Canadian Soldiers Perform Miracles

-Brandon Sun.

Tribute to Canadian soldiers fighting in Italy was paid by a Reuters news agency correspondant writing about the progress of the British 8th Army near the mouth of the Trigo River. "Canadian forces operating on the 8th Army's left flank have particularly distinguished themselves," the British correspondent wrote. "Canadian infantrymen have been performing miracles in the heart of the Apennines

where tanks cannot operate."

OTTAWA REPORTS That Returns to the Farmer Per Unit Will Be Higher In Fifth Year of War Than in Any Other

This statement was made by the Minister of Agriculture, Hon. James G. Gardiner, when he re-viewed Canada's food situation before members of the Chamber f Commerce on October 28. He also stated that with ceiling con-trols operating, costs to the con-sumers should not be higher in

In a brief but comprehensive survey of food production, export and consumption, Mr. Gardiner said that farmers were being ask-ed to make whatever changes are necessary to obtain the highest net returns in exportable goods under all the conditions which

An appeal is being made for the same production in 1944 as in 1943 and it is expected that it will be forthcoming although it is believed there will be some shift from one product to an-

there will be a drop in the tonnage of pork and possibly dairy operation from all, but it is hoped that there will be some net in-crease in beef, poultry and grains The latter, of course, depends almost entirely on weather con-

ditions. Looking at the facts on Can-ada's food production during 1942, there is ample justification for Mr. Gardiner's remark that he doubted if any nation in the world could show a better record "After meeting all Canadian requirements, after supplying the contracted requirements of our Allies to the beginning of 1942, during 1942 we exceeded every preceding year. We actually did send over 40% more food or potential food to our Allies during that year than during the last year before the war and had at the end of the year 18,500,900 tons of food or potential food radio, there is Air Vice-Marshal Arthur Coningham, commander of the Northwest Africa Tactical which can be shipped at any time," said Mr. Garliner. "We had almost two and one-half Air Force.-Montreal Gazette.

times as many tons in reserve as we have shipped in any one year during the war. Then with all this food lying about we have so regulated our own appetites to consume only 6.5% more food in 1942 than in 1938." HORIZONTAL Speaking of the future M Gardiner said that in 1943 suffipresident of the U.S.A.

cient grain was produced to take care of 1943-44 requirements if properly distributed. Sufficient is in store to take care of at least two years' probable shipments both for direct human consump-tion and for the feeding of livestock. So that with two more crops to come and barring a crop failure, there should be enough to supply any demands equal t those which have been made o us in the past, for three more

The Agriculture Minister stated also that experiences of the past four years suggest that, unless weather, equipment and labor are in much more favorable sup-ply in the future than in 1943, Canada had reached her peak of

It's A Small World And Getting Smaller

No more effective testimon; concerning the development of the safety factor in trans-Atlantic flying could be desired than the report of the British Air Ministry covering the year ending September 30.

During that period, the report says, the percentage of losses of aircraft making the North Atlantic crossing was less than one-half of one per cent. These figures include crossings both ways by military planes of both the United States and Britain and by the British Overseas Airways Corporation with civilian traffic. The figures are all the more impressive when it is recalled that as recently as 15 or 16 years ago flying the Atlantic was an

speakers" which Allied soldiers presented to an American Signal Corps outfit were just a little too

powerful.

The Signal Corps hastened to

make a present of them to the Ordnance Department — when it was discovered the oval-shaped objects were land mines—which only by chance failed to explode. German radio equipment was reported to be five years behind our own in design. Captured equipment in Africa showed German radios were not built for use under conditions in that theater. under conditions in that theater, lacking both water-proofing and

British Soldiers To Wear Berets

A new beret type of cap has been approved for the British Army and will replace the field wearing berets, Sir James Grigg, Secretary of State for War, told the House of Commons recently. Maj. Maurice Petherick, Con servative Member of Commons, pressed for the replacement as soon as possible, complaining that the present caps are "not practicable, extremely ugly and often worn on the back of the head pushing down one ear."
