TOUGH ONES, TOO "Do people laugh when you fall back riding in the summer?" "No, but the ice makes some funny cracks."

THAT'S what everyone has to do these days - manufacturers, dealers and consumers.

Because of the reduction of materials available for the manufacture of Duro Pumping Systems, our many dealers have been requested to place the few new Duro Pumps we can allot each one with prospective purchasers whose war-time farm production can be materially increased by having running water.

These dealers, because we cannot supply as many new Duro Pumps as they can sell, will be anxious to keep every Duro Pump in their territory in good running order, so that it will give maximum uninterrupted service.

The Duro dealer in your vicinity will be glad to service and replace worn parts in your Duro Pump. Have it checked now to insure a continuation of the satisfactory service to which you are accustomed.

The Duro Special shown opposite pumps 250 gallons per hour and has a 25 gallon galvanized tank.

ON THE FARM FRONT

BRIEF NOTES FOR THE BUSY FARMER - By Haldimand Harry - Haldimand producers of grass and clover seeds will be interested in a report which has recently come in to the effect that the alfalfa seed crop in the White Fox area of Northern Saskatchewan will be only a 50 per cent crop.

THE SEEDS HERE ON THE BRITISH ORIGIN include Red Clover, Alfalfa, Alsike and Timothy. The Crops, Seeds and Weeds in Branch suggests that farmers might do well to keep their best fields for seed purposes.
