

### Pen, Scissors and Pastepot

We have to hand an article, by Clyde Corral, entitled "C.C. Weather Not So Hot." It is doubtful if it will appear in this issue, but we would suggest our readers look for it next week. The weather is always a good subject and Clyde passes along his impressions of this thing that is always with us as he finds it

on Vancouver Island. In a brief note to the Record Staff Clyde passes out a bouquet for this column which we are most anxious to put in print for the benefit of our critics. Says Clyde: "After scanning the front page, I turn at once to Pen, Scissors and Pastepot. It's always good and often even better than that." Coming from an old newspaperman whose writings have appeared in important places, we appreciate that comment.

We are glad to note that the Editor of the Fort Dover Maple Leaf a-

gree with our advice to the Simcoe Sports Editor in the matter of re-establishing amateur sport locally. Incidentally we saw the Editor of the Fort Dover Maple Leaf in person the other day for the first time in several weeks. He looked particularly fit and, as a matter of fact, almost handsome. We couldn't figure out until a couple of days later what had caused the transformation. Now we know. He has started to eat steaks again.

We have a few tickets for sale which we are willing to let go to a

### Fred forgot one thing...

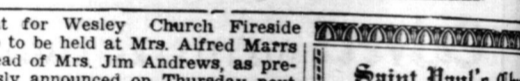

If you forget that a bit of wood preservative applied at little cost when the fence was put in, would have saved him the cost of new posts now.

In the telephone business, as around your own home, find it's better to do the job right in the first place and then look after it. It's the best way we know to avoid heavy repair and replacement costs, to save expense and give you most service for your money.

That's why we treat telephone poles against rot, check our trucks clean and in good repair, why we get up exchanges and offices to last.

It's common sense if we are to keep our costs down and the price of your telephone service low.

If you would like to get useful information on the preservation of wood we suggest you write Forest Products Laboratory, Department of Resources and Development, Ottawa.
