Troops Enjoy English Pubs

Returned Veterans Notice Difference in Canada

Thousands of Canadian soldiers, fresh from European battlefields, where they wrote a glorious chapter in Canada's history brought back with them happy memories of their leisure hours in English pubs — hours of good companionship in an atmosphere of real sociability.

The traditional place of the public house in English life has been strengthened through the centuries. Through the trying war years all classes found welcome relief from strain in the friendly atmosphere of these popular community meeting places. It is small wonder that Canadians were deeply impressed by what they saw of this phase of English life. So deep was that impression that there is a growing sentiment among returned veterans favoring the establishment of a similar system in Canada; one which would foster that normal atmosphere of sociability and camaraderie which is the spirit of the pub.

'WING' GETS DATA FOR ATLANTIC HOP

This "flying wing" glider, pictured during test flight in England, has for three years helped gather technical data for the construction of a huge, jet-propelled flying wing plane that is expected to make the London-to-New York hop in seven or eight hours. Windmill (arrow) below wings drive small motors which reduce turbulence. Glider has wing span of 34 feet, and weighs 6000 pounds.

SPOTS OF SPORTS

By FRANK MANN HARRIS

No doubt you've heard of him, the guy who not so long ago invented the sensational new system for playing the races, and started in to make a terrific clean-up at the track. Well, it's Bink's! The man that's making, the clean-up now. She's going out scrubbing.

Baseball players are talking about forming a Union, and hockey players are whispering of doing the same thing. If this kind of thing goes on, pretty soon it will be unanimous — we almost said Union — with all our movements, from the cradle to the grave, carefully organized, codified, and regulated. But there's one bright spot in the picture, at least. In sport, there is no necessity of forming anything like a Consumers' Union, for the reason that we ultimate consumers of sport can always refrain from purchasing the product, if we don't like the quality, which is more than can be said in the case of food, fuel, transportation and other necessities.

Which reminds us of just about the worst sports magazine we have in this country — the one that is called "The Sportsman" — which is saying quite a lot. This particular magazine had the "higher-up" shall we say, in it, and it's a shame to see it in the hands of the local sports writers, all that were out of policy that is, and asking their advice on how to run the team and increase its popularity and gate receipts.

"I know something that's been very successful in a lot of cases," said the writer, "something big, something that will get the team talked about." Mr. Magnate, "Can't any of your fellows think of some sensational story in the system — something that will get the headlines so that you can rest better and feel better?"

"I know something that's been very successful in a lot of cases," said the writer, "something big, something that will get the team talked about." Mr. Magnate, "Can't any of your fellows think of some sensational story in the system — something that will get the headlines so that you can rest better and feel better?"
