Big Increase Seen In Canadian Navy

Canada's naval forces will be increased to 40,000 officers and ratings by the end of 1942, Navy Minister Macdonald said in an interview recently. He added that Canadian shipbuilding was progressing so favorably that the number of ships on active service would amount to nearly five hundred by the end of the year. When the war was declared, the Canadian Navy consisted of 1,700 men on active service and "about half a dozen ships."
