ON THE FARM FRONT

BRIEF NOTES FOR THE BUSY FARMER

— By Haldimand Harry —
(intended for last issue)

Farmer's Week has been planned for the week of March 1st and early information is to the effect that one of the finest programmes possible has been arranged. The week will get off to a good start on Monday with the Seed Fair and Crop and Soils Day. This will be followed by Live Stock Day on Tuesday, Federation and Farm Forum Day on Wednesday, Poultry Day on Thursday, and Junior Day on Friday. An outstanding list of speakers is being arranged.

-o-

The prize list for the Seed Fair to be held on March 1st is very generous and now is the time to prepare your entries for showing. The Crop Improvement Association is anxious to make the 1948 Fair even larger than last year and this can only be done by every farmer preparing his samples for showing in the various classes. A preliminary prize list is already out and a copy can be secured from the Department of Agriculture, Cayuga. Printed prize lists will be ready for mailing shortly.

-o-

Final figures on the marketing of swine during 1947 have just been made available. From this we learn that a total of 23,201 hogs were marketed through inspected plants during last year. This is an increase of 35.3% over the 1946 figures.

-o-

Haldimand leads again, for the eighth year in succession, with 46.4% Grade A carcasses. The next nearest County, Ontario, had 44.3%. The other counties in order are as follows Grey and Victoria tied for third place with 43.9%; Peterborough followed with 43.5%; Peel 43.4%; Lincoln 43.2%; Simcoe 42.8%; and Waterloo and York tied for ninth place with 42.7%. Twenty counties in the province had 40% or better.

-o-

Haldimand County Hog Producers are continuing to maintain their position as during the month of January 2,334 hogs were shipped to market with 49.2% being Grade A. Not only does this amount to 1,029 more hogs being marketed during the month but it also amounts to 4.1% more Grade A carcasses.

-o-

Have you ordered your chicks yet? With the downward trend in feed prices the poultry producer stands in a favourable position. He has a guaranteed floor for his eggs and with reasonable luck should be able to cash in on the situation. If you are considering the putting in of chicks it would be well to place your order now and not be disappointed.

-o-

The same downward trend in feed prices during the past week or so should prove beneficial to hog producers and the farmer who did not become panicky but who maintained his average herd now stands to gain.

The sum and substance of the Crop Improvement meetings held in Toronto last week was that every bushel of grain of the kind best suited to each farmer's soil and climatic conditions should be grown. There is a prospect that Ontario farmers may not be able to buy Western grain as advantageously in the future as they have in the past. The net result is that Ontario must become more self-sustaining.

-o-

Professor Norman Thomas, of the Soils Department, O.A.C., in discussing the value of manure last week stated that all field experiments indicate that the crop producing value of a ton of manure is from $3.00 to $5.00, that is the value of the crop increase per ton applied over the rotation adds up to this amount. On the basis that the actual plant food in a ton of manure is worth around $2.00, the conclusion then is that the crop producing value of the organic matter in the manure can quite easily be equal to the fertilizer value, particularly if the soil is low in organic matter. Haldimand soils on the average are very much in need of organic matter. They, therefore, need a great deal more manure applied.

That's when a man is really down. A fellow risks everything else before he parts with his shirt. That goes last. He values it too much.

The expression *lose your shirt* is used for good reasons. A good cotton shirt is something to cherish. The same amount of money could buy nothing of similar quality.

That applies also to cotton bed sheets, handkerchiefs, gowns, and scores of other items of daily use that are made of cotton. Cotton with its freshness, its washability, its resistance to sun and heat and its durability gives top value for your money.

You can bet your shirt on that!

WITH THE NURSING RESERVE

The Nursing Reserve Class meeting was held on Friday of last week, in order that some of the members could attend the Boy Scouts Parents Night in the Presbyterian Church Sunday School Room. The "Feeding of Infants and Children" and "Infant Care" were the topics for the evening. Mrs. Allen Lunoy, R.N., lectured on the former and Mrs. N. Marshall, R.N., on the latter.

Dr. Hyde, Hagersville, will be with us Wednesday night, March 10th, to lecture on "Care of Teeth." Anyone interested in hearing this lecture will be welcome to attend. Meeting starts at 8. P.M. sharp. This was to be held March 3rd, so kindly note change of date.

WALPOLE MUNICIPAL COUNCIL MEET

Jarvis, February 14, 1948

The Municipal Council of the Township of Walpole met on this date pursuant to adjournment with all members present and Reeve A. E. Catherwood presiding. The minutes of January meeting were read and all correspondence given due attention.

Waldbrook and Cox — Resolved that the minutes of January meeting be adopted as read. Carried.

A By-Law was passed providing for expenditure on the roads in Walpole for the year 1948.

Gee and Sheppard — Resolved that the general and road accounts be paid. Carried.

General accounts to the amount of $384.71 and road accounts to amount of $2,862.00 were paid.

Sheppard and Gee — Resolved that we do now adjourn to meet on March 20th at ten o'clock A.M. Carried.

J. J. PARSONS, Clerk.
A. E. CATHERWOOD, Reeve

-o-

ST. JOHN AMBULANCE

The fourth class was held in Jarvis Public School under the direction of Dr. Jones. Practical work was demonstrated by the members in Artificial Respiration; both in the Schafers and Silvester's methods.

The fifth lecture will be on Poisons and miscellaneous injuries and there treatments.

-o-

HIDDEN COSTS

Unfortunately, the advocates of government controls and subsidies never look beyond the prices in the stores and ignores the real cost to the people, because some of this cost is hidden in subsidies.

—Granby (Que.) Leader-Mail

NOTICE OF APPLICATION

THE LIQUOR LICENSE ACT 1946
LICENSING DISTRICT No. 4

TAKE NOTICE that Maude Bixel, of the Village of Jarvis, in the County Haldimand, will make an application at a special meeting of the Liquor License Board of Ontario to be held at the Empire Hall, 15 Queens Street, in the City of St. Catherines in the County of Lincoln, on Friday, the 12th day of March, A.D., 1948, at the hour of 10 o'clock in the forenoon for the issuance of Dining Room License for the sale and consumption of beer and wine with meals for the following premises, that is to say: The American Hotel at Jarvis, Ontario, aforesaid.

STATEMENT

OF

Respective Functions of The Hydro-Electric Power Commission of Ontario and the Municipal Hydro Commissions, with Particular Reference to the Present Emergency.

•

In view of the apparent public misunderstanding of the respective functions of The Hydro-Electric Power Commission of the Province and the Municipal Hydro Commissions in the municipalities, this statement is made to clarify the situation.

The function of the Provincial Commission is to generate or buy electric power and to sell electric power to Municipal Commissions and directly to rural consumers and to certain industries.

The function of each Municipal Commission is to sell to its consumers within the municipality the electric power purchased from the Provincial Commission.

In practice, the Provincial Commission and the Municipal Commissions endeavour to co-operate with each other in the public interest.

By reason of lack of rainfall last summer and autumn and by lack of thaws during the present winter, there has been a substantial depletion of the storage of water necessary to maintain a high level of continuous generation. The resulting loss of production of electric power has taken place in Ontario and elsewhere where power has been purchased both under contract and in excess of contract commitments by the Provincial Commission. This loss of production of electric energy has become so serious that certain of those who had contracts to supply the Provincial Commission with electric power have been compelled not only to withdraw the electric power they had been supplying in excess of contract commitments, but as well have been compelled to reduce delivery below contract requirements by a further reduction of 8,000,000 kilowatt-hours per week.

As long ago as December 15th, the Provincial Commission notified the Municipal Commissions and indicated to its direct consumers that, in addition to cuts already being applied to direct consumers, it was evident that, unless additional voluntary savings could be obtained, the Commission would be obliged to order the municipalities to reduce their loads from time to time by as much as 15 per cent or more. This notification was given for the express purpose of obtaining greater conservation of power and to enable each Municipal Commission to plan in advance the most equitable allocation of power within the municipality.

The Provincial Commission received notification that the most recent cut of power purchased under contract would be effective on Monday, February 16th. In order to make an equitable reduction of power delivery to all Municipal Commissions, it was necessary for the Provincial Commission to compute for each Municipal Commission the amount of reduction it would be called upon to absorb, after taking into account the amount of conservation already effected by each Municipal Commission since October, 1947. To enable the Provincial Commission to complete the necessary computations and to notify the majority of Municipal Commissions of the amount of reduction each would have to absorb by Wednesday, February 18th, it was necessary that a substantial reduction be placed in effect as of Monday, February 16th, so that there would be no risk of an actual power stoppage in deliveries by the Provincial Commission. To accomplish this, the Provincial Commission requested the Municipal Commissions of Toronto, Ottawa, Hamilton, London, Windsor and Peterborough to reduce their takings of electric power by specific amounts during specified times, and also requested these Municipal Commissions to, in the meantime, treat the request confidentially and not to give it to the press prior to the notification to all municipalities on Monday. This was done to avoid statements appearing which might have the effect of creating quite erroneous impressions of the amount of reduction necessary in each particular municipality throughout the Province.

In relation to the reduction of power, each Municipal Commission was faced with entirely different considerations as to how available power would be allocated within each municipality. For this reason, it was not feasible for the Provincial Commission by a general statement to indicate to the consumers in any particular municipality the allocation of available power that would be made by the Municipal Commissions.

The Provincial Commission is delivering to the Municipal Commissions and to its direct consumers all the electric power it is able to generate or buy.

It is the function of each Municipal Commission to determine not only the allocation of power among its consumers, but also what public explanation may be desirable in relation thereto.

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO
