ALLOCATION OF HYDRO POWER SOUTHERN ONTARIO SYSTEM

It has become necessary, due to a reduction in the amount of purchased power available, to issue the following notice to municipalities and direct customers of the Commission in the Southern Ontario System.

"Effective February 18, 1948, and continuing until further notice, the daily consumption of kilowatthours shall be restricted to a maximum of 90% of the average daily consumption of kilowatthours in the month of October, 1947. This reduction shall not apply to customers whose power supply was interrupted by the Commission in October, 1947 to the extent of 10% or more of normal delivery."

This is a temporary emergency arising from sub-normal rain fall last Autumn which has forced two of the Quebec power companies to drastically reduce their deliveries of power to The Commission.

This restriction will be lifted just as soon as circumstances permit and in the meantime, all consumers must play their full part by saving electricity at all times.

If the specified reduction in consumption of electricity is not obtained, it will be necessary to cut off the supply of electricity entirely for definite intervals of time each day, wherever the specified consumption is being exceeded.

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

An Appeal To Gas Users In Southwestern Ontario

SAVE GAS

AND GET OUR MEN BACK TO WORK

CUT CONSUMPTION TO WHAT YOU USED IN DECEMBER-OR LESS

The gas shortage in Southwestern Ontario is attributable to the continental oil and coal shortage. Natural gas supplies are not sufficient and for many years have not been sufficient to meet domestic and industrial demands.

Natural gas supplies have to be supplemented by artificial gas manufactured generally from petroleum products. It is also supplemented by coke oven gas.

Every gas consumer in Southwestern Ontario faces this vital problem. While some are faced with shortages of oil for house heating purposes, the gas companies are faced with great shortages of oil and oil derivatives for the manufacture of artificial gas with which to supplement natural gas supplies. That is the basic reason for the present shortage.

Consumers are urgently requested to save gas by cutting down to the amount used in December, at least make a further 25 per cent reduction. Domestic consumers should use their gas equipment only for the purposes for which it was installed. If this were done, all industries in Southwestern Ontario could be put back on the lines almost immediately.

This would put our men back to work. Many are using their gas apparatus for house heating purposes. People who are thoughtlessly doing this are actually putting men out of work. We repeat - those who are using gas ranges for heating are actually putting men out of work.

In addition to this, many people have purchased and installed gas heaters which

is contrary to the regulations. This has resulted in a huge increase in gas consumption. In January, 1947, in an ordinary winter month, the average daily consumption of gas for the domestic, commercial and industrial purposes in the Union Gas Company area was about 25,000,000 cubic feet a day. Industry uses about 6,000,000 cubic feet per working day, so that the average domestic consumption was about 19,000,000 cubic feet daily.

With all industry off, the gas consumption in the Union Company area from January 23 to January 31, 1948, inclusive, averaged over 30,000,000 cubic feet per day, reaching a peak of 32,517,000 cubic feet on January 24th, last. This result is apparent.

Instead of domestic consumers burning about 19,000,000 cubic feet per day, it will be seen they are burning between 28,000,000 cubic feet. This is the vital and disturbing picture. Domestic consumers are using 50 per cent more than a year ago.

Householders are urgently requested to co-operate in cutting down the use of gas to the purpose for which it is installed. They should then exercise every reasonable precaution to conserve so that all industry can be put on and men can be back to work within two days.

Do your part to conserve. Every one in the affected areas is urged to come to the assistance of the men out of a job by not only adopting the slogan, "SAVE GAS AND GET OUR MEN BACK TO WORK," but by actually making it work - and work to the fullest extent.

The Issue Is Vital And It's Up To YOU TO Do Your Part

CUT CONSUMPTION TO WHAT YOU USED IN DECEMBER - OR LESS

Save Gas and Get Our Men Back to Work
