A GOOD FARMER IS A GOOD PLANNER

It's the man who looks ahead who gets ahead.

GOOD management . . . essential to successful farming, as to any business enterprise . . . is largely a matter of timely marketing and careful spending . . . waiting for the time when it is most favourable to buy.

We all want things now . . . things we have not been able to get for the past several years. Some of these things are necessities . . . some are things that will contribute to our comforts and pleasures.

Eventually, these things will be more plentiful. By waiting a little longer we will help to keep prices of things we need at lower levels and we will buy at better advantage when we do buy.

Meantime we can invest our savings in the safest securities obtainable . . . Victory Bonds. More Victory Bonds will be offered this Fall. They pay 3% interest . . . double bank interest . . . and they are "liquid capital".

If we need cash in an emergency any bank will buy Victory Bonds at any time. And any bank will loan money on Victory Bonds.

The Ninth Victory Loan will be our last opportunity to buy Victory Bonds for a whole year, so buy double this time—the same rate of savings as in previous loans will pay for twice as many bonds over the 12 month period.

FARMERS CAN BUY VICTORY BONDS ON CONVENIENT DEFERRED PAYMENTS THROUGH ANY BANK

... just sign a short form letter which Victory Loan Salesmen carry (banks have copies) ordering the bank to buy Victory Bonds for you. Pay 5% when ordering and the balance at any time during the next 12 months. The interest the bonds earn pays the interest on the bank loan.

LOSE EVERY TIME

It is the hereditary curse resting upon town authorities that they are criticised for the work that is left undone and criticised just as vigorously for what they do and how they do it. Thus it has always been and always will be.

—Cochrane (Ont.) N. H. Northland Post

Shipshaw, one of the biggest power projects in the world was built in record time during 1942 and 1943. It was a closely guarded secret.

TRIPLE THREAT

Pert actress June Whitley has always managed to have roles with a suggestion of menace. She has played in Hollywood in "Suspense" and Orson Welles' "Mercury Theatre". Now she is in Vancouver playing "Triple Threat" over mid-east stations of the CBC Trans-Canada network, Fridays, at 11:30 P.M.

POOH-POOH PSYCHOLOGY
Fads and fancies of the child psychologists are pooh-poohed by most commonplace folk. While reconciled to the modern findings in hygiene and nutrition and noted enthusiastically about them, few parents give serious heed to the more radical theories of behaviorism.

thing over which nobody in this country has any particular control. I shall leave it to parliament itself to decide. But I do say that even with the prices that prevail, the farmer has not yet had a fair share of the national income. That is true because after price ceilings were set up the government found it was impossible for the farmers to carry on in that way, and they introduced a system of subsidies on different kinds of farm products. I think that in the year 1944 those subsidies amounted to over a hundred million dollars.

Mr. GARDINER: That is just the direct subsidies.

Mr. SENN: Yes; there were others as well. Some were paid by the Department of Agriculture and some by the Commodity Prices Stabilization Corporation, and perhaps some in other ways as well. I have not yet been able to find out how the division lies, and I should like to have that information. What lines of subsidies are being paid by the Department of Agriculture, and what lines are being paid by the Commodity Prices Stabilization Corporation?

Mr. GARDINER: Would the hon. member like an answer now? He would take only a minute. The division is that wherever it is intended to increase production it is done in our department wherever it is intended to cut down the cost of production, it is done in the other department.

Mr. SENN: I thank the minister for the explanation, but it seems to me in some cases both principles would apply. Perhaps the division has been made in a way that is suitable to the Minister of Agriculture, if not to both ministers.

The second reason why farmers have enjoyed a modicum of prosperity is that wherever it is intended to cut down the cost of production, it is done in the other department. The hon. member who has just taken his seat (Mr. Townley-Smith) gave a reason or two for that. The first is that undoubtedly during the war, prices have gone up. Whether the government is going to take credit for that or whether it is due to some-
