a letter recently appearing in the Stroudsburgh, Pa., Daily Record, and it is worth reading for anyone who may, currently, be riding on a cloud

"Once there was a farmer who raised corn and a man who raised hens, but no corn. So the man agreed to work for the farmer one day a week for \$5.00 a day. And the farmer agreed to sell corn to the man for \$1.00 a bushel.

They paid each other off every time with the long green. The farmer paid the man \$5.00 and the man paid the \$5.00 back to the farmer provent after a while the man said to the farmer, "everything's gone up, and I regret intensely to inform you that I can't work for less than \$6.00 per day."

The farmer said, "I understand.

The farmer said, "I understand, but you must understand that everything has gone up with me, too, and I regret intensely to inform you that I can't sell my corn for less than \$1.20 a bushel." The man said he understood. So the man got \$6.00 a day and at \$1.20 a bushel paid the farmer \$6.00 for five bushels of corn. Both of them said "happy days are here again."

Mr and Mrs. Herbert Peacock, of Crystal Beach, were in Jarvis on Saturative wedding.

By and by the man said to the farmer, "things have gone up still more and I can't work for less than \$7.50 a day." The farmer agreed that was fair, but told the man things were going up still higher with him. He would have to get \$1.50 a busilel for his corn. The man agreed that was fair and both said "prosperity is here."

After all, the man was getting \$7.50 a day. The farmer was getting \$1.50 a busilel for corn, and the hens were getting five bushels as always. And so things went until the man things and attended the Fulsom—Tair wedding.

I ADMIRE THE HUMAN RACE ---

- By Roger William Riis -I ADMIRE the human race. I do, indeed. Every-body is busy running us down, these days, for the mess they say we have made here and there and everywhere. Pshaw That's short-range stuff, a worm's-eye view of our world Over the marching and abundant centuries, we haven't made any mess. Far from it!

We have done and are doing a better job than anyone

has any right to expect. We're all right! From the beginning, we found ourselves alone in a vast universe, and not only alone but the only living thing on this planet which could realize its loneness. We realized it, gave it a good close look, and then turned our attention to making something practical and useful out of an unprecedented situation.

First of all, we found for ourselves a Light, a God, and we got a sense of direction, a goal to work toward. This was pretty clever of us, if you think of it carefully. We proceeded to set up standards for our living together. Early in our experience we made the revolutionary discovery that gentleness and kindliness were more practical than brute strength. No other species has ever found that

out and used it as a model and practical code of conduct. We have in actual fact no one we need answer to. beyond ourselves, and yet we observe our ideal standards in remarkable degree. We are honest and trustworthy one with another so that it is the exception, it is news, when we commit a theft. We are decent 99 per cent of the time, when we could easily be vile. With silence and mystery behind us and ahead of us, we make up gay little songs and whistle them, and our feet keep jig time to them. We look life and fate in the eye, and smile. I like that, and I admire the people who do it.

Alone among all living things, we have discovered

Beauty, and we cherish it, and create it for eye and ear. Alone among living things, we have the power to look at our environment and criticize it and improve it.

Finding it necessary to live together by the millions, we created for ourselves governing systems covering vast geographical spaces. Now we actually have the thrilling and terrific idea of a world government, a global government to bring justice to white and black, to Eskimo and Afrikander, rich and poor, not because any tribe is powerful and can exact justice, but because we have conceived and created the ideal of justice and plan it for all men. This is great. This is not the act of a little animal, or a mean animal. This is possible only to a great animal. We think in global terms. We inhabit a star, and we

Finding that we have to work to stay alive, we work with ability beyond imagining. Out of the earth we take food, and improve that food year by year; we take heat, and light, so that darkness which lay upon the face of the earth is dispelled by man-made light. We enjoy all the myraid products of our unparalleled ingenuity. Every morning the necessity for the day's work faces

us. And we go and do a day's work, with an overall average effectiveness and perseverance that is amazing, considering many of the jobs. Of a persistence, a daring and ingenuity impossible to surpass, we find ways to move easily under the water and through the air. Now we speculatively eye our neighboring planets. It should astound no one if man one day begins to move among these planets. How shall I not admire such a creature? Daunted by nothing, his heri-

zons constantly recede, the territories of his possession and use expand and expand. Whenever he comes to an impassable obstacle, an apparently final barrier, he goes to work at it and, in due time, surpasses it. If he has limits, I do not see where they are. I do not think he has limits. I think he is a child of the universe who inherits eternity. I think he is worderful, I am his devoted partisan, and I am proud in-

ricolation.
