CHINCHILLA FARMING has been making important strides in recent years and i well worth the serious consideration of anyone desirious of

ely fine texture of good chinchilla fur makes it a highly lesirable type of short haired fur to raise. Being a vegenliness of the animal keeps labor costs down as well. Chinchillas may be housed in a spare room or basemen until their numbers warrant the erection of a ranch.

With our several years experience raising chinchillas we are now in a position to offer you excellent breeding stock at reasonable prices. Why not call at our ranch and let

harge of the meeting.

Mrs. Cherry, who had planned a very interesting program, read a poem. The motto was well given by Mrs. Bruce Dougherty. Mrs. Bruce Smith chose for her topic "The Life of Queen Mary" which proved very interesting. Another solo by Mrs. Shav.r was also enjoyed. A highlight of the evening was a demonstration of weaving by Mrs. Sherman Beck, of Hagersville, also showing us samples of her work. The members were keenly interested and appreciated Mrs. Beck's effort Current Events were given by Mrs. Jim Ionson. Mr. Ebert then thanked the members for their contributions to the meeting of the Ladies Aid to the meeting of the Ladies Aid next Tuesday, June 9th, at 2. P.M. In well of the will be followed by the month- of the W.M.S.

Weather conditions have been far from satisfactory for the sowing of late fields of spring grain and as indicated in last week's column it is dangerously near the zero hour for the planting of oats unless they be of a very early variety. The next best thing would be to use one or other of the catch crops that are available. One of these is millet and this year the prose or grain varieties would be the ones to use, since there is already plenty of evidence that a - MATINEES MON., WED., FRI., at 2. P.M. Cont. SAT. ADMISSION 75c

The Annual Ha'dimand County Scout and Cub Field Day will be

held at Caledonia on Saturday, Ju-6th at 10.30 A.M. TREES TAKEN DOWN

Front

During the past week several trees have been talen down in the Village which has created a new appearance where they formerly stood. Three large trees have been removed from in front of the residence of Mr. Alex. Duncan and Mr. Harry Agnew. The general consensus of opinion seems to be that the removal of the trees is an improvement. BRIEF NOTES FOR THE BUSY FARMER Weather conditions have been far

there will be a heavy hay crop.
-000It is generally considered that mil-

It is generally considered that milets of this type are excellent emergency grain crops. Actually millet can be sown as late as July and in some places yields up to 35 bushels per acre have been obtained. The seed is ground and used with the regular protein supplements. It has a composition similar to oats and is almost equal to barley in feeding value.

It is generally considered that miletally allows are challenged. Chalmers, Walpole: 0,45 A.M. — Morning Worsh 10,45 A.M. — Church School THE UNITED CHURCH CANADA Rev. Arthur Packman 9,45 A.M. — Garnet 11,00 A.M. — Jarvis 3 almost equal to barley in feeding value. Chalmers, Walpole:

A fine firm seed bed, free of weeds A fine firm seed bed, free of weeds is desirable. Seeding on a rough poorly worked field will not give satisfactory results. The crop is a warm weather one and does not do well until the soil is warm. The proso or grain millets are usually sown at the rate of 20 to 25 pounds for acreating for strictly grain.

per acre, although for strictly grain purposes this may be cut down slight ly. Best results are usually obtained when the seed is drilled in and in order to control the rate of seeding t may be necessary to connect the pouts from the grass seed box to the

grain spouts by means of rubber hose. The seed will then be fed hose. The seed will then be fed through the grass seed box to the drills at the desired rate. A light W. MACGAW MACDONALD vering either with a harrow or her implement is also recommended When it comes to harvesting the crop the grain binder has been the most satisfactory. The combine in years past has not been able to get HAGERSVILLE STANLEY E. BUCK

all the seed. Then, too, the proso types have too much moisture in the seed and straw at harvest time to make combining entirely satisfactory.

If the crop can be swathed and put Jarvis Office: in windrows and then through a cem-bine it will do a reasonably good job. The big problem this year will be to
