The Lord was concerned about His disciples who were to carry on His great work, and in this prayer Jesus tells God the Father that the disciples are not of this world even as He Himself was not of the world. He says they were sent into the world as the Father had sent Him into the world. They were sent into the world to be were sent into the world to be His representatives and messen-gers. "The glory Thou gavest me I have given them." These words were probably spoken in anticipation of the day of His second coming, when His children will be glorified together with Him.

Using the body as an illustration typical of the church, Paul points typical of the church, Paul points out that, as many members such as legs and arms are important for the human body, so are believers of many capacities essential for the successful operation of the Church of Christ. Weather in Canada is often a topic of conversation—we like it, or dislike it, as it affects our work or pleasure. It is very rarely we are constrained to think of it in terms of safety or personal hardship. If the winds blow or a deluge falls we possibly look through the window and say "Isn't that an awful storm?"—and we stay under cover until it is over. There are no spaces in our homes where windows should be; no gaping holes in the roof over our heads . . . and yet how seldom we realize how fortunate we in this country have been, and how much we owe to our boys who "go down to the sea in ships". I was thinking that a little while ago as I packed two extra ditty bags that were donated by the members of our Institute. It seems such a little thing to do. "That is just what I do for my boy who is overseas." Well, of course you do, why wouldn't you? He is your own flesh and blood, isn't he? And I am sure you get a lot of satisfaction in doing it. But a ditty bag for a stranger— that's something else again. But those sailor boys have friends and sailor yet who had too many par-

winter hasn't come to stay, thas we are a lot nearer being ready for it than we were a week ago. The tractor has gone to its home in the driving shed until spring shall come again. And that is really something. We began to think the fall ploughing would never get done with the ground so dry as it has been. Certainly it wouldn't have been done had we been obliged to depend on the horses. Weather conditions are different in England. We had a letter yesterday which said — "It is such a wet, miserable autumn—so dreadful for the bombed-out people in London". It also added—"G——is getting fly-bombs now".
