

THEY CALLED HIM THE "DANGEROUS POET"

History plays strange tricks with the famous. Most people writing good verse, but whose morals were unimpeachable. Yet Byron had great strength of character. He should have gone down to posterity as the Warrior Poet, and not the Dangerous Poet, as he was dubbed by Lady Caroline Lamb.

If he was glamorous and attractive to women, it was due to his strength of will and not to nature. At nineteen his nickname was "Mozart" which was below average height, yet his weight was 200 pounds. He had no waist and a pronounced limp. There was no thought of women in his mind when he decided to go into seclusion and experiment with diets in the hope of reducing his weight. For two months he lived on biscuits and soda water, forced himself to keep to it, and returned to Cambridge unrecognizable. Stripped of his fat, he was slender, and his face finely chiselled. With much less weight to carry, his limp was almost unnoticeable.

It was not until then that women began to admire him, and he was long list of affairs which has made him notorious began. Before he is judged for these it must be remembered that he was only nineteen years old at the time.

He had a large fortune and a title, so it is not surprising that he threw many wild parties which scandalized the villagers of Newstead Abbey and the surrounding country. The descriptions of them which have sur-

vived suggest that they were little more than youthful "bashes."

On one occasion he and his friends frightened the villagers by wandering round the village dressed as monks and drinking Burgundy out of a skull.

Once he even killed a horse by dressing his cutthroat friend as a man and introducing her as his brother Gordon.

The publication of his poem, "Childe Harold's Pilgrimage," made him famous and much sought-after in London's social circles. He developed a taste for the dramatic, wore open-necked silk shirts, brightly coloured cloaks, and no hat.

The ladies of London's social set were no different than the girls of his college days. They unashamedly threw themselves at his head.

He was the original exponent of the "treat 'em rough" school of lovers.

The dirt that has remained on Byron's name was thrown there by a very vicious woman, Lady Caroline Lamb. She almost forced a life of staid conformity upon him, and when she died, as all his affairs did, he refused to accept it. She went as far as to stab herself in public and write scurrilous letters about him.

To still the scandal Byron married, but it was not a successful marriage, and after his child was born his wife left him.

His final love affair, with a girl named Teresa, was the most interesting, and through her he was introduced to the underground movement to set Italy free.

In 1822 he joined the Greeks in this fight for freedom, and it was real Byron came to life. By his own efforts he organized the movements, planned the moves,

arranged for medical supplies, organized food and welded movement into a first-class fighting force.

The Greeks worshipped him. He had lived to see their efforts successful in the field, and he was a school of his own. His strength faded, and he died, as all his affairs did, he refused to accept it. She went as far as to stab herself in public and write scurrilous letters about him.

To still the scandal Byron married, but it was not a successful marriage, and after his child was born his wife left him.

His final love affair, with a girl named Teresa, was the most interesting, and through her he was introduced to the underground movement to set Italy free.

TABLE TALKS Jane Andrews

Not so long ago, in the days of the hard-on-the-muscle "trank" freezer, home-made ice cream was a delicacy which most families enjoyed not more than once or twice a season. But now, with the advent of mixes that can be used in the freezing-tray of your refrigerator, ice cream isn't any harder to make than an ordinary dessert.

So here, then, are a few recipes which I hope will be a help to you.

Many ice creams are made with a gelatin base; here is one with lemon flavor that will prove a favorite with many families.

LEMON ICE CREAM
1 cup lemon juice
1 tablespoon grated lemon rind
1/2 cup sugar
1/4 cup cold milk
1 envelope unflavored gelatin

Soften gelatin in cold milk. Add hot milk, sugar and salt and stir until gelatin is dissolved. Add lemon juice, light cream and lemon juice (the mixture will thin and disappear during freezing). Pour into freezing tray and freeze to a mush. Remove to chilled bowl and beat until smooth. Quickly return to freezer tray and freeze until firm. Six servings.

If you have a good vanilla ice cream recipe for freezing in your refrigerator (or use this cherry variety to make almost any flavor you desire. If you want a peppermint candy ice cream, just omit the original flavoring and add crushed peppermint stick candy or freeze as you would your original ice cream.)

If you want peanut brittle ice cream, substitute for the sugar chocolate-chip ice cream recipe. For nut ice cream, add about 1/2 cup chopped nuts to vanilla ice cream mixture when it is frozen to the mush stage.

For vanilla ice cream, melt 1/2 cup sugar, then add 1/2 cup cold milk, and 1 envelope unflavored gelatin. Add hot milk, sugar and salt and stir until gelatin is dissolved. Add lemon juice, light cream and lemon juice (the mixture will thin and disappear during freezing). Pour into freezing tray and freeze to a mush. Remove to chilled bowl and beat until smooth. Quickly return to freezer tray and freeze until firm. Six servings.

CHERRY ICE CREAM
1 No. 2 can dark red sweet cherries
1/2 pound marshmallows (about 22)
1/4 teaspoon salt
1/4 teaspoon almond extract
1 pint heavy cream
Red coloring

Drain cherries and reserve 1/4 cup syrup. Pit cherries and chop coarsely. Combine marshmallows with the 1/4 cup cherry syrup and pan. Cook over low heat until marshmallows are almost melted. Drain cherries and reserve 1/4 cup syrup. Pit cherries and chop coarsely. Combine marshmallows with the 1/4 cup cherry syrup and pan. Cook over low heat until marshmallows are almost melted.

Another type of ice cream calls for eggs as one of the ingredients. Here is an unusual black walnut ice cream of this type. Of course, any other nuts may be used if you prefer.

BLACK WALNUT ICE CREAM
2 cups milk
1/4 cup sugar
1 tablespoon flour
1/4 teaspoon salt
2 eggs, separated
2 teaspoons vanilla
2 cups light cream
1/4 cups chopped black walnut meats (vacuum packed are good)

Scald milk in top of double boiler. Combine sugar, flour and salt and gradually stir into scald-

ed milk. Cook 5 minutes over simmering water, stirring constantly. Beat egg yolks slightly. Add about 1/2 cup of the hot milk to egg yolks, beating well; add mixture to remaining milk. Cook 2 minutes over simmering water. They were certainly between the devil and the deep sea; six wet, half-frozen men being towed

Whale's Head Was So Hard It Actually Sank A Ship!

Did you know that the head of a sperm whale is solid as a slab of granite, and an iron thrown at it will bounce off without making any impression? In the South Atlantic one actually rammed and sank the whaling barque, Kathleen, owned and captained by Capt. Thomas H. Jenkins.

When the first mate went for three feet or so, when she struck the ship, with gathering speed, instead of going down or veering to windward, as whales usually do. Thirty feet off it tried to go under, but there was not room to clear.

It struck the Kathleen forward of the mizzen rigging, five or six feet under water, severely shaking her, then tried to come up, raising her stern two or three feet so that when she was again struck, she was dropped again her counter made a tremendous splash.

When it was found that the foe was flooding from a hole in the ship, Capt. Jenkins ordered the crew to take to the boat with water, bread and some old clothes. Five minutes later the Kathleen rolled over.

Fortunately, the twenty-one in the boat were later picked up by the steamship Borderer, of Glasgow.

They couldn't get away from hatches, sheath knives, and several of them went up to the mast. The boat sank, but the men were saved. The whale's head was so hard that it actually sank the ship.

Thunderous Spouting
Capt. H. A. Chippendale, an old-time whaler, tells thrilling stories of personal encounters in "Sails and Whales". Once his boat was in the school of whales, was rocked alarmingly by the ponderous humps. He tried to keep her right side up, but knowing when they might lurch into the air by huge lashing tails. Then the boat was canted right over, and all six of them were in the water with the huge black monsters sliding past, carrying men and boat along with them.

Struggling, Chippendale kept sliding on and off, not even hearing the thunderous spouting. At times, he says, it seemed as if his heart had stopped when these huge monsters rubbed him in passing. Their body motion created a kind of buoyancy at no time did he feel himself sinking. They were so close that he had no chance to strike out and swim. When he put his leg down straight, his foot touched one of them, almost paralyzing him with fear. After what seemed an eternity they went, and he and his crew were free to swim, shake and terrified, to their boat.

In another hunt, as the harpooner struck home, the whale's huge tail came up and hit the boat's mast in the middle, snapping it off, tearing a big hole in the bottom, ripping out the thwart end of the planking, and seriously injuring two men. In no time they were all swamped.

The second mate, Mr. Silva, would not cut away from the whale, knowing that if he did the boat would sink under them. The gunwales were flush with the water; only a tow would keep them afloat until they could pass their line to one of the other boats. If the boat sank the two men would surely drown. The crew had gone except for the steering one, which Silva used to keep the boat in line with the whale.

They were certainly between the devil and the deep sea; six wet, half-frozen men being towed

Crucio—Doing his own laundry, as he has done for 25 years, Frank Drobot, 69, is comfortable and happy. He lives alone on a rented island in a stone quarry. Keeping his company on a 1500 chickens, several pigeons and a dog. "Crucio" washes his clothes carefully, making every drop count as water must be carried from the mainland.

Canada's Long Wharf

Because of its extreme easterly position, Cape Breton has a long wharf of about a thousand miles closer to Sydney, its chief port, than to any other city on the Atlantic coast. It is 1500 miles from New York.

The southern half of Cape Breton smiles toward the sun and welcomes the incoming gull with golden arms—the sea. The waters of the Bras d'Or Lakes. The waters of the Bras d'Or Lakes. The waters of the Bras d'Or Lakes.

Finally, a good farm work shop is an excellent project as part of the clean-up plan. Such a workshop will aid efficiently to all of the farm operations during the year. The shop should be located in a building that is weather proof and with doors large enough to permit hauling in large equipment for repair and adjustment. The shop should be carefully arranged and all tools and equipment kept in their assigned places.

THE FARM FRONT John Russell

A primary safety rule emphasized by the National Safety Council is "Place for everything, everything in its place." A recent Council study hospitalized home accident cases showed that the largest number of injuries occurred in large places for rats. Gather up all such material and haul it to the dump or dispose of it in some other suitable manner.

Remove accumulated papers, boxes and rubbish in the home basement to attic. White-wash or paint the basement and all cut out of those old clothes and magazines that have been packed up. Dust and cobwebs round lightbulbs not only cut down the amount of light but also prevent a radiation of heat which might cause fire. Medicines, poisons and insecticides should be clearly labeled and kept out of reach of children.

Along with clean-up, a paint-jobs and also makes for a better looking and a more valuable set of buildings. More important still—a neat place is a safe place—for work or play.

SAFETY
1. Operating tractor near embankment.
2. Tractor operator not looking where he is going.
3. Child playing under overhanging ledge and near water.
