10 minutes late for each appointment throughout the day.

Mr. Churchill expressed the belief that in the case of a late start the only straightforward course is to cut out one or two of the appointments altogether so as to catch up, the theory being that it is better that one notability should be turned away expostulating than that nine deputations should each fume for 10 minutes in a stuffy ante-room.

One of the outstanding forms of war service rendered by the Boy Scouts of Canada during 1941 was the "Red Cross" camp maintained near Halifax, on the "Lone Cloud Scout Reserve" for the benefit of sailors of the convoy fleet. Some 1,500 ratings from ships of all types were given several rest days ashore, for which the warmest appreciation was expressed by men and officers. In a number of cases appreciation took the additional form of a substantial donation from a ship's canteen fund, voted "men money."

The sailors were accommodated in eight Airondrack shelters, an officers' tent and a mess hall complete with galley. Three of the eight shelters were paid for respectively by the Canadian General Council, the Scouts of Montreal, and the Halifax Rotary Club. Contributions toward other shelters were made by a number of Scout Groups in different parts of the Dominion, and the balance of the building cost was taken care of by Halifax District.

The first party to visit the camp were men from an armed merchantman, and these were followed from week to week by detachments from battleships, cruisers, destroyers, submarines, and a hospital ship. One mixed party comprised crewmen from Free French and British corvettes.

The men enjoyed themselves swimming, rowing, sailing, football and softball. Rather oddly, from the layman's point of view, rowing about the lake in fishermen's dories was a favoured sport. Tramping through the woods also was popular; and several of the sailors were paid for their services as guides, for some hours, but were found by search parties, none the worse for the experience.

Russia's Second Line of Defense

Groups of Men Behind Front Line Put Essential Services in Working Order

The enthusiasm and skill of the Russian workers, who form the second line of the great Russian army pushing back the German troops, has been paid tribute to by the setup of the Russian army. He said that immediately behind the front line there was the camp for the technical and technical department, the railway gorges and groups of others whose job it is to get into working order all means of communication, railway stations, bridges, and the most essential services.

"They call them second line soldiers and they are filled with the same high spirit as their brothers in front of them," said the speaker. "The railways are put in order with a speed that is almost unbelievable. In one week a railway line, half a mile of destroyed railway lines were repaired in three hours. At an important junction work was carried on day and night. Fires were lit to give light and warmth for the men working on the trains and other equipment. Interminable supply columns move steadily along."

"Behind the technical and supply departments, come the people who used to live in the villages and towns. They came back most of their homes destroyed or their property stolen. Government committees are there to give immediate assistance and within two or three weeks life begins to return to normal."

RADIO REPORTER

DIALING WITH DAVE

have expected, Jack Benny, Las Vegas, has jumped to the place after the doghouse into a mudhouse. For over two years he has been writing the "Uncle Walter's Dog House" program. Now he has resigned to join Edgar Bergen's writing staff in Hollywood to help put some words in Charlie McCarthy's mouth. Look for some new humor and gags in the Sunday night CROCK and CBC network lineup—Charlie McCarthy at 9:30 D.S.T.

The Great Gildersleeve, one of radio's newest nighttime comedy programs, grew out of the Fibber McGee show, with McGee's sidekick Gildy, streamlined into a show of his own. Among the many voices on the show is that of Lester Tuttle who plays young Leroy's indulgent sister, Marjorie. Leroy is in one way the star of the leading dramatic bits in Academy Award, Sundays at 8:15 on CROCK. The Great Gildersleeve is a satirical comedy. It is like a Mountain Railroad—like a Mountain Railroad—like a Mountain Railroad.

Canadian survey on top notch shows of the year 1941, place Charlie McCarthy (CROCK and CBC network) in first spot with night-time dialers (Sunday 9:00 D.S.T.), and The Happy Gang, (CROCK and G3O network)—daily 2 p.m. D.S.T.) as second top listened to show with daytime audiences. Sammy Kaye have both made fine recordings of the tune!

Record of the week is "White Cliffs of Dover," Kay Kyser and Sammy Kaye have both made fine recordings of the tune!

The Royal Bank of Canada 73rd Annual Meeting

Morris W. Wilson, President and Managing Director, has new partnership of Canada and the United States. As Chairman of the British War Supply Council sees Germany outstripped by Britain and North America in 1942.

Sydney G. Dobson, General Manager, reports assets over \$1,000,000,000. Sees record business expansion this year.

Prediction that Germany's war production would be outstripped in 1942 by the combined output of Canada, the United States and Britain, was made at the 73rd Annual Meeting of The Royal Bank of Canada by Morris W. Wilson, President and Managing Director.

In his annual address Mr. Wilson said that the Royal Bank of Canada had a tremendous productive capacity of war materials, and that the bank had a large stake in the production of war materials in Canada.

"Two years ago," said Mr. Wilson, "we were incapable of outfitting an infantry division; today our industries can equip a new division every six weeks."

Mr. Wilson said that the Royal Bank of Canada had a large stake in the production of war materials in Canada, and that the bank had a large stake in the production of war materials in Canada.

HOW CAN I?

BY ANNE ASHLEY

Q. How can I prevent stretching buttons in a sweater?
A. Before ironing knitted garments, it is wise first to baste the buttons in order to prevent their stretching. The threads can easily be removed when the garment has dried.

Q. How can I retain the colors in cretonne when laundering?
A. The next time it is necessary to launder the cretonne slip covers, or any other cretonne articles, try washing them in bran water and see if they do not retain their colors.

Q. How can I attach a meat grinder to a white enamel kitchen table that is slippery?
A. Place a small wad of paper between the grinder and the table, tightening the screws on the paper instead of the table.

Q. How can I make a good cake without eggs?
A. Delicious cake without eggs can be made by dissolving a teaspoonful of baking soda in a tablespoonful of hot vinegar, use this the same as eggs. This quantity takes the place of one to two eggs. If four eggs are called for, two eggs and the above quantity of soda and vinegar should be used. Excellent results, however, are obtained with soda and vinegar.

Q. How can I increase the quantity of a trifle easily in accordance with the number of eggs called for?
A. Material superiority—"The superiority of the United Nations in munitions and ships must be overwhelming."

Loyal Alumnus 4th 1941 Champion Steer

For the second successive year the Firestone Tire & Rubber Co. purchased the Grand Champion of the International Live Stock Exposition. Loyal Alumnus 4th was so judged on Dec. 2nd and two days later purchased by Firestone.

Loyal Alumnus 4th, a cross between a full blooded Angus on his sire's side and a full blooded Shorthorn on his dam's side, was calved on June 4th, 1940. He nursed his mother until 10 months old, after which he was taken off about six inches in size.

What Science Is Doing
UNIVERSE NOT EXPLODING
The world's largest telescope shows that the universe probably is not exploding but is a quiet, peaceful place and possibly just about as infinite in size.

The observations were made with the 100-inch telescope at Mt. Wilson, Calif., and reported to the American Association for the Advancement of Science recently by Dr. Edwin P. Hubble, the astronomer who for years has explored the remote parts of the universe.

In this space there appear to be about 100 million other Milky Ways, or nebulae, each a vast family of stars, gases and presumably comets and other familiar celestial objects.

These hundred million nebulae show two things: One, they are on the average uniformly distributed, about two million light-years apart, with near-regularity between them.

Two, the light of the most distant ones is dimmed in a peculiar way, called the red shift. This dimming could mean that they are receding, rushing away from earth, and if that is true, the farther away they are, the more rapidly they are receding. This speed of recession led astronomers a few years ago to

say the universe probably is exploding. But Dr. Hubble reported that the great telescope apparently sees it is not, the nebulae are not receding, on and on, virtually to infinity.

'Invasion' of Turkey
An "invasion" of Turkey by German troops "absent without leave" from convalescence centers in Bulgaria was reported by the BBC recently. The announcement said the Nazi soldiers "preferred desertion to being sent back to the Russian front" and were interned in Turkey.
