

TABLE TALKS

Jane Andrews

CHERRY SPONGE
2 peaches, sliced
1 tablespoon plain gelatin
1/2 cup sugar
1 cup cherry juice
Whites of three eggs
Combine peaches and sugar in sufficient water to cover and cook for about 15 minutes. Strain off the juice. Soak the gelatin in two tablespoons of hot water and add to cherry juice while hot. Simmer for two minutes. Strain into a bowl and when cool, place in refrigerator. When slightly thickened, beat well and add beaten egg whites. Combine thoroughly and place a layer of cherries, then another layer of gelatin mixture. Continue until mold is full. Chill well in refrigerator. Unmold and serve, with or without whipped cream. Six servings.

RASPBERRY COCONUT CREAM PIE
4 tablespoons sugar
5 tablespoons cake flour
1/4 teaspoon salt
2 egg yolks, slightly beaten
1 cup shredded coconut
2 teaspoons vanilla
1 pint raspberries
1 baked nine-inch pie shell
Combine sugar, flour, and salt in the top of a double boiler. Add milk and egg yolks, mixing thoroughly. Place over rapidly boiling water and cook 10 minutes, stirring constantly. Remove from boiling water and add one-half cup of coconut and vanilla. Cool. Place one cup of fresh raspberries in the pie shell and cover with the cooled filling, then with any vanilla coconut frosting.

BLUEBERRY SLUMP
2 cups fresh blueberries, washed
1/2 cup sugar
1 cup water
1 cup flour, sifted
2 teaspoons baking powder
1/4 teaspoon salt
1/2 cup milk (approximately)
Stew blueberries, sugar, and water. Mix and sift flour, baking powder and salt; add milk, stirring quickly. Put milk in the dough that will drop from the end of the spoon. Drop into the boiling sauce. Cook 10 minutes with the cover off and 10 minutes with the cover on.

WANT TO BET?
The odds are even you will lose one key this coming year. The odds are even you carry 3 keys with you. If you are the cook of the household you lay even odds you'll burn something once every 10 meals. You will fall twice this coming year in your home and either one of the odds are 4 to 1 against you. You will have a headache every 3 to 4 days. You will have a cold every 3 to 4 days. You will have a cold every 3 to 4 days. You will have a cold every 3 to 4 days.

CROSSWORD PUZZLE
Across: 1. Epiphany, 2. This fabric is made of wool, 3. Negligent, 4. Binding, 5. That on which you sit, 6. Acclimation, 7. Hideous, 8. Deceitful, 9. Deceitful, 10. Deceitful, 11. Purpose, 12. Deceitful, 13. Deceitful, 14. Deceitful, 15. Deceitful, 16. Deceitful, 17. Deceitful, 18. Deceitful, 19. Deceitful, 20. Deceitful.

..Plain Horse Sense..

by BOB ELLIS

Ancient Art Exhibition—At the spinning wheel Mrs. Emma Conley of the Penfold School of Handicrafts shows the younger generation an art that is centuries old. She also cards and dyes the yarn with vegetable oil.

They Really Bungled THIS Coronation

The coronation of young George VI was remarkable for its bungling. The Earl Marshal, Lord Howard of Effingham, was ordered by the Court to spare no pains to put on a glorious show. Yet his "worries" quite overpowered him. Abbey workers went on strike, retaining their stands unless their wages were raised. Sedan-chair men "came out" with them. Even the Dean and Chapter of Westminster joined with other property owners in the Abbey's neighbourhood by placing exorbitant prices on their window seats, as much as twenty golden sovereigns, worth about \$200 by today's values, for a single place.

When the secret ceremony of the Coronation took place, an irritated monarch listened in turn to sobbing cries and whimpers for the table of the Knights of the Bath, the Royal Canopy and the Sword of State. All items were missing. Amid angry murmurs from merchant princes, jealous of the City of London's ferocity won freedoms, the Lord Mayor had to lend his sword for the completion of the ceremony.

Scene of Confusion
Worze, when the Archbishop of Canterbury poised the glittering State Crown above the King's anointed head, a diamond broke loose from its socket and ran down the royal nose. Full of confusion, the unhappy Earl Marshall stammered afterwards, "My fault, Sir, were many of the odds being injured. You will have an average head, you paint one every 2 1/2 years."

Earning Powers

While the chemicals in your body, if melted down, would bring about \$60 you are worth much more according to your average possible earning power. Medicine tops the occupations and at medicine your average and at medicine your average and at medicine your average.

Medicine	42	\$108,000
Law	43	105,000
Dentistry	43	95,400
Engineering	45	95,300
Architecture	43	82,500
College Teaching	44	69,200
Social Work	45	51,000
Journalism	44	41,000
Ministry	46	41,500
Parliamentary Secretary	46	35,000
Library Work	46	29,700
Public School Teaching	45	28,600
Skilled Trades	40	23,800
Nursing	40	23,300
Unskilled Labor	44	15,200
Farming	51	12,000
Farm Labor	51	10,400

What Has Changed Princess Margaret?

By ROSETTE HARGROVE
NEA Staff Correspondent

King George died, he stayed on, with his title changed to Edward on the Queen Mother. Margaret has a sister, she has begun to remember her father and his death did much to break her away from frivolous pastimes and companions. She was with Townsend even more and Londoners say she was a good influence on her. She learned to appreciate the companionship of an intelligent man.

Her great interest in religion is a trait she shares with her sister, Blith girls were supervised in their religious studies by their father. Margaret of late has been taking special courses and has been a frequent visitor to Lambeth Palace, the home of the Archbishop of Canterbury.

She is far from a reclusive figure. Margaret is far from a reclusive figure. Margaret is far from a reclusive figure. Margaret is far from a reclusive figure. Margaret is far from a reclusive figure. Margaret is far from a reclusive figure.

Princess Margaret at a Royal Court last April.

She is to be "mistress in her own home." Soon work will start to make it possible for her to drive right up to her own front door. She will have her own staff, her own kitchen, plan her own menus and have her own housekeeper. She has already started choosing her furniture and consulting with decorators. She plans to give small dinner parties in her own home for her intimate friends.

Make Sure Air Conditioner Matches Needs

By EDNA MELES

PICKING the right air conditioner for your needs takes greater thought than that involved in the purchase of a deep freeze or a washing machine. With air conditioners coming within the budget of so many families, it's a good idea for the housewife to acquaint herself with practical information before the purchase is made.

6000 Kept Waiting As Movie Star Sulked
Hollywood has never known anyone quite like Pola Negri. Famous Hollywood designer Howard Chandler Christy designed her dress. She has a Palace official. She has an extremely alert and inquiring mind, and is finding the subject all-encompassing.

SOME TOSS!
Out Minnesota way folks pay a lot of attention to their legendarily good prizes are given every year to the people who contribute the most ingenious "tall tales" about his exploits. A recent winner was Mr. Harold B. Jennings of Brainerd, Minnesota. Here's his story:

He didn't have a dollar but found a farmer's wagon and removed the four wheels. To his embarrassment, the first two wheels landed in the water, but on his last two tries, there was no splash of water, only a cloud of dust as they landed on the opposite shores.

Russian Roulette
The most dangerous gambling game ever played is called "Russian Roulette." The odds are always 5 to 1 in your favor. It started in the Russian Army during the war when they became bored with service on some far-flung frontier where nothing ever happened. One bullet was put into a six-shooter, the soldier would then spin, the barrel would be pressed to the trigger. The chances were 5 to 1 there would be a click and no explosion. After a wave of "Russian Roulette" the cause of the war was traced down to the cause of this game was only charging from them on the only charging hats could figure out — "wasting ammunition."

A modern model air conditioner like this one will cool a large room or several small ones.

Application of 2-D-D as a chemical weed spray is generally considered harmful to clover and alfalfa seedlings. On hay and pasture fields containing a good percentage of clover or alfalfa it is dangerous to apply weed sprays.

Information from results of experiments conducted during the past three years on four Illinois farms in the northern Georgian Bay and Manitowish Island districts of Ontario indicates how severely clover and alfalfa may be injured by weed sprays when applied in strengths sufficient to kill the weeds completely.

From these results it would appear that 2-D-D is applied to new clover and alfalfa seedings at rates of 2, 4, 8, 16 and 24 ounces acid equivalent per acre. The average percentage stands of clover and alfalfa in the year following treatment, as compared with the areas where no treatment was applied, were as follows: no treatment—100 per cent stand; 2 oz. 2-D-D—73 per cent; 4 oz.—74 per cent; 8 oz.—55 per cent; 16 oz.—15 per cent; and 24 oz.—21 per cent.
