Surprise Arrival-Mrs. Carl Leutner thought it was a piece of watermelon she ate that gave her those "indigestion" pains. Instead she found it was the arrival of her brand-new son. Unaware that a baby was on the way, it was a big surprise to the couple. Besides being caught without a supply of cigars to pass out, Leutner had to tour the neighborhood in search of a lavette

ning deep and swift. Finally he change you," he said. Then, to Steve: "Where can she stay?" "With Mrs. Warden," came the

Jim rose and said flatly, "Well, adios, Virginia." And to Steve Barron, "I'm holding you to your He nodded, turned, and walked from the place.

Virginia found Sarah Warden a motherly person. She was gray and wistful and the lines of her face revealed that life had not been kind to her. She was alone at 50, and it had been a dozen years since the Apaches had killed her ranch-

er husband. Her little adobe house was homey. Handmade gingham curtains added color. The rooms were polished bright. Her kitchen was a busy place. They ate their eve-

ning meal from a table covered with red checkered calico. "I do have company at times, Sarah Warden said. "A girl from the dance hall. She comes and sometimes talks, but mostly jus sits. She's not very happy. This isn't a good place for a woman (Continued Next Week)

The Brute!

Henpeck, standing in the witness box in a sorely battered state, was being cross-examined by a bullying "And you've never once spoken hasty word to your wife?"

Henpeck hesitated for a mome and the barrister was quick to seize the opportunity. "Be careful how "Well," faltered Henpck at last,

From dawn

The problem was turned over to the firm's research department.

Their job was to find a food that would be attractive to as many species of ants as possible, and a poison of maximum effectiveness to put into the food. The mixture had to be crumbly enough to enable the tiny insects to carry it off easily ... since most ant food is stored in the nests before being eaten. It must, on the other hand, be solid enough to resist disintegration and weather change which would make it in-This meant studying the ways of

Need Extra Salt In Hot Weather

The body is actually a "heat machine" which goes through a process of demineralization during hot summer weather.

This is the claim of R. M. Rowat. an expert who states that when the body is affected by external heat it loses much of its salt content which is essential for the proper functioning of its cooling system. He explains that excess perspiraof the research comes a tip on destroying ants quickly. Place and traps outside your based on the solution of the body particularly sodium chloride. larly sodium chloride, chemical name for common salt. If the norants will still be coming in the its lack may show up in a variety of symptoms, the most severe being heat prostration.

In industrial plants where hot, humid weather often cuts working efficiency in half, many employers have placed salt tablet dispensers beside water fountains. Resultant jump in efficiency was amazing. In rural areas both stock and farmers suffer from heat due to the strenuous work in open, sun-beaten fields. Salt supply of animals can his mother. "You'll hurt yourself!" be taken care of by having salt blocks or licks made available to them. Farmers and their hired help peared he called out: "Look, Mum | can retain their comfort and energy by using more salt on their meals "Oh, be careful, Tommy!" se- or carrying a small salt shaker in peated his mother. "You'll hurt the hip pocket when out in the field and taking the odd lick of salt crystals. Salt tablets can also b purchased in most drug stores.

When you're in Spain, it's easy to recognize a Canadian at a bull fight. He cheers for the bull!

.... HOMEMAKERS You know how a 4-year-old girl will wiggle while you're trying to hang her dress. I've shortened the task by slipping a dress that has an an area here over the one to be hung.

HELPFUL HINTS FOR

even hem over the one to be hung. When a roll of waxed paper has been used, save the little "saw" from the box to cut your angel-food cakes. It makes much cleaner pieces than smooth-edged knife, since saw

ing doesn't crush the cake. When you want to hang a picture, you can prevent tiny bits of plaster from falling and making a mess on the floor if you place a small piece of adhesive tape where the picture is to be hung. Then drive the nail

Here's a trick I use to distribute the wear evenly on an innerspring mattress: I have embroidered the numbers 1 and 2 on the head and foot, respectively, of one side the mattress, and numbers 3 and 4 on the head and foot of the other side. By placing the mattress so of the bed for a week, I know the next change will be with number 2 at the head. The next week 1 turn the mattress over so number 3 is in position, then 4, and then

back to number 1. For safety's sake, hang a flashlight just inside the door of an un-lighted closet. This will discourage the use of matches when hunting for a lost glove, overshoe, or cap.

In a home where several persons wear about the same-sized hose or socks, it's quite a job to know "which are whose" after washday. Maybe you'll find this system of colored toes practical for your family. It worked for me. Mark the toes of all the socks with yarn or embroidery floss, a different color socks are hand-knit, the last few rows of the toes can be knitted in the colored yarm. Then, after wash-day, you'll find it easy to match the colors and thereby hose and socks belonging to each person.

An old tube can cake pan makes a fine stationary cat or dog feeder or chicken waterer. Drive a stake can be lifted off for washing, but pets or chickens can't dislodge it.

You won't have trouble with veils becoming wrinkled and wilted if you
