A definite "yes" is Firestone's answer to the second question. Wilbur Shaw, the famous race driver, proved it when he drove Firestone tires 500 miles at an average speed of 10931 miles per hour over the Indianapolis Speedway—equal to 50,000 miles of ordinary driving. inary driving.

WHEN you can buy new tire depends largely on UNNRA demands and rationing authorities. But you can be sure that once Firestone is given the go-ahead signal our full production will be devoted to your needs. In the meantime, your nearby Firestone Dealer will gladly do everything he can to heip make your tires last. See him today.

Here's the way it is when food comes at last to famished countries of Europe. The children in this picture are being given soup with meat in it in a creche in France. Particularly is Europe short of meat. Belgium has lost two-thirds of her cattle; Greece all her cattle; these are typical examples.

CHRONICLES

weeks since he went away so I need hardly tell you how glad we are to have him back with us once more. I am sure many of you have been through a similar experience and know exactly what I mean. You know what it means to live a divided life as it were — with your thoughts in one place and your thoughts in one piace and your work in another, getting done such jobs as you can between trips to the hospital, nad after each trip sometimes coming away hopeful and other times downhearted.

Yes, Partner is home all right but it certainly seems strange when milking time comes around to have him staying in the house instead of going to the barn. He never thought that was possible before However, he is able to be up and around most of the day and absor-lutely refuses to let us make an invalid of him. But like all convales-cents he thinks he can do far more than his strength will really let him. The quickest way to settle an argument is to let him find out fo

himself. He has plenty to tell us that is quite interesting regarding his ex-periences in the hospital — praise for many of the doctors and nurses, impatience for some of the students and absolute scorn for the various patients who spent most of their waking hours in voicing complaints about things in and around the hos pital - the doctors, nurses, food, treatment, in fact just about everything. There was hardly anything that suited them. Mind you, the attention they are given is by no means one hundred percent but can it be expected under present

conditions? Shortage of help is very evident for those who will see There have been quite a few let ters in the press lately as to wheth-er or not flowers should be taken to hospital patients. Naturally there are some in favour and some against. There isn't a doubt in the world that flowers for the sick are a kind and thoughtful gesture and in the past I doubt if anyone would speak against the practise, particularly for private room patients. To day there are few private patients. People who are really sick cannot afford to wait until a private room is available, so there are more ward patients than ever before. And, from what I was able to see in Toronto there is absolutely no room to hospital patients. Naturally the in a public ward for the anyone. One small table beside each patient's bed must do for

everything. Time after time flow-ers must be moved so that space ers must be moved so that space may be given for other things. So, no matter how much you may be tempted to take flowers to your friends in a city hospital, think again — and don't. Fruit or easily digestible food is far more accept able — depending of course upon the patient's needs.

And by the way, if by any chance any of you people are getting fed up with the weather I suggest that up with the weather I suggest that you go to hospital to forget about it. All the time Partner was away we were telling him how wet it was everywhere and how the rain held up the work and so on and so forth but it wasn't until he was actually home that Partner realised what home that Partner realised what awfully wet rain we had been hav-ing, if you know what I mean— and I think you do. He said one day was much like another in hos pital — that a dull day was hardly noticable at all. So there you are folks, if the weather doesn't suit

Helps Check Colds Quickly

You can often check a cold quickly if you follow these instructions.
Just as soon as you feel the cold coming on and experience headache, pains in the back or limbs, soreness through the body, take a Paradol tablet, a good big drink of hot lemonade or ginger tea and go to bed.

The Paradol affords almost immediate relief from the pains and aches and helps you to get off to sleep. The dose may be repeated, if necessary, according to the directions. If there is soreness of the throat, gargle with two Paradol tablets dissolved in water. Just try Paradol the next time you have a cold and we believe that you will be well pleased. Paradol does not disappoint.
