Your Pullets Will Really Lay and Pay on this Purina

This Helps, Too!
Make Sure
You are Not
Wasting Feed
on Parasites:

Even the best of feeds cannot give you the results of what it is capable of if a large part of its value is going to support parasites, internal or external.

Worms, lice and mites eat, cut down your egg income very sharply. It's well worth while to make sure they are not doing it.

Most pullet flocks are infested with roundworms - some more, some less. It's easy, effective, and economical to worm with Purina Check-Up. The first extra egg will pay for the treatment!

Boost Pullet will handle the lice problem - insect oil the mites. Check up, and use if you need these products.

YES, if you want lots of Fall eggs without the body run-down that so often sends a pullet flock into a slump just when they should be laying and paying their best, follow Purina's "Body and Egg Plan".

You see, during first 4 or 5 months of laying, your pullets are still growing and developing. So you are asking them to do 3 jobs or more. That's a heavy strain. Many flocks on ordinary feed find it's too much for them.

What they need is extra-ordinary feed! That's what Purina provides. Laying Chows that have what it takes, plus a new product, Poultry Booster Checkers, to take care of the extra demands of that critical 5 months. Come on in to the Store with the Checkerboard Sign, and let's talk it over.

Make money on funny pigs! Why, that's impossible, you say! Not if you give them a boost with Purina Pig-Plus (concentrate) or Pig Startena (ready-mixed).

BOOSTERS for PIGS

Give those cockerels two weeks on Fatena Checkers before you market them, and they'll pay off in weight and finish. Just pen them up, and feed them.
