HE started as a junior. He moved around. He moved up. He learned a lot about banking, about Canada, about people. He is still climbing, still learning a job which is not mastered in a day ... or a year.

He has learned, for instance, that in making loans, a bank manager must satisfy himself that the borrower would merit your confidence if you were lending your own money.

At the same time he welcomes opportunities to put money to work. Loans are part of his business, and an important source of revenue. They help people get along, help build a prosperous, progressive nation.

Contrast his freedom of judgment with conditions in lands where freedom is deniedwhere every bank is a political tool, every banker a State official! State monopoly of banking, proposed by Socialists here, would open your banking transactions to political intrusion.
