seriously in this regard around election time. Now take us for example. We want to be fair, but we wouldn't want to be made take an oath about being unbiased. If you haven't any definite ideas it seems to us you would be just like an old steamboat going down the Niagara River without a rudder. Of course, in any event you would most likely

yn-Noranda Press publisher was fluenced by any newspaper or media

Of course a lot depends on a Publisher in determining what is fit to print. Obviously some publishers take their responsibilities much more take their attention to their Winter proposition to the proposition to the proposition to their Winter proposition to their Winter proposition to thei

will be just as popular. Registrations are already being received by the Department of Agriculture at Cayuga even though the official announcement has not yet been issued.

Hog gradings for the month of September show that a total of 1276 September show that a total of 12:0 head passed over the scale. Of this number 487 head or 38.16 per cent were in the top grade. A year ago 1414 head were marketed during the same month with 44 97 per ent or 636 head being in the A grade. This shows the decided drop in the mark-eting of top grade pork from this county. It is realized that many a high grade product and that labour to maintain its place as a source of good bacon products, something must be done.

This is the season for the collect-ing of wild mushrooms and each the same old questions come up as to whether or not such and such a mushroom is edible or not.

The answer to this problem may be given in a new bulletin entitled. Whishroom Collecting for Beginners." As the fly leaf states this is a bulletin intended as a guide for the beginner who would like to use some of the wild mushrooms for food. A copy may be obtained from your nearest agricultural representative — 0.00
Milk producers should at all times bend every effort to the production of a high quality product. One of the factors in high quality product. One of the factors in high quality production of can milk can be produced with a reasonable amount of care to see that the udders and rear quarters of the cow are properle cleaned milk. Clean milk can be produced with a reasonable amount of care to see that the udders and rear quarters of the cow are properle cleaned before milking, that the milking machine is kept clean, if a machine is used, and that the hands of the milker or operator are also son farm folk will soon be turning their attention to their Winter program. This will include the regule is lar Farm Forum programs to be given in a new bulletin entitled when the first machine of the soil unless it is there to the soil unless it is the to the soil unless it is the to the soil unless it is the successful farmer to see to it the soil unless it is the to the soil unless it is the form of straw, growing crors. better watch out or we will all be reging on a restricted diet. These days a farmer doesn't harvest a crop with a couple of horses, a plow and a reaper. Since no one will work for a farmer at wages that he can afford to pay he has had to go out and invest heavily in machinery to do his work. In so doing he is steadily adding to his capital investment and thereby making his assets top heavy in relation to his income—if he isn't making more money than he was in the old days.

After the meeting in the Town Hall on Monday night the chairman of the new Jarvis and District Community Hall was holding forth outside to anyone locally that would listen to him. "How much more evidence do we need" we heard him say, "before we build a community in the have a cach Farm Forum in the tot watch the series on that night.
