AN ALTERNATIVE SPEECH ON TEMPERANCE

On Wednesday, December 19th, the Prime Minister broadcast a speech on Temperance. Canadian Breweries Limited respectfully submits to the Prime Minister what it considers would have been a more suitable speech. It does so, not from any profit motive, since its profits are already controlled by the excess profits tax, but out of a desire to retain the public's respect for its industry and those engaged in it.

THE use of beer, wine and spirits has for long been a controversial I subject in Canada and from time to time your government is called upon to find a point of harmony between those who do not drink at all and would like all those beverages prohibited; and those who drink moderately and resent any interference with their liberty. If such a point of harmony could be found, and the whole subject put outside politics and religion; it would be a good thing for Canada's unity in wartime, and later, in peace.

It is important to decide whether or not this should be a moral issue or whether we should look upon drinking in the same light as eating and smoking. The evidence before me shows that many Canadians indulge moderately in beer and spirits. These consumers, as well as those who manufacture the beverages, resent the implication that they are not good

I think the issue becomes a moral one only at the point where individuals drink excessively and become a nuisance. All parties should be able to agree on this. Let us say therefore, that moderation is the ideal which all Canadians are eager to attain

The next thing to determine is whether or not ours is a temperate nation: I have every reason to believe that it is. I know that we consume less beer in Canada, per capita, than they do in Great Britain and the United States. This being so, the problem reduces itself to one of dealing with a few irresponsible people who give the advocates of prohibition a falsely dramatic impression of current conditions.

My attention is drawn to the increased sales of beer and spirits since the beginning of the war, but these increases are only at half the rate of the rise in the National income. Many workmen are now busy who before were idle and penniless.

Let me say at once, there's no question of any unwillingness on anyone's part to make sacrifices for the war, least of all among the brewers who have co-operated in every way possible and I am sure will continue to do so. But it should be pointed out here that fifty men can produce a million gallons of beer, and the basic raw materials necessary to supply the whoie of Canada's need of beer are available locally in abundance. Any curtailments that do become necessary we will make with precisely the same attitude and impartiality shown to other consumer goods. The one thing I always regret when restrictions are made is that moderate people are invariably the ones to be deprived.

There is a great deal of medical evidence to prove that a hard-working man who drinks beer moderately, not only nourishes his system, but relieves the nervous and physical strain of his busy day. No one will want to deprive him of this form of relaxation, nor to make its availability so difficult that a

worker on a night shift will have to resort to a bootlegger to get his drinks It is important that in this part of the British Empire we retain as high a reserve as possible of physical and nervous energy. We must encourage every form of wholesome relaxation to relieve the strain of war.

So far as the army is concerned I am certainly not going to put myself in the position of saying that a soldier who is old enough to fight and kill is too young to choose his refreshments with good judgment. Here again the reputations of many are spoiled by the few.

It has been suggested to me that I should ban liquor and beer advertising but how could I in fairness do that when we continue to permit other manufacturers, whose goods are rationed or in short supply, to maintain their advertising in order that they may keep their trade names before the public. Furthermore, no one will want me to banish English and American periodicals from Canada. Most of them carry advertisements for brands on

In conclusion let me say this: Everyone of us has his own ideas of what character our fast growing nation should develop. As our urban centres grow there are bound to be differences of opinion between people of some rural districts and those in the large cities of what civic rights shall be allowed to the people. Our laws must be so designed as to allow to each as much freedom of choice and self reliance as possible. Some sections of the population look askance on dancing, theatres, smoking, drinking and many types of literature.

Let us resolve therefore not to force the views of one section of the community on the other. When a reasonable self-reliant people have an unreasonable law imposed upon them they simply ignore that law with disastrous results to the legal institutions of the country. We learned this at bitter cost during prohibition years. The greatest friend of temperance would not want to greet our men's return from abroad with the evil spectacle

I am convinced we cannot force the principle of moderation but we can teach it. I appeal to all in this nation to be temperate in everything they do in order that we may exert the maximum impact on the enemy. In particular I appeal to brewers and distillers and those interested in true temperance to join forces and use every additional means at their disposal to spread the principle of moderation. I appeal to the provincial authorities to so frame the regulations for retail sale that the business will be conducted in the open and on the highest ethical standards and not driven underground and to the bootleggers. Surely this is an effort to which all parties can agree

Canadian Breweries Limited
