

# Valley of Revenge

JACKSON COLE

**CHAPTER XXXVIII: Lande,** believing that a threatening note pointed out Bartle's door is a hoax, does not go to the Pringle farm. That farmer, meanwhile, is looking for Bartle.

**Chapter XXXIX**  
As he shrugged into his coat his fingers touched a butt of his gun. It was as if he saw the drug had fired his imagination. Dark night. Lousy trail. Dead men's tongues can not wag. They covered a mile in gloomy silence then Pringle asked jerkily:

"You think there'd ever be real justice here for tobs, men?"  
"There certainly will be," Bartle roared. "Some day the Pringle cattlemen will show his guilt so plain that even Sheriff Lande will have to do something about it."  
"Did you ever think it might not be better for me to be living to ruin us, to run us out?"  
"Lord, not who else?"  
"I don't know. The idea just hit me. I hit me now. Before Steve Rand said he said he saw just one man run away from his shed. Mike Chapman saw just one man run away from his shed. Mike Chapman saw one. Seems like cattlemen, from all I've learned about 'em since I come West, most always ride in bunches, and when they make up their minds to do something they go ahead with a whoop and a yell."  
"You don't think I killed this man?" Bartle blurted. His eyes on the weapon in the pen's steady hand, and inwardly cursing because his own was back in his holster.

"Him I am sure about," Janita said evenly. "But the sign of your horse tell me you are the cattlemen who called a man Don Atter's Cross—that you are the one who killed the farmer at the burning shed. Sit you write your name where you got it. It is too bad that only now you know that the toe-piece on the front left shoe of your horse is not evenly worn down."

"Don't be a fool!" exploded Bartle. "Somebody fired at us from those bushes in back of you. From the glimpse I caught I thought it was some cowpuncher, but it may have been you! See for yourself how easy it is to shoot from those bushes and not be seen."  
"Janita did not move. "Once tonight I make the big mistake," she said. "I do not look behind me. I do not look back. I turn around. Place your hands behind your back. I tie you first. I look behind me, si when you are in a safe place and I know who you are."  
So this Mexican fellow didn't know who Koss Bartle was! There had been a chance for the banker to save his reputation—and his neck.

"He and he hang!" stormed. "But you pay for this. I'll have Sheriff L. just you down the minute you find out what a fool you've been."  
Janita was unmoved. Experience had taught her to believe her eyes in preference to her ears. She took the rope that hung on Pedro's saddle and advanced on the man. She had just thrown a loop around the prisoner's wrists when suddenly Bartle spun around like a beast at bay, snarling. He flayed Janita, his fists lashing out, driving the slight girl backward relentlessly, not swerving even when Janita's weapon spoke and flame singed his coat sleeve.

Janita stumbled and fell. Bartle flung himself upon her, pumping her with one fist while the other sought to snatch her gun. But as his victim's struggles weakened, Bartle remembered the gun in his own holster. Yanking it out, he swung the barrel to within inches of Janita's chest. His finger tightened convulsively on the trigger.

(To Be Continued)

## Modern Etiquette

By Roberta Lee

Q. Is it obligatory for a guest to speak to her hostess before leaving a reception?  
A. Yes, she should express appreciation of the pleasure she has had, unless it is a very large affair and the hostess is engaged in receiving or entertaining other guests.  
Q. Is it all right to say, "Mr. Jones, shake hands with Mr. Smith" when introducing two men?  
A. No, this expression is very crude. If the two men are well-mannered, they will shake hands without being instructed.  
Q. Is it permissible to break crackers or bread into the soup?  
A. No, this is not good form.  
Q. World-it be all right for a man to buy an engagement ring before he proposes to the girl?  
A. No, unless he thinks there is no possibility of the girl refusing him. Usually, though, the girl should have something to say about the choice of the ring, its style, color, and so forth.  
Q. How should one place the knife and fork after finishing a course at the dinner table?  
A. Parallel across the plate, with the handles to the right.

4988  
SIZES  
10-16  
Cuts like cake, sews like a whiz, LOOKS like a million! Tender, Pattern 4988 is your dress for simply everything this summer. That heavenly ruffle is one with the bodice!  
Pattern 4988 comes in Teen-age sizes 10, 12, 14, 16. Size 12 takes 3 yards 35-inch fabric.  
Send TWENTY-FIVE CENTS (25c) in coins (stamps cannot be accepted) for this pattern to Room 404, 771 Bay Street, Toronto. Print plainly SIZE, NAME, ADDRESS, STYLE NUMBER.

ISSUE 19 - 1948

High Jinks in the Park—A pose from the ballet "In The Park" performed by members of the Volokoi Canadian Ballet who were featured in the first Canadian National Dance Festival held in Winnipeg. For years Canadian dancers were forced to go to other countries to indulge their talent and training. This Dominion Dance Festival gave Canada the opportunity to create more dancers and more dance audiences.

## Your Handwriting and You

By Alex. S. Arnott

### Script Indicates Direct Approach

Dear Mr. Arnott: I find your column extremely interesting and would appreciate a frank analysis of my handwriting.

Your handwriting shows that you have an investigative nature, one that is not satisfied with superficial answers but must delve into the facts and pry out the right solutions. You take a direct approach to those things which interest you and it is hard for you to change a thought once you have it in your mind. This I gather that your intellectual nature makes you emphatic and abrupt in speech, which may be interpreted by others as stubbornness, but you may rest assured that it is nothing but directness of approach and frankness. There are reserved and secretive nature. You are inclined to withhold information and to reserve your feelings. From this I gather that your intellectual nature has become infested with insecurity.

A. Try sticking a few sulphur matches, heads down, into the soil around the plants. Spraying with a solution of naphtho soap and water is also effective.

### Chinese Etiquette

An American resident in China remonstrated with her houseboy for taking her linen into her bedroom without knocking.  
"That's all right, Missy," said the native. "Every time, look in keyhole. Nothing on, no come in."

Vanity is strong, which means your confidence is rather high and this tendency to over-confidence might lead you into difficulty when dealing with others.

### I will be...

Anyone wishing a more complete analysis please send self-addressed, stamped envelope to Alex. S. Arnott, 123, 18th Street, New Toronto 14. There is no charge for this service.

### Nothing Daunted

The little old lady had just returned from a trip to Europe and was busy impressing her friends with the beautiful things she had seen and the wonderful places she had visited, when a woman asked, "Did you by any chance see the Dardanelles?"  
"See them?" the traveller replied impulsively. "Why, my dear, I had lunch with them."

## Sunday School Lesson

Ezra Leads a Religious Revival

Nehemiah 8: 1-3; 5-6, 8; 10: 28-32.

**Golden Text**—But be ye doers of the word, and not hearers only, deceiving your own selves.—1: 22.

Nehemiah finished building the wall of Jerusalem, just before the annual Feast of Trumpets; and to commemorate the great occasion the people gathered together in the street before the water gate, and asked the priest Ezra to read from the Book of the Law of Moses.

All morning until noon the great congregation stood in silence while Ezra and his helpers read and expounded the Word of God; and at the finish Ezra blessed the Lord, and the people, responding "Amen, Amen, Amen" bowed their heads and humbly worshipped their Creator.

As always follows careful study of the Scriptures, understanding and enlightenment came to these worshippers. They realized how, during the past years, they had allowed themselves to fall into sinful habits, and solemnly resolved to do better in the future. They made a Covenant among them that they would no longer intermarry with him.

**When your head aches...**

Backache is often caused by poor posture. When sitting, the head should be directly over the shoulders, the neck straight, and the shoulders relaxed. When standing, the head, neck, shoulders, hips, ankles, and feet should be in a vertical line. This will prevent the muscles of the neck and shoulders from becoming tense and causing headaches.

**Dodds Kidney**

Usually, the science of health, as we know it, was invented by an American doctor, Andrew Taylor...

## ADRIAN STYLE

Our first spring call has arrived and Partner calls it "Minute". A young heifer is his mother and, according to Partner, the calf is "no bigger than a minute". I was down to see it today and thought it was appropriately named. But I also discovered that in this case anyway, size has no bearing on activity for that same little calf was racing back and forth from one end of the stable to the other.

How quickly animals sense the change of season. So often I notice the horses in the yard these days, heading against the wind, nostrils quivering, expectancy in every nerve and sinew of their bodies. Then the cows come out to water, and for sun and exercise, and they certainly show no great haste to return to the stable where they know only hay and meal await them. What is hay and meal to them when over the fence there is fresh, green grass? As I watch I notice first one bovine sniffs the air, and then another. "Ah, if only that fence were not there!" Then it is quite obvious Katie gets an idea. "Now if I can just get my nose between those bottom rails I might possibly get at least a nibble of that luscious grass." So she tries, twisting her head this way and that, but she can't quite make it. If she wasn't a lady one could almost imagine Katie saying "Darn these horns away!"

Personally, I have great sympathy for the cows and horses because I, too, would like to roam at will. Yesterday when I got into the car I felt I wanted to drive and drive—no special place, just anywhere, just as long as it was in the country. All I did, however, was drive to town, mailed a letter, bought some bread, got meat from the locker, and then back to work in the house. So I was just like Katie at the fence and my horns were the jobs around home.

One nice little chore we had this week was cleaning out the cistern. We had a man to pump the water out, and to do the job he brought along a force pump connected to a little gasoline engine. A long length of hose carried the water away and the cistern was empty in half-an-hour. After it was cleaned out Partner began to worry because now we hadn't any soft water and that meant using water from the well for everything. That didn't suit Partner very well because at all times, and at every season of the year, we make a point of being very careful with our well-water. To be short of water is our greatest dread. On a farm it is no necessary to feed itself.

**WHEN YOU'RE LOW ON ENERGY**

There's nothing out like LIPTON'S TEA.

Only LIPTON'S BRISK-TASTING TEA GIVES YOU THAT FLAVOR-LIFT.

You've never had a cup of tea like LIPTON'S—it's no ordinary tea, it's full-bodied, and above all, so exhilarating! That's LIPTON'S FLAVOR-LIFT—and only LIPTON has it. For it is the blend that makes LIPTON—and the blend is LIPTON'S own secret. Ask for LIPTON at your grocer's today!

**MR. BRISK SAYS—ONE CUP OR TWO— LIPTON'S TEA BAGS FOR YOU!**

## Ship Sunk—By Butterflies!

There is often stranger than fiction. I would take a fiction writer and ask him to write a story about a ship which sank by—of all things—butterflies.

The year was 1911, and the S.S. Altair was plying a course through the waters of the Persian Gulf. On the horizon was seen what appeared to be a small black cloud heading directly for the ship. The mate of the Steamship checked the barometer and found no change. The mate indicated that a storm, if it were one, should be moving away from rather than toward the ship.

By now the master was on the bridge, and as the cloud grew in size he ordered a ninety degree course change. Strangely enough the cloud changed its course too. Again the mate checked the barometer and found no change. The mate indicated that a storm, if it were one, should be moving away from rather than toward the ship.

Conducted Tour to Feature Thornbury Blossom Celebration—Last year more than eight thousand attended the Blossom Tour ceremonies at Thornbury, Ont., and an even greater turnout is expected on Blossom Sunday, May 30th, this year. Well known radio commentators and other notables are expected to attend and the beautiful Thornbury district will no doubt get much priceless publicity by means of this community enterprise. Chief features of the day will be personally conducted tours through the many orchards for which the district is noted.

## CHRONICLES OF GINGER FARM

By Gwendoline P. Clarke

So Partner hitched the team to the stone boat—the boys were busy with other jobs—and for two afternoons he drew water from the creek in a barrel. Then he handed the water over to me by pailfuls to dump into the cistern. The creek was running fast so we knew the water would be clean and fresh. But still, that little job provoked an argument. I thought it was a good idea the first afternoon but when the cistern was half full I was ready to call off the dog. But Partner—no half measures for him! In spite of my protests he drew water for a second afternoon. "But why fill the cistern with it?" I asked. "The cistern was half full when I argued."

"If it rains, all right—if it doesn't rain, it's a waste of time. I don't want to see the water in the cistern. The water went on and the cistern was three-quarters full before we quit. By that time I was suggesting that we continue and make sure the overflow was working all right! Now, just out of cussedness, I hope it rains."

Oh, well, life would be kind of tame if it were not for these little friendly pranks. And after all I do like soft water. How some unfortunate gets along without it I don't know. And yet some people do and from choice. I know one woman who has used hard water for years because one time when they were using their cistern she found a little dead bird in the eavestrough! One wonders how much people make out of a country ravaged by war where there would be more than little dead birds to worry about.

## WEDDING INVITATIONS Should Be Correct!

"Mr. and Mrs. William F. Brown request the honor of your presence at their wedding."

The invitation is the most thrilling piece of paper you have ever prepared and you want it to be perfect in every detail, just as the wedding itself.

Invitations, as well as announcements should be engraved on the first page of folded sheets of fine quality paper. The color should be white, off-white, ivory, or cream. Two envelopes are correct, the outer one bearing the guest's full name; the inner, with unlined flap, carrying the title and surname, such as "Miss Richardson."

Many brides-to-be ask, "Should the tissue be left in the invitation?" Since the tissue is only put there to prevent smearing of the ink, there's no reason to keep it.

From the day "me" pops the question until the day you middle-aid it together, our Reader Service booklet No. 204 tells you the correct way. Invitations, wedding dress, expenses, gifts, ceremony and reception.

For budget-minded brides and those to whom money is no object. Send THIRTY CENTS (in coins) for "How To Plan Your Wedding" to Reader Service, Room 604, 371 Bay Street, Toronto. Print name, address, booklet title and No. 204.

## CROSSWORD PUZZLE

Across: 1. Word of honor. 2. Sort of a cake. 3. A kind of fish. 4. A kind of fruit. 5. A kind of bird. 6. A kind of flower. 7. A kind of tree. 8. A kind of animal. 9. A kind of insect. 10. A kind of plant. 11. A kind of mineral. 12. A kind of metal. 13. A kind of stone. 14. A kind of liquid. 15. A kind of gas. 16. A kind of solid. 17. A kind of plasma. 18. A kind of energy. 19. A kind of force. 20. A kind of motion. 21. A kind of time. 22. A kind of space. 23. A kind of mass. 24. A kind of length. 25. A kind of area. 26. A kind of volume. 27. A kind of weight. 28. A kind of pressure. 29. A kind of temperature. 30. A kind of density. 31. A kind of speed. 32. A kind of acceleration. 33. A kind of deceleration. 34. A kind of velocity. 35. A kind of momentum. 36. A kind of impulse. 37. A kind of work. 38. A kind of power. 39. A kind of energy. 40. A kind of force. 41. A kind of motion. 42. A kind of time. 43. A kind of space. 44. A kind of mass. 45. A kind of length. 46. A kind of area. 47. A kind of volume. 48. A kind of weight. 49. A kind of pressure. 50. A kind of temperature. 51. A kind of density. 52. A kind of speed. 53. A kind of acceleration. 54. A kind of deceleration. 55. A kind of velocity. 56. A kind of momentum. 57. A kind of impulse. 58. A kind of work. 59. A kind of power. 60. A kind of energy. 61. A kind of force. 62. A kind of motion. 63. A kind of time. 64. A kind of space. 65. A kind of mass. 66. A kind of length. 67. A kind of area. 68. A kind of volume. 69. A kind of weight. 70. A kind of pressure. 71. A kind of temperature. 72. A kind of density. 73. A kind of speed. 74. A kind of acceleration. 75. A kind of deceleration. 76. A kind of velocity. 77. A kind of momentum. 78. A kind of impulse. 79. A kind of work. 80. A kind of power. 81. A kind of energy. 82. A kind of force. 83. A kind of motion. 84. A kind of time. 85. A kind of space. 86. A kind of mass. 87. A kind of length. 88. A kind of area. 89. A kind of volume. 90. A kind of weight. 91. A kind of pressure. 92. A kind of temperature. 93. A kind of density. 94. A kind of speed. 95. A kind of acceleration. 96. A kind of deceleration. 97. A kind of velocity. 98. A kind of momentum. 99. A kind of impulse. 100. A kind of work. 101. A kind of power. 102. A kind of energy. 103. A kind of force. 104. A kind of motion. 105. A kind of time. 106. A kind of space. 107. A kind of mass. 108. A kind of length. 109. A kind of area. 110. A kind of volume. 111. A kind of weight. 112. A kind of pressure. 113. A kind of temperature. 114. A kind of density. 115. A kind of speed. 116. A kind of acceleration. 117. A kind of deceleration. 118. A kind of velocity. 119. A kind of momentum. 120. A kind of impulse. 121. A kind of work. 122. A kind of power. 123. A kind of energy. 124. A kind of force. 125. A kind of motion. 126. A kind of time. 127. A kind of space. 128. A kind of mass. 129. A kind of length. 130. A kind of area. 131. A kind of volume. 132. A kind of weight. 133. A kind of pressure. 134. A kind of temperature. 135. A kind of density. 136. A kind of speed. 137. A kind of acceleration. 138. A kind of deceleration. 139. A kind of velocity. 140. A kind of momentum. 141. A kind of impulse. 142. A kind of work. 143. A kind of power. 144. A kind of energy. 145. A kind of force. 146. A kind of motion. 147. A kind of time. 148. A kind of space. 149. A kind of mass. 150. A kind of length. 151. A kind of area. 152. A kind of volume. 153. A kind of weight. 154. A kind of pressure. 155. A kind of temperature. 156. A kind of density. 157. A kind of speed. 158. A kind of acceleration. 159. A kind of deceleration. 160. A kind of velocity. 161. A kind of momentum. 162. A kind of impulse. 163. A kind of work. 164. A kind of power. 165. A kind of energy. 166. A kind of force. 167. A kind of motion. 168. A kind of time. 169. A kind of space. 170. A kind of mass. 171. A kind of length. 172. A kind of area. 173. A kind of volume. 174. A kind of weight. 175. A kind of pressure. 176. A kind of temperature. 177. A kind of density. 178. A kind of speed. 179. A kind of acceleration. 180. A kind of deceleration. 181. A kind of velocity. 182. A kind of momentum. 183. A kind of impulse. 184. A kind of work. 185. A kind of power. 186. A kind of energy. 187. A kind of force. 188. A kind of motion. 189. A kind of time. 190. A kind of space. 191. A kind of mass. 192. A kind of length. 193. A kind of area. 194. A kind of volume. 195. A kind of weight. 196. A kind of pressure. 197. A kind of temperature. 198. A kind of density. 199. A kind of speed. 200. A kind of acceleration. 201. A kind of deceleration. 202. A kind of velocity. 203. A kind of momentum. 204. A kind of impulse. 205. A kind of work. 206. A kind of power. 207. A kind of energy. 208. A kind of force. 209. A kind of motion. 210. A kind of time. 211. A kind of space. 212. A kind of mass. 213. A kind of length. 214. A kind of area. 215. A kind of volume. 216. A kind of weight. 217. A kind of pressure. 218. A kind of temperature. 219. A kind of density. 220. A kind of speed. 221. A kind of acceleration. 222. A kind of deceleration. 223. A kind of velocity. 224. A kind of momentum. 225. A kind of impulse. 226. A kind of work. 227. A kind of power. 228. A kind of energy. 229. A kind of force. 230. A kind of motion. 231. A kind of time. 232. A kind of space. 233. A kind of mass. 234. A kind of length. 235. A kind of area. 236. A kind of volume. 237. A kind of weight. 238. A kind of pressure. 239. A kind of temperature. 240. A kind of density. 241. A kind of speed. 242. A kind of acceleration. 243. A kind of deceleration. 244. A kind of velocity. 245. A kind of momentum. 246. A kind of impulse. 247. A kind of work. 248. A kind of power. 249. A kind of energy. 250. A kind of force. 251. A kind of motion. 252. A kind of time. 253. A kind of space. 254. A kind of mass. 255. A kind of length. 256. A kind of area. 257. A kind of volume. 258. A kind of weight. 259. A kind of pressure. 260. A kind of temperature. 261. A kind of density. 262. A kind of speed. 263. A kind of acceleration. 264. A kind of deceleration. 265. A kind of velocity. 266. A kind of momentum. 267. A kind of impulse. 268. A kind of work. 269. A kind of power. 270. A kind of energy. 271. A kind of force. 272. A kind of motion. 273. A kind of time. 274. A kind of space. 275. A kind of mass. 276. A kind of length. 277. A kind of area. 278. A kind of volume. 279. A kind of weight. 280. A kind of pressure. 281. A kind of temperature. 282. A kind of density. 283. A kind of speed. 284. A kind of acceleration. 285. A kind of deceleration. 286. A kind of velocity. 287. A kind of momentum. 288. A kind of impulse. 289. A kind of work. 290. A kind of power. 291. A kind of energy. 292. A kind of force. 293. A kind of motion. 294. A kind of time. 295. A kind of space. 296. A kind of mass. 297. A kind of length. 298. A kind of area. 299. A kind of volume. 300. A kind of weight. 301. A kind of pressure. 302. A kind of temperature. 303. A kind of density. 304. A kind of speed. 305. A kind of acceleration. 306. A kind of deceleration. 307. A kind of velocity. 308. A kind of momentum. 309. A kind of impulse. 310. A kind of work. 311. A kind of power. 312. A kind of energy. 313. A kind of force. 314. A kind of motion. 315. A kind of time. 316. A kind of space. 317. A kind of mass. 318. A kind of length. 319. A kind of area. 320. A kind of volume. 321. A kind of weight. 322. A kind of pressure. 323. A kind of temperature. 324. A kind of density. 325. A kind of speed. 326. A kind of acceleration. 327. A kind of deceleration. 328. A kind of velocity. 329. A kind of momentum. 330. A kind of impulse. 331. A kind of work. 332. A kind of volume. 342. A kind of weight. 343. A kind of pressure. 344. A kind of temperature. 345. A kind of density. 346. A kind of speed. 347. A kind of acceleration. 348. A kind of deceleration. 349. A kind of velocity. 350. A kind of momentum. 351. A kind of impulse. 352. A kind of work. 353. A kind of power. 354. A kind of energy. 355. A kind of force. 356. A kind of motion. 357. A kind of time. 358. A kind of space. 359. A kind of mass. 360. A kind of length. 361. A kind of area. 362. A kind of volume. 363. A kind of weight. 364. A kind of pressure. 365. A kind of temperature. 366. A kind of density. 367. A kind of speed. 368. A kind of acceleration. 369. A kind of deceleration. 370. A kind of velocity. 371. A kind of momentum. 372. A kind of impulse. 373. A kind of work. 374. A kind of power. 375. A kind of energy. 376. A kind of force. 377. A kind of motion. 378. A kind of time. 379. A kind of space. 380. A kind of mass. 381. A kind of length. 382. A kind of area. 383. A kind of volume. 384. A kind of weight. 385. A kind of pressure. 386. A kind of temperature. 387. A kind of density. 388. A kind of speed. 389. A kind of acceleration. 390. A kind of deceleration. 391. A kind of velocity. 392. A kind of momentum. 393. A kind of impulse. 394. A kind of work. 395. A kind of power. 396. A kind of energy. 397. A kind of force. 398. A kind of motion. 399. A kind of time. 400. A kind of space. 401. A kind of mass. 402. A kind of length. 403. A kind of area. 404. A kind of volume. 405. A kind of weight. 406. A kind of pressure. 407. A kind of temperature. 408. A kind of density. 409. A kind of speed. 410. A kind of acceleration. 411. A kind of deceleration. 412. A kind of velocity. 413. A kind of momentum. 414. A kind of impulse. 415. A kind of work. 416. A kind of power. 417. A kind of energy. 418. A kind of force. 419. A kind of motion. 420. A kind of time. 421. A kind of space. 422. A kind of mass. 423. A kind of length. 424. A kind of area. 425. A kind of volume. 426. A kind of weight. 427. A kind of pressure. 428. A kind of temperature. 429. A kind of density. 430. A kind of speed. 431. A kind of acceleration. 432. A kind of deceleration. 433. A kind of velocity. 434. A kind of momentum. 435. A kind of impulse. 436. A kind of work. 437. A kind of power. 438. A kind of energy. 439. A kind of force. 440. A kind of motion. 441. A kind of time. 442. A kind of space. 443. A kind of mass. 444. A kind of length. 445. A kind of area. 446. A kind of volume. 447. A kind of weight. 448. A kind of pressure. 449. A kind of temperature. 450. A kind of density. 451. A kind of speed. 452. A kind of acceleration. 453. A kind of deceleration. 454. A kind of velocity. 455. A kind of momentum. 456. A kind of impulse. 457. A kind of work. 458. A kind of power. 459. A kind of energy. 460. A kind of force. 461. A kind of motion. 462. A kind of time. 463. A kind of space. 464. A kind of mass. 465. A kind of length. 466. A kind of area. 467. A kind of volume. 468. A kind of weight. 469. A kind of pressure. 470. A kind of temperature. 471. A kind of density. 472. A kind of speed. 473. A kind of acceleration. 474. A kind of deceleration. 475. A kind of velocity. 476. A kind of momentum. 477. A kind of impulse. 478. A kind of work. 479. A kind of power. 480. A kind of energy. 481. A kind of force. 482. A kind of motion. 483. A kind of time. 484. A kind of space. 485. A kind of mass. 486. A kind of length. 487. A kind of area. 488. A kind of volume. 489. A kind of weight. 490. A kind of pressure. 491. A kind of temperature. 492. A kind of density. 493. A kind of speed. 494. A kind of acceleration. 495. A kind of deceleration. 496. A kind of velocity. 497. A kind of momentum. 498. A kind of impulse. 499. A kind of work. 500. A kind of power. 501. A kind of energy. 502. A kind of force. 503. A kind of motion. 504. A kind of time. 505. A kind of space. 506. A kind of mass. 507. A kind of length. 508. A kind of area. 509. A kind of volume. 510. A kind of weight. 511. A kind of pressure. 512. A kind of temperature. 513. A kind of density. 514. A kind of speed. 515. A kind of acceleration. 516. A kind of deceleration. 517. A kind of velocity. 518. A kind of momentum. 519. A kind of impulse. 520. A kind of work. 521. A kind of power. 522. A kind of energy. 523. A kind of force. 524. A kind of motion. 525. A kind of time. 526. A kind of space. 527. A kind of mass. 528. A kind of length. 529. A kind of area. 530. A kind of volume. 531. A kind of weight. 532. A kind of pressure. 533. A kind of temperature. 534. A kind of density. 535. A kind of speed. 536. A kind of acceleration. 537. A kind of deceleration. 538. A kind of velocity. 539. A kind of momentum. 540. A kind of impulse. 541. A kind of work. 542. A kind of power. 543. A kind of energy. 544. A kind of force. 545. A kind of motion. 546. A kind of time. 547. A kind of space. 548. A kind of mass. 549. A kind of length. 550. A kind of area. 551. A kind of volume. 552. A kind of weight. 553. A kind of pressure. 554. A kind of temperature. 555. A kind of density. 556. A kind of speed. 557. A kind of acceleration. 558. A kind of deceleration. 559. A kind of velocity. 560. A kind of momentum. 561. A kind of impulse. 562. A kind of work. 563. A kind of power. 564. A kind of energy. 565. A kind of force. 566. A kind of motion. 567. A kind of time. 568. A kind of space. 569. A kind of mass. 570. A kind of length. 571. A kind of area. 572. A kind of volume. 573. A kind of weight. 574. A kind of pressure. 575. A kind of temperature. 576. A kind of density. 577. A kind of speed. 578. A kind of acceleration. 579. A kind of deceleration. 580. A kind of velocity. 581. A kind of momentum. 582. A kind of impulse. 583. A kind of work. 584. A kind of power. 585. A kind of energy. 586. A kind of force. 587. A kind of motion. 588. A kind of time. 589. A kind of space. 590. A kind of mass. 591. A kind of length. 592. A kind of area. 593. A kind of volume. 594. A kind of weight. 595. A kind of pressure. 596. A kind of temperature. 597. A kind of density. 598. A kind of speed. 599. A kind of acceleration. 600. A kind of deceleration. 601. A kind of velocity. 602. A kind of momentum. 603. A kind of impulse. 604. A kind of work. 605. A kind of power. 606. A kind of energy. 607. A kind of force. 608. A kind of motion. 609. A kind of time. 610. A kind of space. 611. A kind of mass. 612. A kind of length. 613. A kind of area. 614. A kind of volume. 615. A kind of weight. 616. A kind of pressure. 617. A kind of temperature. 618. A kind of density. 619. A kind of speed. 620. A kind of acceleration. 621. A kind of deceleration. 622. A kind of velocity. 623. A kind of momentum. 624. A kind of impulse. 625. A kind of work. 626. A kind of power. 627. A kind of energy. 628. A kind of force. 629. A kind of motion. 630. A kind of time. 631. A kind of space. 632. A kind of mass. 633. A kind of length. 634. A kind of area. 635. A kind of volume. 636. A kind of weight. 637. A kind of pressure. 638. A kind of temperature. 639. A kind of density. 640. A kind of speed. 641. A kind of acceleration. 642. A kind of deceleration. 643. A kind of velocity. 644. A kind of momentum. 645. A kind of impulse. 64
