Greatest Crater

The great Chubb Crater, which

was discovered last summer by a

prospector in the isolated wilder-

ness near Hudson's Bay, has just

been measured by National Geo-

graphic Society scientists, who were beset by August snowfalls.

They report that it is 1,350 feet

as famous El Diablo Crater south

west of Winslow, Ariz. The Chubb

Crater is about two-and-one-half

miles across; El Diablo gapes

three-quarters of a mile from lip to lip. El Diablo was previously

believed to be the largest crater

in the world. The origin of the Chubb Crater is not known, although it is assumed to be a meteoric crater, smashed in solid granite between 3,000 and 5,000

the insecticide; but that the nearer

oculation made underneath.

entomologist raises and cares for

insecticides such as DDT.

like a whale of a lot of beef. But that's the amount of production that has been achieved at the Everglades Experiment Station down in Florida in tests made over a five-year period. The average production for the five years was 1804 pounds of beef per acre per year and the highest was 2089 pounds the official statement says. This record was achieved through proper improvement of grasslands

and management. The use of lime and fertilizer, careful selection and treatment of grass seed, and wise choice of cattle breeds were other contributing factors in obtaining this phenomenal weight in beef om a small acreage. The grassland programme had a

further advantage of conserving the muck and peat soils in that area-soils which were being rapother row crops. During the last 25 years the depth of the soil on many of the farms was reduced by St. Augustine grass was one of

the best producers, although Pangalo, Coastal Bermuda, Carib, Para and Pensacola Bahai fitted into the lemon rind. some situations. Braham, Angus and Devon were the popular cattle preparing his flies for the tests, Dr. Fisher first anaesthetized them. Plants That Grow

and the like-the sort of things that are so hard to keep on hand, especially when those school nches-and after-school snacksuse up so many. PECAN PUFFS

1 cup shortening
1/2 cup sifted confectioners' sugar 21/4 cups sifted flour 1/2 teaspoon salt 1 teaspoon vanilla 3/4 cup chopped pecans Additional confectioners' sugar Cream shortening and the cup sugar. Stir in flour, salt, vanilla and pecans. Blend well. Mold

into one-inch balls; place on greased cooky sheet and bake 12-15 minutes at 375 degrees F. Roll in sifted after baking. Cookies may be re rolled in sugar after cooling i desired Makes two and one-ha DATE BARS

1 cup pitted dates 1 cup nuts 1 cup sifted confectioners' sugar 2 eggs 1 tablespoon melted shortening 1 tablespoon lemon juice
1/4 cup sifted flour 1/2 teaspoon salt
Put dates and nuts through food

Roll 1/8 inch thick, cut with round or fluted cooky cutter, place on ungreased cooky sheet and sprinkle lightly with sugar. Bake 6-8 min-utes at 400 degrees F. Remove to cake racks. Makes 4 dozen

CHCCOLATE DROP COOKIES

½ cup shortening 1 cup sifted brown sugar 2 squares melted chocolate 11/2 cups sifted flour 2 teaspoon salt teaspoon soda

cup sour milk 2 cup chopped nuts Blend shortening, brown sugar, and egg; add melted chocolate. Add dry ingredients, which have been sifted together, alternately with milk. Stir in nuts. Drop from a teaspoon to greased cooky sheet. Bake 12-15 minutes at 375 degrees Ice with chocolate if desired. Makes 3 dozen cookies.

GINGER CRISPS 2 cup butter or margarin 2 cup light molasses 2 cup sugar 1 tablespoon vinegar 1 teaspoon cinnamon

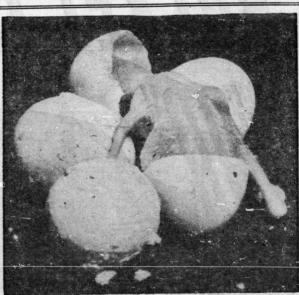

1/2 teaspoon ginger 11/2 teaspoons soda Combine butter, molasses, sugar and vinegar in saucepan and boil three minutes, stirring constantly. Remove from heat and cool, Combine cinnamon, soda, and ginger Add to cooled butter mixture/and blend well. Wrap in waxed paper and chill several hours or overnight Roll very thin. Cut with 2-inch cutter, place on greased cooky sheet and bake seven minutes at 375 degrees F. Remove from sheet while warm and place on cake rack. Makes 10 dozen paper-thin cookies.

Buys Fireflies

Dr. William D. McElrov, Johns ounty of 25 cents for a hundred fireflies, with cash prizes offered voungsters who catch the most e wants half a million fireflies, if he can get them, to study their method of producing light. So far he has established that the energy source for light production in the firefly is the same as that used for animals in doing work. This means that the vitamins which in animals free energy are necessary for ligh production. So are certain trace elements, such as magnesium and cobalt. Dr. McElroy is particularly factor which appears to have the riboflavin and niacin. The nature of this "X factor" remains to be

HIDDEN TALENT Mrs. Smith thought that \$4.00 was a very reasonable price to pay for a thoroughbred police dog, so she cut out the advertisement in a local paper and wrote a cheque to the owner.

A few days later a mangy-looking mongrel was deposited on her door step. She indignantly 'phoned the man who had inserted the adver-tisement, and demanded: "What do you mean by calling that animal a thoroughbred police dog?" "Don't be deceived by his looks, came the solenin reply. "He's in

Forget Something?-A baby parakeet breaks out of its shell into what someone once called "a cold world," a logical description considering such a nude approach to it. This little "ugly duckling" of the parrot world-parakeets are close relatives of parrots will, when fully grown, be slightly larger than a canary.
