PURINA FARM RECORDS PROVE.

Unbelievable, but true! Purina Research Farm records show that 100 lbs. extra condition on a dry Holstein cow can mean an extra 2,000 lbs. of milk next lactation—to say nothing of the increased value of that cow. That's one reason why so many good dairy farmers are adopting the Purina Dairy Programme. It includes such proven rations as—

proven rations as -Purina D and F Chow — just what your dry cows need for top condition, easier calving and more milk next lactation. It's a great body and bone builder. It's cooling and mildly laxative. Growing heifers fed D and F Chow show plenty of size and strength, milk more in their first lactation and all through a longer producing life.

Purina Calf Startena - for growthy, thrifty, clean-cut calves, and a real saving in time, work and money, feed Purina Calf Startena to your young calves. Give it a try this Winter and "See the Difference Purina Makes".

Purina Milking Chows — all gear-ed to meet your special needs. Ask about them next time you're in town.

Worms in pigs around weaning time can eat up those profits at market time. Let pigs worm themselves with Purina Pigtab Granules, and save feed and labor. They're so easy and so effective. Try

PIGTAB GRANULES .

Feeding beef cattle this Winter? If so, you'll want a ration that provides the proper balance for your grain and roughage, keeps your stock eating and gaining all the time, puts on a prime finish, and gives more lbs. of gain per lb. of feed. That's a lot to ask of any feed, isn't it? Yet Purina has it in Purina Steer Fatena - the complete supplement for feeders. Ask your neighbours about the results they've had. Then, try it, yourself!

be resigning this year due to circumstances beyond his control. If this is the case at least one new Councillor will have to be found to take his place. When a situation like this supper followed with moving pictures occurrs it sometimes follows that several candidates come forward with the result that a wide open election distributed by Santa Claus.

the result that a wide open election follows. In our opinion that is what should happen every year in municipal politics. We can speak from experience when we say that it is not the most gratifying thing in the world to be returned as a member of a municipal council year after year without the endorsation of the electors on a ballot. Every citizen should be ready to contribute his or her talents in the conduct of civic business and they should be selected.

Mrs. Rae McKay and children are in Stratford where Master David McKay is in the Stratford General Hospital recovering after the removal of his tonsils.

P.M. The members of the Congregation are invited to make the pilogrimage, as did the Shepherds of old, to the House of the Lord and there bowed in adoration and praise, working the Christ Child on His Birthday. It is important that the children, should bring Him the gifts of their hearts and minds, because while there are many wonderful events that take place on Christmas Day, there is no greater event than that GREYHOUN there is no greater event than that of the Babe of Bethlehem, without whom there would be no Christmas. Christmas Day is significant in the life of St. Paul's, in that it marks the Anniversary of the first service held in the original Church, 93 years ago, when the congregation sat on boards, supported by cement blocks, on Christmas Day, 1858.

The new Church was opened on January 9th, 1898, and in order to mark the occasion this year, there will be an Ancient English Caroi Srvice of the Nine Lessons, which originated in King's College, in England. This Candle-light Service will be held on the day nearest the opening of the new Church, January the 6th the Feast of the EPIPHANY, at 7.00 P.M.

Christ Church also shares in the history of the Nativity-tide events of the Walpole Area. The original Church at Nanticoke was built about the year 1856, and the new Church was completed in 1886 and consecrated by Bishop C. L. Hamilton, on December 30th, 1886. In order to cluly observe the 65th year of the Consecration, the Candle-light Caroi Service of the Nine Lessons will be held on Sunday evening, December 30th, at 8.00 P.M.

Suggestions for a HOCKEY Merry FIRE-SAFE Christmas

C. A. THOMSON

Every year fires turn our happy Christmas Season into tragedy. Christmas res occur because extra hazards are brought into homes, schools and public buildings. little knowledge of these hazards and how to prevent tragic fires will help keep

The best Christmas safety rules to follow are common-sense rules - rules develped by fire protection engineers and recommended by the Dominion Fire Prevention

THE CHRISTMAS TREE: Remember your Christmas tree is very combustile - being filled with pitch and resin, it ignites easily and burns furiously. Care and caution

Selection: Choose a small tree instead of a large one. A small tree can be pretty and it is less hazardous. Be sure to obtain a freshly cut tree. Setting-Up: Do not set up the tree until the day before Christmas. Keep it outdoors

until ready to install. Set up the tree in the coolest part of the house, away from radiators, heaters and fireplaces. Do not block entrances or passageways. Care of Tree: Cut off the base of the tree at an angle at least one inch above original cut. Stand the tree in a pail of water filled with coal or sand. Be sure the pail is kept filled with water to about one inch from the top. This method, when

used with a freshly cut tree, reduces flammability as effectively as any fireproofing chemicals, retarding the drying out process of the tree. Removal: The needles of your Christmas tree will fall when your tree is dried or When needles start falling, take the tree down and discard it outdoors.

your tree down as soon as possible after Christmas. LIGHTING THE TREE: Never use candles on or near the Christmas tree. They are very hazardous and dangerous. Use standard electric lighting sets bearing the label of the Underwriters' Laboratories and/or Canadian Standards Association. Inspect every socket and wire to make sure it is in good condition. Discard sets with frayed wiring. A coloured spotlight focussed on the tree is very effective

Be sure circuits are not overloaded for fires may start in the walls. If the circuit fuses should blow, the cause no doubt will be too many lights and appliances on the circuit. Eliminate some of the appliances and replace the fuse with a new one

Inspect the tree from time to time. If needles near lights start to turn brown, change the position of the lights. Be sure that light builts are not too near com-bustibles. The lights get very hot and should have guards. Provide a switch at come distance from the tree for turning lights off and on. Make certain that all lighting is turned off before retiring and leaving the premises.

DECORATIONS: Cotton, paper and pyroxylin for decorating the tree are dangerous.

They will ignite easily and burn intensely. Decorate the tree lightly and use non combustible materials such as metal, glass and asbestos. Heavy decorations are

Purchase and use flameproof materials - insist on them. Flame-proofing treatments are available for home use if combustile materials are used. Fireproofing of plastics is not possible. A good home flame-proofing solution for fabrics an garments is made by mixing ounces of borax and 4 ounces of boric acid in a gallon of water. Dip the fabric into this solution, wring by hand, then hang to dry.

This flameproofing method must be repeated after each laundering of the garment TOYS: Don't buy celluloid dolls, toys and paper costumes. Toys requiring alcohol, kerosene or gasoline to generate power are especially dangerous and should be a-voided. Adults should insist that all toys they give to children should be safe and incapable of causing fire, shock or explosion. Film projectors (toy or adult) should use only safety film (acetate stock). Power toys should be operated under adult supervision. Electrical toys should bear the U.L. and/or C.S.A. label. It is dangerous to set up electric toys and trains under the Christmas tree.

FIREPLACE: If you use your fireplace, be sure a substantial screen guard is provide to cover the entire opening securely. Do not use the fireplace unless the Christ mas tree is set eight to ten feet from it. Do not use the fireplace to burn Christ

mas wrappings or decorations. RUBBISH: All gift wrappings, waste paper, rubbish, etc., should be taken outside and placed in a covered metal barrel or incinerator as soon as possible.

church halls, institutional buildings, HAZARDS IN PUBLIC PLACES: Schools, dance halls, hospitals, clubs, mercantile establishments and all places where crowds assemble need special care during the Christmas Season. Most of them will be decorated and most will be crowded during a large part of the time. Fire in any crowded building easily leads to panic, for the exits are often inadequate to take care of many excited people in a hurry to leave the building

Flammable decorations should not be allowed in any public building. Smoking should be prohibited and "No Smoking" signs should be posted. These may be obtained from the municipal fire chief. Aisles and exits should be kept unobstructed and clearly marked. Wax-candlles at church candlelight services and the use of candles near Christmas trees in churches should be discouraged.

IN CASE OF FIRE: At Home: Get everybody out of the house immediately. Call the At Public Gatherings: Keep calm. Walk, do NOT run, to the nearest exit. Call

GENERAL FIRE PROTECTION: At Home: Have operative fire extinguishers, buckets of water or even your garden hose connected to a faucet, within reach of tree.

In Public Places: Fire in any crowded public building may easily lead to panic. Smoking and flammable decorations in public buildings are a bad combination - neither should be allowed. Waste material should be removed at once. Aisles, exits and firedoors must be unobstructed. Exits should be clearly marked. Check automatic fire detection and alarm equipment, sprinklers, hand hose and fire extinguishers to be sure they are ready to operate. Sprinklers should not be obstructed by decorations or temporary partitions. Report any blocked exit or fire hazard to your fire chief.
