from Down Under won the Davis Cup, emblematic of world tennis superiority, so that at least one major sports triumph went to the lean credit side of the British sports ledger before 1951 closed out.

But that isn't exactly the point we had in mind. What we wanted to say is that the over-all Australian Davis Cup record. s almost miraculous.

From a scant population (somewhere in the neighborhood of 10,000,000) it has for 50 years developed some of the greatest tenni players in history — Anthony Wilding, the all-time No. 1 southpaw, Sir Norman Brookes, Gerald Patterson, James Anderson, Pat O'Hara, Adrian Quist, John Bromwich and now, in the last couple of years, Sedgman, McGregor and Rose. Despite a comparatively meagre population to draw from, Australia has during the period since 1900 sent 20 of its teams into Davis Cup challenge rounds and its players have won nine

The United States, provided with talent from the great California tennis mill, has participated in 33 challenge rounds and of these has lost more than it has won. The score is: U.S. 15, Opponents 18. In ratio of population, Australia tops them all in

tennis success. The Aussies defeated powerful British teams twice and the United States squads seven times, with Brookes and Wilding doing the racquet swinging for the Aussies on four occasions. Australia was not knocked out of the picture by the first war y World War II either, despite staggering losses of man-per. Its players made the challenge round 13 times, from 1919 ugh 1951, but lost twice to Great Britain, nine times to the ed States partly due to the reign of the famous "Big Bill and

Little Bill" (Tilden and Johnston) combination. How long they can hold on is another matter in view of How long they can hold on is another matter in view of the quantity production in the United States. But they won it against the best the United States could produce, even though there was nothing in the 1951 series to compare with one of the most famous matches of Davis Cup history. That was in 1914, when Australia's Brookes and Wilding played together for the last time. America's "Comet" McLoughlin and Brookes were opponents in a terrific match, the first set of which went 32 games, the longest in Davis Cup history for many years. The Comet finally won in straight sets. omet finally won in straight sets.

The Aussies, however, won the title, 3 matches to 2. Both Brookes and Wilding then went to war and Wilding was killed with thousands of other Anzacs in the Gallipoli campaign. So, this observer believes, a rousing cheer, a verbal pat on the back, and a hearty nod of appreciation is due to the hardy Australians, who produce quality despite a lack of quantity.

Calvert distillers limited AMHERSTBURG, ONTARIO

"Anyone can get the ball over the plate," he said scornfully. "It's fast hall him If he's standing back learning to nick the corners that nakes such a big difference. Control comes only from experience nd from work. Most young pitchers make the mistake of exceedng too hard. They lose control. You have to find what your proper gait is and stick to it. Then, when you have the batters used to your proper gait, you can slow down or

* * * These are words which any young gaffer with dreams of becoming another Christy Mathew-son or Grover Alexander should treasure, for they come from the lips of the gent who-on his record in 1951 and up to now in 1952-knows more about the art of hurling than any present-day moundsman.

We refer, of course, to none other than Sal "The Barber" Maglie, pride of Niagara Falls, Ont.

"I'd say that five of seven pitches I throw are curves," continues Mr. Maglie. "Yet I might throw nothing but fast balls at a batter, merey to cross him up. I watch every hitter. If I catch him leaning over

Garfield Dead - Screen actor John Garfield was found dead New York apartment. The 39year-old actor, who was grad-uated from a school for problem movie "tough guy."

fast-ball him. If he's standing back for the fast one, I'll hook him. Of course I've studied every batter and never give him what he likes to hit—if I can help it, I mean."

The Barber admits that he learned most about pitching while playing for that wily master of the art, Dolf Luque, both in Mexico and Cuba.

"He taught me to bear down on every pitch, to remember the hitters and to keep constantly in mind where they hit me. Because my curve couldn't break too well in the rarefied atmosphere at Mexico City, I concentrated on putting the ball exactly where I wanted to put it, thus gaining control. Usually I'd just show my curve to get 'eni cautious and then come i.. with the fast ball. Another trick I picked up was the manner in which I threw

my curve. "I had been in the habit of letting it go high on the downsweep of my arm. But now I throw it from in front of me so that it comes out from my uniform. The batter can't see the ball until it's on top of him. "How many types of curve do 1 throw? I guess the count is three.

I break one like a slider. I have one that goes down, an old-fashioned drop. I have a third that breaks down and away, an outdrop the old-timers might call it. But all come at varying speeds. Oh, yes, I also use an occasional sidearm curve that isn't a bit fancy.

It's just an ordinary curve."

Just the other day, according to Arthur Daley in The New York Times, Dutch Ruether was talking about Maglie.

"He reminds me more of Grover Cleveland Alexander than any modern pitcher," said Ruether. "He never makes the same mistake twice. The first time I ever batted against Alex was in 1917 and I smashed a wicked line drive. I hit against him for the next nine years and I never saw that same kind of pitch again." similar job on scratched mahogan

Unaware of that fragment of conversation, Sal speedily confirmed it.

"The new fellows give me the most trouble," said the Barber. "I couldn't get rid of Merson of Pitts- rubbed on the stained area. And on clean longer.

burgh for the longest time. But it won't happen any more. I know him now." His jaw jutted grimly.

"Naturally I have certain diffi-culties with Stan Musial and Jackie Robinson," he added with a thin smile. "Who doesn't? They don't guess. They hit with the pitch, pulling an inside pitch and slicing an outside one to the oppobothers me more than he should. I know he's a high-ball hitter, but

"There are days, though, when Sometimes it's when the atmos-pheric conditions are bad. For inpheric conditions are bad. For instance, when the wind is blowing in, the curve won't break properly. Other days I just don't have it. However, I always know right

Other teams say that they have to get to Maglie in the first two innings or they won't get to him at all. It usually works out that

The Profundity Of May

Apple blossoms are pink and white in the orchards, and the bees are working overtime. Violets bloom in the lowlands. Dogwood whitese in the working of the control of the c bloom in the lowlands. Dogwood whitens in the woodland, and along the grey stone walls the windflowers blow, the bloodroot still blooms and jack-in-the-pulpit and Trillium open big, new leaves and prepare exotic blossoms. The brook runs bank-full; the pond laps at its high-water mark April; a pint are leaves and prepare the standard prepare was a prepared to the standard prepared to the standa high-water mark. April's rains are past and May is, initially at least, full of growth and sunshine.

And there is the profundity of May. There is a notion that any-thing with a depth of meaning must be hard to understand, must be written in an obscure language and reserved for the few. Yet here is May, a time of tremendous fundamentals and miraculous matters, all of them spread before us, flagrantly demanding attention. Its language

is as simple as a new leaf or a buttercup flower.

Here is the fundamental of life, the whole process of germination and great the state of the stat Here is the fundamental of life, the whole process of germination and growth. Here is flowering and fertility and life preparing its own renewal. Here are sunlight and water being turned into food, photosynthesis, an even more profound process than atomic fission; and it goes on in every blade of grass every tree leaf every weed. grass, every tree leaf, every weed in the gutter, no more secret than sunlight. Here is abundance, and growth and beneficience, so much of it that the world seems hard of it that the world seems hard put to contain it all. It constantly spills over, outreaching itself in abundance.

And there is another of the simple profundities of May. One
