Love-More Deadly Than Drink

deadiy than drink, according to the latest Paris suicide statistics. For every person who ends his own life because of alcohol seventeen do so because their "affairs of the heart" have gone wrong.

Even so love is one of the lea spectacular reasons why some French men and women decide that life is not worth living. A musician hanged himself because, following an operation, he was unable to carry the big drum in a local band. A dress designer took poison be-

cause, at the age of forty, she was getting fat. A taxi-driver deliberately drove his vehicle into a river to demonstrate his indignation when an American walked away without tipping him.

Experts, juggling with statistic have uncovered many interesting facts about suicide-some explain able, others not. Highest suicid rates in the world are found in Germany, Austria, Switzerland, Czecho slovakia, the Scandinavian countrie and Japan. The lowest are in Spain Italy, and Ireland.

More people seem to commit s cide in May and June than at any other time of the year. The rate hits a low point in December.

Also, more people commit suicide in the morning, from 6 a.m. to noon, than at any other time of day. Although the suicide rate is highest among the Teutonic races, there is no indication that the desire to kill oneself is a racial characteristic and therefore inherited. Rather, it is more reasonable to assume tha suicide is a cultural characteristic In Japan, for instance, it is quite in order for a noble to kill himself
