A. L. MILLER, Editor

REV. M. E. SIPLE

THE PASSING of Rev. M. E. Siple last week removed from this sphere a gentleman possessing the highest attributes of mankind.

A GREAT RECORD

IN ANOTHER COLUMN will be found the figures showing Haldimand's Record in Victory Loan buying in the past time loans.

The record shows that Haldimand raised more money per capita in the ninth loan than any other unit in the Province, and there is reason to believe this includes the entire Dominion of Canada.

Yes, Haldimand is made up of solid folk, and the twenty million dollars the citizens have invested in the best investment in the world, will eventually come back to them with interest to further strengthen the foundations that have made this great result possible.

The National Film Board has produced a full-length film "This is Canada" for international distribution to tell Canada's story to other countries.

PRICE MUST BE PAID

IT IS NOT for us to speak lightly of the efforts of Dorothy Dix as a columnist, but we confess that generally we miss her articles with the feeling that advice to the lovelorn is only comforting after you have reached the benedict stage.

Her column on Tuesday however, somehow caught our eye, and that venerable lady surely passed out some truths in her effort on that day.

She points out a reality, which so far as we can observe, has not had the attention it should have and must have, if we are ever going to emerge a contented, peace-loving people.

She points out this truth: "One of the hardest lessons that we have to learn is that for every good thing that we get we have to pay. Life runs on no bargain sales. It puts a price on everything worth having. We can take it, or leave it, but the terms will never be changed.

We will get no cut rates. No bonuses will be thrown in. We will get just what we paid for. No more. No less. The trouble with half of the people in the world is that they refuse to accept this hard and bitter fact. They are always trying to get something for nothing, and it can't be done. They want the latest wreaths and the big jobs and the fortunes handed out to them free, and when it isn't done they beat on their breasts and bewail their bad luck and rail against the injustice of fate.

It is for us to speak lightly of the efforts of Dorothy Dix as a columnist, but we confess that generally we miss her articles with the feeling that advice to the lovelorn is only comforting after you have reached the benedict stage.

Thousands of Canadian soldiers in the Netherlands are sending home tulip bulbs. To face the demand, the Canadian Army Post Office had to establish a special branch for bulbs mailing.

MANY AIRMEN who trained under the British Commonwealth Air Training Plan formed permanent ties with Canada. More than 3,750 members of the RAF, the RAAF, the RZNAF and allied nationals under RAF quota married Canadian girls.

THE STRIKE A SELF-DESTROYING WEAPON

By Lewis Milligan

TRADE UNIONS have served a noble purpose in securing economic justice for the workers they have represented. Their original motto "Union is Strength," is sufficiently demonstrated in the great united strength of labor unions of the present day.

But having won the war and secured full recognition, many of the union leaders still go on fighting and using the old weapon of the strike. It seems that they still regard industrialists and employers generally as the "enemy" of all working people, if not of society at large.

"Louder and stiller come the demands of unionists whose wartime opulence, achieved at the workers' expense, approaches early deflation. Before they go down like deflated balloons, these parasites on industry and honest toil have decided to show that they have still another trick or two up their sleeves.

The Review goes on to say that "for sheer gall there is nothing to approach this proposal of lay-off pay for war workers who have been making high wages for years past." The editorial points out that the average pay in aircraft and motor vehicle industries has been not less than \$200 a month, and it adds: "A country which pays its discharged private soldiers about \$90 a month while they find themselves jobs is most unlikely to pay sheltered workers \$200 a month.

In the Dalhousie Review for July last there is an article entitled "Is Organized Industry Self-Destructing?" in which the author, Agnes M. Dennis takes a very pessimistic view of the labor movement. She says: "A too 'victorious' Union leads logically to the destruction of Capitalism and the defeat of its own ends.

First and foremost the fertilizer should be stored in a dry building. The bags should be placed close together to reduce circulation of air, and thus reduce the opportunity of water moisture being picked up. Newer place the bags on an earthen floor.

Now that fall plowing is well advanced on most farms, how about giving consideration to an application of lime to the field this season. There is no doubt but that most Haldimand soils would benefit by a liberal coating of agricultural lime.

Another thought is that plenty of lime in the soil will help to keep plants from heating and winter killing. This is not because lime takes the place of good drainage but rather because plants having access to a plentiful supply of lime will have strong healthy roots producing a strong vigorous plant, which will stand a lot more freezing and thawing than weak plants will.

Clean milk should be our aim at all times and it is much easier to produce clean milk in a clean well lighted and ventilated barn. Require whitewashing will aid in keeping the mind alert. Other items to keep in mind are a light waterproof floor and a light water proof floor.

A good ration is so important in the stable feeding of the dairy herd. The following is a very simple one containing 15 to 17 per cent protein and is suitable for feeding with good alfalfa, or red clover, hay with or without silage. Oats 500 lbs.; Barley 200 lbs.; Wheat 150 lbs.; Linseed Oil Meal 150 lbs.; total, 1000 lbs.

When mixed or timothy hay is used a mixture containing 17 to 15 per cent protein should be used. The reducing of wheat to 100 lbs., and

Pen, Scissors and Junior Jottings

Voice over the radio—"Either there will be babies or the world will never again hear the laughing and the voices of little children. How enlightening!

The WPTB must anticipate some hangovers on Christmas and New Years because the "Food Bulletin" announces that it is expected that meat consumption will be high on the two holidays even if it is permitted.

After 70 days Union and Company officials have got their feet under the same table to discuss the Ford Strike issue. They better get the strike settled pretty soon or the headline writers on the Daily News-papers will still be talking about it.

A newspaper heading says, "Bette Davis to marry her mamma as well." After trying two or three husbands she may be some merit in including mamma in the next ceremony. Maybe this all that was lacking in the matrimonial life of the husband didn't lie mamma around unofficially.

The City of Toronto is making application to the Minister of Munitions for a supply for compensation because of damage done the Lake Shore Blvd. by heavy army trucks during the war.

The Junior Banquet which is to be held at the Parish Hall at Pictouville on Friday, November 30, will be a very important occasion this year.

The speaker for this Banquet is Mr. C. D. Graham, head of the Agricultural Representative Branch of the Ontario Department of Agriculture.

Now is the time to make plans for a Boys and Girls Club in your district next year. Each club must be made up of at least ten members with not more than two members from anyone family.

It is not unlikely that many Haldimand farmers have purchased fertilizer for sowing with fall wheat and then never got it sowed. So a word about the care of fertilizer. It should not go amiss at this time. Too frequently fertilizer is improperly stored resulting in a loss and disappointment to the farmer.

The Fireside Club held their November meeting at the home of Mrs. Thelma Robinson on Thursday last. The President opened the meeting and Mary Marr conducted an inspiring worship service in keeping with Armistice Day.

The December meeting will be at Joan Butt's home with K. Montgomery, M. More and M. Johnston helping. There is still room for a given price. This definitely proves that the Danes are out to capture the British market if at all possible and are willing to put up a stiff fight for it.

An advertisement in a recent issue of a Toronto newspaper refers to the delivery of certain food parcels from Denmark to the British Isles for a given price. This definitely proves that the Danes are out to capture the British market if at all possible and are willing to put up a stiff fight for it.

What are we in Haldimand County doing about it? In fact by producing quality. There is still room for improvement. Before the war Denmark was shipping 98 per cent of her bacon to Britain with the weight and degree of fat desired by the British. Less than 50 per cent of our hogs join this class. This is a producer's problem and we should be doing something about it.
