### ANNE HIRST

#### Your Family Counselor

"Dear Anne Hirst: My problem is interested in marrying. I make friends easily, but when I ask girls for a date they begin making excuses."

### Same Boy! Do You Help Save Him?

The horribly starved European youngster at left above is a living demonstration of what outside aid means to war's innocent victims. The chubby, bright-faced child at right is the same boy five months after he was given special care by an agency of the United Nations International Children's Emergency Fund. At first, body-building fluids were injected directly into his bloodstream; later he was put on a carefully-controlled protein and calcium diet. Almost 6,000,000 such children have been helped by the UNICEF, but there are still millions who need aid.

## CHRONICLES OF GINGER FARM

Gwendoline P. Clarke

Well, by the time this gets into print Christmas and New Year's will be long—just another happy memory, added to those which have gone before. And, until I get myself organized so that I can personally acknowledge the letters and cards which came to me through the kind thought of some of the readers of this column, will you please accept my sincere appreciation for your good wishes. When each of you has your own circle of friends to remember, I do appreciate your kind thought in thinking of me at all. If I certainly give you a nice warm feeling, know that we have exchanged this friendly feeling.

Have you got all those lovely greeting cards gathered up ready to send away? Have you another use for them? Perhaps you do so I do take time out after the rush and bustle of the festive season to look them over once again and really enjoy them. It seems to me some folk get far more out of greeting cards than others. For instance, one elderly lady for whom I always send a card for her very carefully. Every year she gets a "Thank you" card, always get me interpretation of the design and the greeting. She is a person with time on her hands and I imagine her Christmas cards are a real joy to her for several weeks every year.

Did you know that the very first Christmas card was produced as far back as 1843? It appears that a certain Englishman by the name of Henry Cole (later, he was knighted) wanted some Christmas cards for his own use. He was a very busy man, so he commissioned an artist friend to design and produce for him a special card for him. It was then photographed and printed, and then colored by hand. This first order for Christmas cards was for a thousand cards! First of all people thought it was a crazy notion but gradually the idea "caught on" and soon developed into good business for some people, as, of course, the cards were very expensive. However, greeting cards soon became less elaborate and more popular as time went on, although, as you may have noticed, fashions change, even in cards. In the Victorian era cards were very ornate, even to call fringes and ribbons. Then came the "frosted" card—the frost effect being produced by crushed glass—remember them? From England the idea of sending greeting cards spread to the European continent but by that time the quality of the cards had deteriorated considerably. In 1874 a Boston manufacturer, company started the Christmas card industry in the U.S.A.—bringing out cards with a high artistic quality but with scenes that often had nothing to do with Christmas. However, soon after the turn of the century, Christmas cards became "really" Christmas—again with snow scenes, Nativity pictures and holy and evergreen designs. It is also this year that we have to say thank you for picturing the Christmas season as typical of the Yuletide season, another American innovation was the matching scene on each card, which is just about the handsomest thing that ever was... with that you will agree. If you have ever had the experience of being invited and then hunting everywhere to match that one, as I re-

### Holy Year

In 1960 A.D. the Church was in difficult straits. The temporal power of the Pope was threatened by local rulers. There was a struggle over the King of France over taxation of the clergy. In 1870 the Pope proclaimed the Year of Jubilee, and pilgrimages flocked to Rome for prayer and indulgences. Holy Years, Boniface said, were to be held every 100 years; until in 1470 Paul II set it at twenty-five years.

On the morning of December 24th, the bells of 500 churches pealed together. Pope Pius VII, before an audience of Vatican officials and distinguished guests, tapped three times on the Holy Door of St. Peter's Basilica. The Holy Year of 1950—the twenty-fifth—was officially begun.

The impact of the year is to be primarily spiritual—a year of re-education and strengthening for the Church. But it has political overtones, born of the political struggle between communism and Roman Catholicism. The Jubilee will also show important economic results. Close to a million pilgrims are expected in the Holy City—many of whom will spend dollars.

### Frogmen

A new way of making motion pictures of submerged wrecks, submarines, parts of ships, fish and other forms of marine life has been developed by the British Admiralty.

"Frogmen," as they are called, wear self-contained breathing apparatus and are able to work for long periods in the water, and swim like fish without stirring up mud, so that fish can be studied with cameras. The Frogmen have been used for recovering bodies of men, and for laying daylight or artificial light deep in reasonably clear waters.

### They Argue Over Clotted Cream

Between Devon and Cornwall as to which of the two counties first produced the delicacy known as clotted cream.

Devonshire claims the honour, but Cornwall denies it, alleging that Devonians smuggled the recipe across the border from Cornwall.

Even if this is true, Cornwall's claim is not altogether substantiated. For Cornishmen were taught the secret of making scalded cream by the old merchant adventurers of West Africa who journeyed from the Cape of Good Hope to the long before the Romans came to Britain.

To-day the method of making it are essentially the same as those that have been used by the merchants of North Africa for the past two thousand years.

So here's a fine recipe for the milk that has been removed from the cowshed, and while it is still warm, it is strained and left undisturbed in a cool place until the cream has risen—for eight to twelve hours according to the richness of the cream and the time of the year.

The milk is then scalded. Simplest method of doing this is by using two pans. The smaller pan containing the cream is stood in the larger one and surrounded by water.

The water is heated to a temperature of 180-190 degrees F. in winter, or 185-195 in summer. This takes about 35-50 minutes, the length of the scald being sufficient to cause the cream to break away slightly from the sides of the pan.

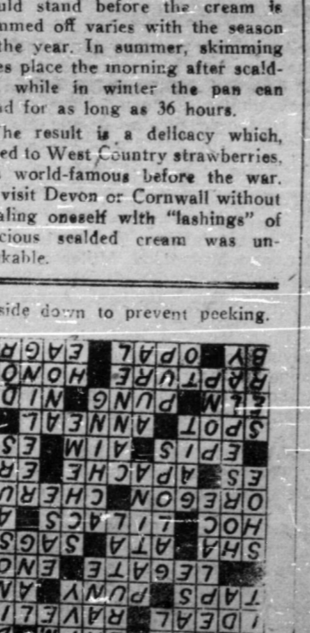

If insufficient time is allowed for the scalding the cream does not acquire the characteristic "Devonshire" flavour or show the desired crinkled appearance.

When the correct temperature has been reached, the pan is left standing in the hot water for 15-20 minutes before being taken to the dairy to cool.

The time during which the pan should stand before the cream is skimmed off varies with the season of the year. In summer, skimming takes place the morning after scalding, while in winter the pan can stand for as long as 36 hours.

The result is a delicious which was Devonshire before the war. To visit Devon or Cornwall without trying some of these "bushings" of delicious scalded cream was unthinkable.

Whenever I run across a new-looking recipe which calls for apples, I first try it out and then I pass it along in the hope it will do the same for you.

(After all, we Canadians show the best apples in the world, and why shouldn't we use them in every manner possible?)

So here's a fine recipe for APPLE CAKE WITH MERINGUE.

Apple Cake with Meringue Cream together:

1 c. butter  
1 c. sugar  
Mix with  
3 egg yolks  
Sift together  
1 1/2 cups flour  
2 c. sifted flour  
2 t. baking powder  
2 t. salt  
Add dry ingredients to first mix and mix well.

Blend with pastry blender, knives, or finger tips, until the mixture resembles corn meal.

Divide dough into two parts. Press half smoothly over bottom of 12-inch baking pan. Cover with:

Apple Filling

Peel, core, slice  
4 large apples  
spread apples over pastry layer

Sprinkle with  
1/4 c. sugar  
1 t. cinnamon  
1/4 c. chopped pecans  
4 c. melted butter

Cover with remaining pastry. Bake in 350 deg. oven 45 minutes. Top with meringue made from three egg whites left from pastry. Brown in hot oven (425 deg.) 45 minutes. Serves 8.

You'll have to look elsewhere if you're expecting to see apologies for all the cookie and doughnut recipes that appear here or hereabouts from time to time. When you have to make them so often as some of us do, and they disappear so quickly, you're glad of any new "twist" to them. So here we go.

Filled Doughnuts Makes 2 dozen

Sift together:  
5/8 cups flour  
4 teaspoons baking powder  
1 teaspoon soda  
1 teaspoon salt

Add gradually:  
2 eggs, well beaten; mix  
1 1/2 cups sugar to  
B. and in  
1/4 cup milk  
2 t. melted butter  
2 t. vanilla

Turn only once. Drain on paper. Top with chocolate frosting, nuts.

Banana Doughnuts Makes 3 dozen

Sift together:  
4 cups flour, sifted  
4 teaspoons baking powder  
1 teaspoon salt  
1 teaspoon nutmeg

Add:  
2 eggs, well beaten, to  
1/4 cup shortening, creamed  
Blend with shortening mixture,  
2 medium bananas, mashed  
1/4 cup sour milk  
1/4 teaspoon vanilla

Add dry ingredients and mix well. Knead lightly on floured board. Roll 1/4 inch thick. Cut. Fry in deep fat at 375 deg., about 3 minutes. Turn only once. Drain on paper.
