By Gwendoline P. Clarke Well, farm work is still practically at a standstill because of wet weather. That is, field work. There is still plenty of work at the barn - don't ever think there isn't. Partner calls it his "nursery", and it certainly looks like it with six little calves running around at feeding time. That is the way I like to see calves—playing like so many puppies. They are not quite so happy before they visit their mothers, in fact-you would think all Bedlam was on the rampage what with the bleating of the calves and the bawling of the cows. To make one's voice heard above the din is impossible; if we have anything to say to one another we have to ouse the sign

not for the D.A. Miss Anna P. Lewis, our new provincial superintendent, was there in person and we found her a very person. In the afternoon we were fun-and we certainly had it. About dozen of the women staged a W.I. meeting of by-gone days with fashioned costumes. There was also a dress parade in costume The audience was just about convulsed with laughter at different times. Some of the women not only dressed the part, they acted it too.

It seems to me that the government or somebody was putting the pressure on prices during the war. Papa Kiwi Looks After the Babies

In a letter written from New Zea land to a small child in England some new details about that almost extinct oddity the kiwi, are related. Thus: "Last week I was in Hastings and I saw three kiwis, father, mother and son . . . A kiwi mother weighs about 5 lbs., but lays an egg 1 lb. in weight. A white Leghorn hen weighs 5 lbs. but lays an egg which is only 2 ounces in weight. When the egg hatches, father kiwi looks after the chick and won't let mother have anything to do with it . . know, and right at the end of it are the two nostrils. At the other endnear the eyes-are whiskers like Then we took the car out on the road and to my ears it just purred cat's. The birds are practically blind in daylight and only come out at night. That is the story of the kiwi one of the strangest birds in the world."
