To All Blood Donors

2,347,000 blood donations were made in Canada, 1,423,000 in Ontario, through the volunteer Blood Donor Service of the Canadian Red Cross Society since the first clinics were established in January, 1940. The lives of hundreds in the army, the navy and the air force were saved through this service.

This record was only made possible through your donations of blood. We wish to thank you sincerely for your generous help at a time when the need was so great. Special thanks are also given to the doctors, nurses, transport drivers and all other volunteers who gave so generously of their time and talents.

The Volunteer Blood Donor Service is now closed as a war measure. A new challenge is presented, however, for many deaths occur in Canadian hospitals each year for lack of an adequate transfusion service.

To meet this need, the Red Cross is making a survey with a view to providing all Canadian hospitals with blood for transfusion purposes. To our thanks, then, we add an invitation to help us as we continue our humanitarian work. When the time comes, and plans are ready, announcements will be duly made.

The veal cutlets will make a substantial dinner on Tuosday and, if there are any scraps of lamb left over, meat pancakes would be a good supper choice.

The pound of hamburger stretched with soft bread crumbs will make a meat loaf that will make two meals. Serve it hot for Wednesday's dinner and cold for supper on Thursday when the sausages will be used for dinner.

Friday's dinner will be unrationed fish and the amount suggested should provide the makings of a supper dish for Friday or Saturday night. Liver or kidney creole makes a tasty dish for Saturday's dinner.

It's your job and your savings that are at stake.

The danger of inflation, with its black shadow—deflation,—will remain as long as goods are scarce and insufficient to meet demands. That may be 6 months, 12 months, 18 months. Only time will tell. As quickly as controls are unnecessary, they are dropped.

After nearly 6 years of war, industry cannot switch over to normal production of civilian goods by a snap of the fingers. Reconversion takes time. The whole system of raw materials, I abor and production has to be re-geared.
