CHAPTER IX (Continued from last week) She nodded and turned back to her fishing. Maybe fate had led he to this place, she mused, to find Art. Perhaps he was the help she needed. If she were arrested, a good law-yer would be a necessity. "Do we have to go over for din-ner at Mrs. Riba's?" she finally

asked, hoping that he would answer in the negative. it is for you. Don't you want to go, Honey? She is a swell cook." "So soon?" He removed his pipe and knocked out the dead ashes. Then he refilled it. "You know, Honey, you are not the type of person to run from trouble. And what-

ever is on your mind is sure getting the best of you." "How do you know so much?" she demanded rather shortly, irritated that he could read her so well. "You haven't known me very long." There was a tinge of anger to her words.

He kept on, ignoring her sharp thrust that he should, be meddling in her affairs. "When you forget the boogie-bear now and then, your eyes dance with life and you smile and your hand is steady," he explained effortlessly. "Then it creeps upon you, and fear lurks in your eyes and you are jumpy, as if you were dreadfully afraid of something -like a man who has been threatened with death and expects to be knifed in the back at any moment." shuddered at how well he

analyzed her case.
"You sound like a doctor," she told him, anger leaving her. Then quite deliberately, she lifted her eyes. "I am afraid, Art. Afraid I shall be killed by a man."

"She asked me again," remarked Mrs. Carey and she seemed a bit put out "if your first name was Honey and where you were from. I made up a town, my dear. She was very curious about getting your exact description."

Honey dropped her lashes over her eyes to hide what might be there and got up and walked to the window. Joe must suspect from what little his sister had revealed to him, she thought quickly, otherwise, Mrs. Riba would not have been so precise with details. Art was saving to his mother: "Don't tell er anything. She is too snoopy to suit me.'

"I don't intend to," replied his mother and threw up her head. "She acted like she didn't believe me when I said I had known you a long time." Honey turned and smiled at her

Jesus and the Preparatory Ministry of John Matthew 3:4-17. Golden Text: - Repent ye:

the kingdom of heaven is at hand. Before Jesus entered upon h ministry a great and picturesqu man prepared his way. John, whose mother was a cousin of Mary, was a few months older than Jesus. He came into the region of the Jordon preaching and baptizing. He was unique. Clothed in camel's hair, supported by a leather girdle, his food was wild honey and a species of insects similar to grasshoppers. He came in the spirit and power of Great throngs went out from Jer

usalem and the surrounding areas to hear him. His preaching was as rugged as his appearance. "Repent ye, for the kingdom of heaven is at hand," he cried. Nor was he content with a form of repentance. "Bring forth therefore fruits meet for repentance," he demanded of the leading religionists of his day, warning that the axe was standing by the tree in readiness to new down that one that bore no fruit. Neither dare they take refuge in the fact that they were Abraham's descendants for, said he, "God is able o these stones to raise up children unto Abraham." John was a fearless preacher and

HOW TO FIX-IT

True Or False?

Tests have proved that men and women have the same intelligence. False. Males are better in me chanical, arithmetical and abstract reasoning problems; females, in language, rote, memory, social and esthetic tests. Because of these differences, it is not possible to compare the intelligence of the sexes in powerful, although very small

equal terms.

Men are less emotional than

The idea that elephants never forget is fictitious, says A. R. Siedentopf, who has studied the habits of wild animals for 15 years in Tanganyika, East Africa.

The lion, he says, kills for food only and kills almost instantly, it being beneath his dignity to play with a victim. Having provided a meal, the lion sounds a deep-chested call to a mate and waits for the

latter to take the first bite. The rhinoceros, dull-witted, is likely to be the first of the great African mammals to become extinct, unless better protected by law, Siedentopf thinks. He also points out that the hippo, as stupid as the rhinoceros but of a sunnier disposi tion, cannot be considered dange

Now I honestly thoug t t knew about every way there is of cooking potatoes but a few days ago I ran into something new. Possibly it isn't a new way of cooking, but just a variation of an old style. Anyway, I'm passing it along, in case some of you haven't heard of

Break It Up

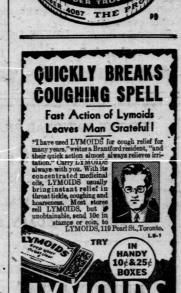

"Making a new pattern of behavior to break up the routine that makes moking mechanical is one of several ways to stop smoking, C. Aubrey Hearn reports in

Living."
A psychologist is said to have succeeded in throwing off the smok-ing habit in this way. He junked his old routine from scratch, getting up at a different time, eating a different kind of breakfast and setting out on a new course to work.
