The Story Thus Far: Honey Monros takes the Sylvester Diamond from a woman's handbag in a Los Angeles department store and that evening confesses the theft to Dan Brewster, state's attorney, with whom she is in love. She hasn't time to explain why she took the stone before Joe Danburne, professional thief

"Out of circulation," she answered truthfully, and was glad she did not have to tell a lie to a man who was about to die. "It will never tempt anyone else again."

"In the ocean?" His voice was an angry croak and Honey realized that, had he been able to reach her, probably would have choked the life from her body. Even knowing that he could not move to harm her, she still had a wild desire to push back from him. "That's as good an answer as any," she told him.

He gave a rasping laugh that was ugly to hear and she covered her ears for a second to hsut it out. Then he spoke again.

She started to touch him, to add

"Are you in great pain, Joe?" she asked gently. "I am sorry, you know." And she was.

"Pain, h-!' he hissed from between closed teeth, gritting back the agony from within. Honey reoiled as if he had struck her, so filled with hatred were the words. "I'm done for and you know it. But you're a fool if you think you can get away with double-crossing "How did you find out I took the diamond, Joe?"

"By the only clue the police had." "What was it?" Her heart stood still with fright. If Joe had guessed, the law might do the same thing. For a long time he did not say anything and Honey was beginning to wonder if he were dead, when he spoke again with new strength in his voice.

"A black button with a chip out of its side. I told you the last time you wore that black suit to lunchon that one of the buttons had a plece out of it. And you laughed because I noticed such a small detail. You lost that button when you stole the purse from Mrs. Sylvester, Honey. It pays to remem ber small things when you are deal ing in jewels.
