Today's Teen-Age Trend Is on Head-to-Toe Cleanliness

WITH the waning of the age of sloppiness, teen - agers throughout the country are learning that messiness of appearance does not necessarily denote a casual attitude towards life. Actually, real nonchalance more often the off-shoot of selfassurance about your looks than the result of tumbled frowsiness. A nagging worry that your ap-

pearance isn't up to par, despit the current trend, can underminyour poise.

Proper hair care doesn't mean a young girl is to plaster her locks down in formal coiffures. It does mean that a fly-away arrangement is no excuse for uncleanliness or lack of gloss. Keep your hair-do youthful, but suggest your latent maturity by faithful adherence to a routine of frequent shampoos and nightly brushings.

Neat, well-brushed clothes and clean polished sheep are as indi-

is almost certain to house just that sort of dog. Watch it, sometimes,

among your friends and their pets.

Environment can be overstressed

however. An animal's native tem-

perament, its background, also have influence. You cannot expect a pup-py of stolid parents to be bright and vivacious, or the other way

It is equally certain that you and

Neat, well-brushed ciotnes and clean, polished shoes are an indication, too, of your developing self-pride. If yours are the traditional saddle oxfords, encrusted with grime and dirt, start a new white grime and dirt, start a new white shoe polish.

sance in a city or town these days | so in the rear, if that's where you is more or less of a necessity on a farm, This is especially so in It is, then, the dog's inclination to copy, to take on the attributes of those about him, which ought always to be in your mind. For it have only 2 or 3 people living on

them, and prowlers and sneak thieves are so plentiful. is you who determines what his environment is to be. In house-holds where the people move and speak-quietly, the average dog will be likely to act the same way. On Far too many dogs are spoiled, right at the start-by stupid or carethe other hand, a noisy establish-ment, full of nervous excitement,

less training; so perhaps a few words along that line might not be amiss. The powerful tendency of a dog model his behavior on that of

his master is used to advantage by trainers. And they use it right from the start. When a puppy is to be accustomed to guns, a trainer will in all likelihood discharge one at a distance of, say, fifty yards. The puppy jumps, startled. After which, almost always, he quickly looks around to see how his trainer is taking this threat. Observing that the trainer is walking calmly along as if nothing had happened, the pup follows suit. A few repetitions of this and he may soon exhibit no

more concern than the man. Your manner of introducing him to all new experiences is a major factor in the dog's development. There is the automobile, for example. A few dogs get desperately carsick. I am not talking about them; they are like the small per centage of human beings unable to cope with seasickness. Instead, I'm discussing the sizable group that

need not have been addicted to carsickness. The way the puppy first meets this new experience is what counts.
When you first put your puppy
(as young as possible) into the car,
perhaps you won't do more than place him on the floor for two or three minutes. The next time, start the motor but not the car; talk and play with him in a normal way, giving him a little tidbit to associate with the strange sound and vibration. The following step as a three to five-minute journey, dur-ing which you talk to him in a matter-of-fact voice. Gradually, the length of the trip is increased. You should soon have a puppy who
