#### THE LAND OF THE FREE\_

THE KING Government is going to be un justly criticised by the time this war ends, and the prime factor is going to be due to the necessary unending controls brought about be-

It is only natural that Canadians should revolt against bureaucracy even in its mildest form, because did our forbears not suffer deep privations and hardships to regain once again this lost privilege? Under a system of socialistic reform, there must of necessity be control. It is difficult to imagine the rank and file of the Canadian people subjecting themselves to this situation, despite how dissatisfied they may be with the meanderings of the old line parties.

If we are to retain the essential principles of freedom, it would appear time for Liberals and Conservatives to get down to earth and realize that the primary aims of both parties are not as diffused as some of the Politicians would make us think.

#### v v v v BETTER RURAL HOUSING

NEARLY EVERY MAN who has made definite contribution to the National Welfare had his start in the rural sections. As a consequence, they should have an appreciation of conditions in which the great majority of ruralites live from the time of birth until the grim reaper claims his reward.

Granted there are many fine farm homes at the same time the majority are deficient in those facilities, which the city wife considers essential. They lack the most primitive plumbing facilities and running water. And a time saving modern kitchen is a rarity in the country.

The average farm woman works doubly as hard and for longer hours than any city housewife, and for that reason if for no other, she is entitled to every convenience contrived through invention from the human mind. Cash returns to the average farmer, have not been such to permit the adoption of these conditions themselves, and it is therefore a duty of the government to take steps to encourage the raising of living standards in farm homes. The farmers have been fighting this war on a second front in producing amazing quantities of foodstuffs. In the post war period the farm production army should have some consideration for his future living just as the soldier is being given consideration for his rehabilitation.

#### v v v v THE MYSTERY OF THE ATOM—

#### - By Lewis Milligan -

THE ATOM has always been an object of curiosity ever since man began to study the composition of the Universe. The atomic idea goes back some 2,500 years to Democritus, and up to comparatively recent times the atom has been regarded as the minutest particle of matter solid, inert, and indestructible. Since the beginning of the twentieth century, however, there has been tremendous development in knowledge of the nature and composition of atoms.

Modern science has discovered that the atom is not matter at all, in the common understanding of that term, and that it is certainly not an inert or dead thing. The atom is now revealed to us as a highly-charged battery from which we produce all our electricity. We are told that the atom is composed of electrons, neutrons and protons, and that these form an infinitely minute and dynamic system. The electrons are said to revolve around a central core, like planets around the sun. These electrons revolve so fast that they are invisible, and their presence is only indicated by the misty trail of those that escape from the atom by radiation.

But what has all this got to do with you and me? What difference does it make to your life and mine or to society and the world at large to know the nature and composition of the We could, of course, get along very well without this knowledge, but modern scientific inventions which form so important a part of our industrial, social and domestic life, have been implemented and in some instances arose out of the investigation of the atom.

Apart from all that, however, this knowledge of the atom has opened up to us a fuller and deeper knowledge of ourselves, and it has confirmed many of the truths of what we call "revealed religion" and the intuitions of philosophers down through the ages. St. Paul declared that "The things which are seen are temporal; but the things which are not seen are eternal." There were no microscopes in St. Paul's day, and even today with the most powerful microscope the atom cannot be said to be entirely visible, for no one has seen the inside of an atom. What goes on inside an atom is inferred from its actions under certain conditions, and interpreted by mathematical deductions. From this it is interesting to know that Canada and UNRRA might even be asserted that there is no such to a cost of \$6,000,000.

masses of electricity or mental conceptions. Hume and Berkley, the British philosophers, held the theory that atoms were composed of sense elements or "mind stuff." Christian
Science is based upon the same theory — that
matter has no aviscence based the same theory — that matter has no existence, but that all is Mind.

After listening to a sermon in support of the theory that there was no such thing as matter,

Dr Samuel Lebracon within the country's paid out \$124. — just the difference Dr. Samuel Johnson, walking home with a friend between the \$324. exemption and the kicked a large stone and said, "I refute that \$200 taxes father didn't have to pay.

But matter is a very real thing, no matter what theory we may devise of its presence or of the company devise of its presence or of per year on that \$192 and the heirthe composition of the atom. One of the great archy of the bureaucracy, its arm facts that the investigation of the atom has revealed is stated by Sir James Jeans in his recent book on Modern Physics when he are "All dollars. An emotional country ha book on Modern Physics, when he says: "All given a cash grant to every chil action and change come from within, in the central substance of the atom, and are unpredictions and the parent that substance of the atom, and are unpredictions are thing for pathing. Father on the That is not a new truth, for it is the central teaching of Christianity, and science has merely confirmed it. "Out of the heart are the issues of life." "The kingdom of heaven is within you," and it might be added of hell also

within you," and, it might be added, of hell also. to what his employer is saying — about these new accounts. As the material world is made up of atoms, in tax deductions at source society is made up of individuals, and all action printable. and change come from within, in the central soul f man, and cannot be predicted. The new there this scheme has been theory of the atom has led scientists to discard the old theory of a "mechanical universe." And it dismisses the socialist theory of mechanizing t dismisses the socialist theory of mechanizing men or society in general. The old doctrine of and hitherto free-will remains. Because men are free and And must have freedom, they can never be made to match grants by exemple the match grants by exemple match fit permanently into any mechanical system of ociety. All action and change come from within, and cannot be certainly planned or predicted.

### WIDER FIELDS OPEN TO RED CROSS— tion and he has \$8.

MANY RED CROSS Branch workrooms, in shuffle f Ontario, are continuing to operate throughout most of the summer months. With the doesn't see it. news of the Allied successes in Normandy and say a chilled supervisor, slaving over Italy, Red Cross women realize that wider fields than ever have opened.

520 articles, including 194,403 items of knitted comforts for Navy, Army, Air Force, and Women's Auxiliaries; 205,814 Hospital supplies; 1,- an out-again, in-again Harrig 556,239 surgical dressings, and 299,064 civilian when omforts, were shipped from the Richmond St. Warehouse in Toronto. In cash, the material which went into the making of these articles totalled \$239,198.21; their actual value cannot be "Won't Stay Put" computed in money, considering the high quality of workmanship, the voluntary service, and the long hours devoted to these tasks.

#### V V V V PLANNING, to be successful, means plan-

POST-WAR PARKING

AT THE START of the war when motor traffic was at its peak 1,200,000 passenger cars and nearly 250,000 trucks and buses plied Canada's streets and highways. After the war, when tire and gasoline rationing has gone by the board, it is safe to assume there will be a tremendous increase in the number of motor vehicles in the Dominion.

All of which means that the parking problem will have to be tackled afresh. In cities and towns across the country this question has town planning experts alike.

Who was sheets and stencils and cheque and the income familiar concents and cards and pay sheets and stencils and cheque and the income famile and changed, and the income famile occurs and leading and all! And then in October, along comes Baby. Now Baby would have meant simply \$108, deduction in taxes. But now he means only \$5. a month income for the next three months, but that's slip, in deductions also! The family exemption goes down. And so the average family had had four permutations in the year — \$16. for 4 months until Junior's birthday and it was \$17. for 2 months: then came Betty's birthday and it was \$18. for 3 months, until Baby came when it is \$23, for the next three family records and towns across the country this question has four permutations in the year — \$16. Sid Mr. Brooke Claxton. Deputy to the Prime Minister in his speech aring single financial and economic measure ever put forward in a demontary of the greatest and most measure ever put forward in a demontary of the greatest and most measure ever put forward in a demontary of the greatest and most measure ever put forward in a demontary in the year and the family records and cheques have turned handsprings four times in the year and the family allowances on a collection state in the parking probability of the prime state in the parking of the greatest and most and the family records and files and accounts and the family records and fellow in the parking of the greatest and most and the income tax deductions and all! And the intence the
