FOR these reasons the supply of Duro Pumping Systems will be considerably reduced this year.

We will supply our dealers with as many new Pumps as materials and manufacturing facilities will permit but if you already have a Duro Pump, we suggest that you ask your Duro dealer to check it over and replace worn parts, if required.

Make certain your pump is in first class running order to insure a continuance of the satisfactory Duro pumping service to which you have become accustomed. If you haven't running water in your home, your Duro dealer may be able to secure a Duro Pump for you, especially if it will

increase farm production and your efficiency. The Duro Special shown below pumps 250 gals. per hour and has 25 gal. galvanized tank. EMCO Quality Bathroom Fixtures and Fittings are still available in a good range of styles and prices. If you need new plumbing fixtures and fittings for bathroom, kitchen or laundry,
