BEHIND THE GREAT NEWS-

WITH SUCH MOMENTOUS NEWS as the "Official End" of Great War II, it is understandable that citizens everywhere will give vent to a feeling of immense relief that the slaughter of human lives will no longer continue. But it should be remembered that the voiciferous rejoicing will not be done by those who have paid a part of the real cost of this war through the loss of their loved ones.

There are thousands of homes in Canada today sheltering bereaved parents and wives, brothers and sisters who were not among the crowds jamming the thoroughfares of the Villages, Towns and Cities throughout the land when the official Peace news came through. They are a minority of course, but we strongly feel that boisterousness is an inadequate mean of portraying appreciation of just what this war has meant to humanity. Mothers and fathers and wives with sons or daughters or husbands in the war zones will understandably forget all else but that their loved ones are safe and God willing, will return to them soon again. But there are thousands who have paid more dearly -there will be no home coming and the cessation of hostilities only makes this fact more impressionable to them.

These people who have contributed so much to the winning of a Peace that must be permanent this time, should have the grateful appreciation of their neighbours and friends and that surely is the thought that should be foremost in our minds when we contemplate the real meaning of the final surrender of our foes.

Winston Churchill offered the people of the Empire only "Blood, Sweat and Tears"-The Sweat has hurt none of us, but the Blood and tears have left an idelible mark in the hearts of many of our citizens. We should consider their feelings with deep reverence.

WEBSTER FALLS-

THERE IS A LITTLE SPOT just out of Dundas, Onario, known as Webster Falls. It is a beautiful little park through which a spring stream runs and which drops over a sharp precipice on what we know as the Hamilton Mountain. There are no refreshment booths or carnival concessions. Signs dot the place which read, "Enjoy-But do not Destroy". The entire park resembles a beautiful lawn. It is open to the public and no charge is made for

We understand that provision was made for the perpetual upkeep of Webster Fall's Park, by a gentleman of that name who realized the value of such a place for those who enjoy nice clean surroundings when they have a day they can spend away from their normal labours.

We often see in cemeterys high tombstones erected in the memory of the mortal remains of some one below, but we seldom see a "Webster's Falls Park". The late Mr. Webster not only erected a monument to himself, but he has been responsible in bringing pleasure to thousands who have enjoyed the beauty of the park. VVVV

ATOMIC BOMB AND WORLD PEACE-

- By Lewis Milligan -

SOME MONTHS AGO I wrote an article on "The Mystery of the Atom" and a lady friend in England who read the article in The British Weekly, wrote me about it. She confessed that it was beyond her comprehension, that she didn't know what I was talking about, and she doubted if I knew myself. The latter was, of course, implied in the title of the article, for the atom was and still remains a mystery, in spite of the revelation of the atomic bomb.

Mystery stories are very popular these days but the mystery is always unravelled in the last chapter. The mysteries of science, however, are never cleared up, for every advance in scien tific knowledge leads to even greater mysteries. The explanation is that the mind of man cannot and was never intended to comprehend the ultimate. Infinity baffles us. The infinite small as well as the infinite large, the atom and the universes of space, are beyond our mental grasp. As the poet Keats says in another connection, the atom "teases us out of thought as doth eternity".

The one thing that the atomic bomb has revealed and demonstrated is that the atom is in itself a bomb in which enormous physical force is concentrated, and the scientists have devised a means of releasing this force. Sir Oliver Lodge many years ago foresaw this when he wrote: "If ever the human race gets hold of the means of tapping even a small fraction of the energy concentrated in the atoms of their own planet the consequences will be beneficent or destructive, according to the state of civiliza-tion". Unfortunately, the first demonstration of this concentrated force has been in the way

mankind with yet another engine of destruc tion and wholesale slaughter, or whether it will scare the human race into sanity, if only for self Tennyson wrote, "Let knowledge grow from more to more, but more of reverence in us dwell". Great poets are the true seers, and we would do well to listen to Science without reverence is destructive. This modern tree of knowledge, like that of the Garden of Eden, may work for man a fall

worse than the first. But this new knowledge has possibilities for good as well as evil, and it is for man as a free-will agent to choose which it will be. The langer is that man may become the slave and finally the victim of his inventions. The product of his ingenuity, like the Frankenstein monster, may turn and destroy its creator. As Sir Oliver Lodge indicated, only a higher standard of civilization, of spiritual and moral values and that on a universal scale, can save mankind from self-destruction. If the atomic bomb had come into the hands of the Cermans and the Japanese before the war, the people of Britain and of most of Russia would have been wiped off the face of the earth; and the Japanese would not have stopped at Pearl Harbor.

Unless the war demon can be cast out of the mind and heart of Germany and Japan with in the next generation, it will at some future time assert itself and use this new weapon a gainst humanity. When Iesus had cast out the evil spirit from a maniac, his disciples asked Him how they might do it, and He replied: "This kind goeth not out except by prayer and fasting" That there are evil spirits has been fully demonstrated before and during this war, and the atomic bomb can not blast them out,

although it may quieten them for a time.

There must be spiritual and moral regeneration, and that can only be brought about by a conviction of sin, repentence, and faith in the Fatherhood of God and the brotherhood of man faith in the atomic bomb to bring lasting peace to the world, for it might well eventually lead to more terrible wars.

Canadian farm women are handicapped at every turn in their struggle to keep their families and homes clean.

They lack properly equipped bathroom, toilet and laundry facilities and place three-piece bathrooms, bathus, built-in laundry tubs and washing machines high on the list of things they would most like to have.

Washing machines are in better supply. Almost seven-tenths of city and town families have them and a slightly greater number in village.

Farms lead with 76 per cent, though naturally the scarcity of electric power results in a much high er proportion of hand operated management.

WHAT IS YOUR ATTITUDE TO MEAT RATIONING ?-

living in a democracy is the right to disagree with what goes on and to say so in a loud voice. At the same time, one of the responsibilities of living in a democracy is to accept, each man to his share, the burdens of the nation until circumstances improve. Take rationing, for instance. No one likes to have to put unit of the property of the right sand other housing authorities as developed.

Key to household cleaning problem, the survey indicates, lies in providing more running water and every five without one. Even at that rate wringers are more plentiful on farms than in villages or cities where they are absent from home in every four.

Rev. W. D. Bauer, Passed where they are absent from home in every four.

Nearly all women have irons, and the number of electric from its requirement.

The right to disversely the right without one. Even at that rate wringers are more plentiful on farms than in villages or cities where they are absent from home in every four.

Nearly all women have irons, and the number of electric from its right without one.

The right to disversely the viction of the right without one. Even at that rate wringers are more plentiful on farms than in villages or cities where they are absent from home in every four.

Nearly all women have irons, and the right without one.

The right to disvince the right without one.

The variable of the right without one.

The vari for instance. No one likes to have to put up for instance. No one likes to have to put up with the fuss of ration books and with the necessity of going short on meat or butter or sugar

Out acres of less.

I canadian is in ratio to the availability of less to the savailability of less to the essity of going short on meat or butter or sugar Farmers don't like to be told they can't slaughter their cattle and sell meat when and where

Shortage is the report that nearly half the village homes and three-quarters of the farm homes are with on farms have to do their ironing on

going to be pushed around, if they think they're ing to control me, I just won't raise hogs or in cattle". Nations have more to do than just sit down and see how they can annoy people the most......no, there are simple easily-understood most......no, there are simple easily-understood reasons behind such a present necessity as meat rationing and before we go any further let's look at them and then make up our minds what our attitude should be.

In the first place, let us admit outright that there is a goodly quantity of meat in this country at the present time. True, our hop population has dropped alarmingly against last year's production. Definitely there are certain fields.

production. Definitely there are cattle in fields and in stockyards. But there certainly aren't SUNSHINE VALLEY enough cattle to keep Europe from starving, or

timate means of directing the amount of meat to go abroad and the amount Canadians are to get, with each citizen receiving an equal share.
Without slaughter permits, animals can be slauhidden away in a nest of hills—exclu ghtered and disposed of all over the country, sive to only that few who take the trouble to get off the beaten path. meat and some practically none. So slaughter permits are the first step and individual rationary the second. That way everyone including ing the second. That way everyone including out more strongly than any prev the hungry European, gets meat. What was day this year.

permits are the first step and individual rationing the second. That way everyone included in the second. That way everyone include hungry European, gets meat. What was happening prior to the rationing plan was the same less meat was going through federally-inspected plants. It was just disappearing in country areas without any chance of much of it going overseas.

Thus our attitude to meat rationing must take these factors into consideration. Meat is rationed to provide fair distribution to all and the same results. Moreover there is a consideration that should make us think twice assert. No other system yet devised would give a sater. No other system yet devised would give a sater. No other system yet devised would give a sater to the empty pool. So this is Sunsitive to the same results. Moreover there is a consideration that should make us think twice as bout our responsibilities to Great Britain and Europe. If we do not help them in their direct including the same of the entry of the entry of the same of the entry of the entry of the same of the entry of the ent

der, dynamite and TNT, all of which have added to the horrors of war.

The question arises as to whether the discovery of the atomic bomb will merely provide

ton or Toronto. The price is the cottage at Kincardine. these were available ton or Toronto. The price is the same as formerly.

V V V

These are a modified form of beam scale with a weighing capacity of 250 pounds net. Plans are also available for building a light crate for use with the scale. With a scale like this there is no need for a farmer to market his hogs at other than the correct weights. Furthermore the extra premium on seven more the extra premium on seven A's over B 1's will more than pay for the scale.

V V

Complete hog marketing figures for June are now in and they show Welland as leading the province with 53.62 per cent A's. However Welsiand County marketed only 138 hogs

cottage at Kincardine.

Mrs. Evelyn Franks and her two daughters, Audrey and Gwen, have returned to town after spending six weeks at Lake Scugog.

Rev. H. W. Percy, of Norwich was the supply minister at Knox Presbyterian Church, during the absence of Rev. W. H. Fuller while on vacation.

Mr. and Mrs. Nathan R. Pond are visiting his brothers and sisters in the Canadian West; Charles Pond, of Winnipeg; Ernest Pond and Mrs. John Blake of Saskatoon.

Mr. Cameron Saunders, son of Mrs. W. J. Saunders, of Jarvis, underwent an operation at the Hamilton Gener-

Welland as leading the province with \$3.62 per cent \$\mathbb{A}'s\$. However Welland County marketed only 138 hogs of which 74 were in top grade. Of the remaining counties Haldimand is in the lead with a comfortable margin. This should in no way make us feel good and rest on our oars. We still can improve very greatly both in quality and quantity.

The standing of the first ten counties (not including Welland) is as follows: Haldimand, 47.37 per cent; Wentworth, 44.85 per cent; Peterborough 44.84 per cent; Lanark, 43. 55 per cent; Bruce \$3.39 per cent; Brant 43.19 per cent; Lincoln, 43.10 ger cent; Waterloo 41.67 per cent; Halton 41. 62 per cent.

We be the deficiency?

W. J. Saunders, of Jarvis, underwent an operation at the Hamilton Genericant in the Hamilton in the Hamilton in the Lead with the Authority of the Scholar in the Hamilton in the Hamilton in the Hamilton In the Hamilton in the Hamilton

Waterloo 41.67 per cent; Halton 41.
Waterloo 41.67 per cent; Halton 41.
Waterloo 41.67 per cent; Halton 41.
V V V

There is need for many more hogs to be raised on our Haldimand farms and a question that can very rightly be asked is "Why do we not have more pigs?" Is it a matter of labour, or feed or price. It is very seriously doubted if hog prices is the limiting factor. With pigs selling at present rates the ratio between at present rates the ratio between feed costs and selling price should be satisfactory if a balanced ration is being used and all other factors equal. This is something that needs a good deal of thought.

The common house fly has been to what your soil needs.

V V V

By the way have you mailed your entry for the 50 Bushel Fail Wheat Club? Time is going and the seed supply is limited. Don't delay if you intend joining the club.

Steel roofing has been taken off the permit list. In other words no permit is now required to purchase this important farm building material. As a matter of fact steel is still in short supply and difficulty may still be experienced in securing roofing of this sort. The common house fly has be

a good deal of thought.

Ninety million dozen eggs are des tined for the British market this year. Haldimand producers will that market. The question is are we ready to do our part in getting every possible egg so we can participate in the increase in export price which becomes effective on price which becomes effective on pullets as we had last year? If not pullets as we had last year? If not have we kept over enough yearling the common house fly has been accused of carrying many diseases and now a new one has been added.
