SPORTS &

"no overtime" rule in hockey we have been licking mildly and, of course, fruitlessly. We had two reasons for making such protests. tomers pay to see a contest played to a finish, and that when a game ends in a stalemate they don't get full value for their money.

This view, which we are by no means alone in holding, was laughed at by the top brass. Up to a couple of seasons back most big league rinks had more custom than they had accommodation and if they were satisfied, who were the rest of us to be squawking? ("The customer is always right may be the motto in some line business, but in the sport dodge, the only time he gets con sideration is when he starts staying away in large numbers.)

Our other reason, for not likthat it increased the possibility of some team, some time, scraping into the playoffs without having won a single game. (You don't think this could happen? Well, as of this writing, the New York Rangers are just two points out of the fourth, or final playoff position; and ove come from Mexican standoffs cr

When this point was brough up we were informed by all the high-power executives, and all their high-pressure mouthpieces, that supposing they did allow, say, a ten minute overtime period, ther would be just as big a percentage of draws at the end of sevent minutes as we now have at the end of sixty.

We listened. We held still. And if some of us were saying to our-selves "Oh Yeah!" we were doing so under the breath. But now it would appear as if we could say it-es well as "Sez You!" right out loud-that is, if statistics recently released by the American Hockey League have any meaning.

Officials of the American Hockey League this season restored the overtime period "to cut down the tie games." (It is interesting to note hat the AHL was hit by the empty pews earlier and harder than the ten minute extra session the game is a tie; but it ends imrediately if either club gets a goal before then.

And has it worked? Well, the nine clubs of the American League, up to January 25th, had played 38 tie games this season. The National League - which has no overtime provision and only six clubs - had played sixty ties. nt Clarence Campbell of the NHL can explain it as merely a coincidence, or some such.

One thing Campbell or any of the other big league apologists cannot get away from is the fact that, one evening a couple of weeks to a grand total of 6,122 person nest crowd since they moved into the giant Stadium 23 years making this season.

As to that, Chicago has had lousy teams for years-more of that sort than good ones-and yet. season after season, they enjoyed sellout attendances. So isn't there

Some people need less sleep than

with it and gimmicked it up. "Too | found to have increased substantlittle and too late" was a states- ially in weight. When they were man's way of summing up a certain with it and gimmicked it up? "Too much and too soon" is our per-sonal idea of what ails hockey. It's a great game, although possibly "the | Edison could be content with two fastest sport on earth" is a slight exaggeration. But even were it twice as good a game as it is, it still wouldn't be strong enough to slop over into the baseball season at both ends, and especially in a country where, to ninety per cent of the population, it is still an alien pas-Which is just what hockey has

been attempting to do. Go Without Sleep If You Want To Get Fat

Research statistics show that

with longer nights you go to bed | during the night and rarely remains a little earlier and perhaps sleep a little sounder. Physicists have been puzzled by the riddle of sleep. Now the searchlight of science is flashing into the darkness in which we spend a third of our lives. The researchers have even discovered the source of sleep. They have proved

we never sleep like logs and they declare that we dream every night, whether we remember the dream or Deep down at the back of the skull is an organ no larger than this printed lettering. It is the centre of sleep. While we slumber it is awake and alert. When it drowses we resume activity. The sleep centre must wake before we and still permit them to have a far sleep. Scientists proved this when

they brought a fine platinum wire into contact with the sleep centre of a dog and administered a mild electric shock. Instead of the dog a famous universtity. It takes a leaping into startled action, he immediately went to sleep. Medical men have believed for a long time that drowsiness is caused by carbonic acid gas in the blood,

consequent upon the slowing down of the blood stream. They have watched sleeping persons as in cases in which the skull has been trephined (opened) and the brains exposed to view. The heart beats more slowly, the blood pressure falls, the brain is left with a poor blood supply. This happens and you are asleep.

ago, Chicago Black Hawks played If only we knew how, perhaps we could measure and weigh that something in the blood. That the blood itself becomes charged with ago. Now they're trying to say that, sleep was proved when a dog was the sole reason or this is the poor showing that the Hawks have been iod. A sample of blood from the sleepy dog was injected into another which was wide awake. Promptly the second dog went to sleep.

The existence of a "Sleeping essence" seemed similarly to be indicated when experimenters subjected just a bare possibility that there's a number of students to wakeful-

THE FARM FRONT by John Russell

"Re-examination" is the big word | thing to think over when you around Ottawa, Washington, London and various other points; and perhaps a spof of re-examination not be a bad thing for many Cana-

Why not sit down and give a few honest thoughts to your way or farming? Ask yourself such quesof farming suit my type of land? time and labour? Is it in line with my ability, also my likes and dis

Farming successfully simply demands such re-examinations of old just because you farm as you found that out thirty or so years ago. * * *

"I went along losing a thousand farmer, recalling the years which I figured that it was just the de bound to get better before long."

But that depression lasted close to twenty years; and as you'll recall housands went broke while waiting for old farming methods to start making money again.

"Well, times finally did change," that same farmer says now, "and for ten years you just couldn't help making money." But from the tone of his voice, a listener could pretty well tell that he thinks times may very well be changing once

The exact methods which made plenty of money in the last ten war years may fail you badly now, as costs continue to rise. The fact is that comparatively easy times some mighty poor business methods into farming. So why not take time this winter to scrutinize your present methods? It may take a day. It may take much longer. But it also may serve to keep you pros-perous and out of financial trouble in the years to come.

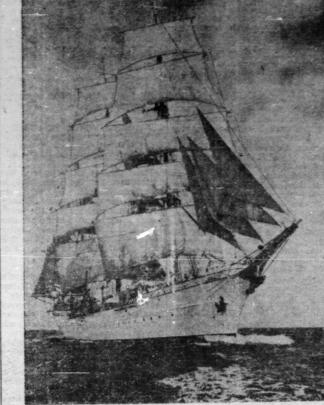

Are you a dairyman -- a cash grain farmer-a cattle feederdo you go in for raising pigs? Let's try taking each class separately.

FOR THE DAIRYMAN: The lairy cow is a huge const high-quality rough feed. Therefore, dairying is perfectly suited to that have lots of grass, with small fields that can be planted to corn or other crops for silage. It's the sort of farming for the small farm with plenty of year-round

For the farmer with that kind of place—and the necessary buildings -there is no question about the sort of farming. Neither grain, pigs or beef cattle would be as profital But dairy farming is not limited to good land can be made into a dairy farm. A large place with rotation pastures can produce the bulky eed. But—and it's a big but—you • must have the labour.

The problem the dairy farme should give greatest attention is milk and butterfat production per animal. Recent studies prove that one cow producing 400 pounds of butterfat makes more profit over eed cost than four cows producing 200 pounds of fat per animal.

Rare Beauty-You can travel the seven seas for a long time these days without seeing this beautiful sight-once so common. It's the square-rigger Eagle standing out to sea. The Eagle was formerly the German navy's schoolship Horst Wessel.

ed flowers, and there were many fruit trees. There were black oxheart cherries and, if memory plays me no tricks, cherries, to be at tree on which they grow. There were bushes of red raspberries What I have said of the apples compared to ordinary apples applies also to the raspberries; but this comparison of ancient and mod-ern pomology may be influenced by the former's advantage in having its specimens go direct to the consum-er. I will concede that the flowers

The hog farmer, like the grain farmer, can shift to either beef

ening, and I affirm without hesita tion that modern caterpillars and grasshoppers are unworthy of their sires. Apparently there have been garden and orchard of my grand-father's house. The outstanding feachanges in the floral kingdom, too. I never see nowadays such things ture in this memory is the tallest as fuchsias and bleeding-hearts. tallest apple tree I have ever seen, What they tell me is honeysuckle apparently of a patriarchal age, but growing around the cottages bearing in great quantities wondersummer resorts, a yellow flower ful apples, the like of which I have well enough in its way, is not the never found; golden yellow in color, honeysuckle of childhood's happy pear-shaped and of an unparalleled hour. The latter was a cluster o sweetness and flavor. I have sought small trumpets red and pink, superin many markets for the lineal descendants of these apples of Hesstitute. Modernists may claim that perides. At times I have seen the sunshine of the present is not some nearly as golden in hue and inferior to the mid-Victorian article, pear-shaped somewhat; but the first but in our garden and orchard it had exceptional material to reflect they might be, but not the same. In this comparison I am not like upon and consequently appear at its best. The sunshine in that garden branches of a cherry tree or from that in this country the mirrors the higher altitudes explored in a were very inferior to those she had grapevine swing was displayed to used years before in Germany, great advantage and I diffidently Others besides myself have rememexpress the opinion that it was bered those apples and sought vain-ly for their equals. Wound all perior to any that is now offered. It is possible that I am prejudiced, - but it is all quite vivid in memory grapevine, with coils climbing and only sixty-five years having passed.

From "First Nights and First clutching it from trunk to top branches, and this vine bore quan tities of luscious grapes. Perhaps the grapes and the apples worked

Editions," by Harry B. Smith. Baby Comes Through Nightmare Journey

To come safely through a 15,000mile journey-from the desolate wastes of the Gobi Desert to the hustle and bustle of London-over towering mountain passes, through insect-ridden swamps, travelling alternately by lorry, train, bus and boat, is always something of ar achievement.

But how much more of an ach-

ievement if the traveller turns out to be an eight-months-old baby! Little Michael Spencer had been born only five weeks when his parents, New Zealand doctor Robert Spencer and his young wife, sei out from Northern China-where they had been establishing a hos they had been establishing a hospital—on what proved to be a nightmare journey to England. They stayed in tiny mud-hut villages endured fierce extremes of heat and cold, lumbered in lorries over dusty mountain roads and were jam-packed for countless miles in overloaded, evil-smeiling buses and trains that crawled through lands of mystery.

Once, Michael went for over 150 miles clasped in his mother's arms on a truck carrying gasoline

mighty works there because of their unbelief." Jesus worked in response to faith. Now He proposed to feed a multitude of five thousand ment for fishing, hunting, boating, camping, golf, skiing and other sports.

One of the focal points of interest during the eight day show will be the big stage and water revue in the arena of the Coliseum. The program here will again feature Shar-key, the amazing seal, as the star. The program will also include canoe tilting, log rolling, swimming, diving, demonstrations of fly and bait casting, trained horses, performing dogs and other thrilling

acts.

During the last four days of the show two dog shows will be held for the benefit of the Humane S ing canines in both Canada and the United States will be on display. Profits from the show, as has been the case in the past, will be Hunters' Association to carry on an extensive and varied program to conserve our natural reso our wildlife of forest, field and stream.

OATMEAL is BEST for CHICKS!

Here's why

FUL-O-PEP

CHICK STARTER

GETS BETTER

RESULTS

1: Nutritious Oatmeal Base

2. Green Grass Benefits

3: Animal Protein Factor

4. The Sunshine Vitamin

5. Coarser-More Palatable

Ful-O-Pep Chick Starter

gives your chicks extra growth power.

than other Chick Feeds

It's more digestible than other grains . . . supplies more of the important proteins, vitamins and minerals . . . develops stronger. well-formed bones. Oatmeal is still Nature's best grain for health and growth.

FUL-O-PEP CHICK STARTER

is built around **Nutritious Oatmeal!**

Because of its nutritious oatmeal base Ful-O-Pep Chick Starter gives your chicks a quick, sound start to help them grow into healthy, robust birds.

The First 6 Weeks Make a BIG Difference!

Yes, those first vital 6 weeks are really important. The egg production and profits you will get later depend so much on how you feed and care for your chicks now. Start them right. Feed tested and reliable oatmeal-base Ful-O-Pep Chick Starter. It provides the proteins, vitamins and minerals (in proper balance) which build strong healthy frames for heavier egg production. At the same time

you get far less mortality. Ful-O-Pep chicks live to lay!

Available in Mash or Crumble Form
