

To the Electors of Brant-Haldimand

I wish to take this means of thanking all the people of this riding who gave me their support on August 10th; and to those who worked on my behalf.

Although I was not successful in winning the riding, I do not feel that our efforts were in vain. To have attained a Liberal majority in Haldimand County for the first time in Fifty years is no mean accomplishment, nor is the first Liberal majority ever to be attained in Dunnville. Several other municipalities also did an excellent job for us.

During the past few years, I have become acquainted with the Prime Minister and several members of his cabinet, as well as a considerable number of the civil service staff. This has made it possible for me to assist many people with problems that pertain to the Federal Government. I wish to assure you that I shall continue to use this influence, not for any personal advantage, but to further the interests of the residents of Brant-Haldimand.

Anyone with a problem will find my office door open. If it is not convenient to see me personally, just drop me a line and the matter will be promptly dealt with.

- - Garfield Disher

Pen, Scissors and Paste

An editorial on drinking, which has attracted considerable attention recently in the small "Moody" (Texas Courier), one of the few remaining hand-set newspapers on the continent.

The editorial addressed to tipplers reads: "If you cannot absolutely refrain from drinking, start a saloon in your own home. Be the only customer and you will not have to buy a license."

"Give your wife \$12.00 to buy a gallon of whiskey. There are 128 ounces in a gallon. Buy all your drinks from your wife at 40 cents a quart, and in four days when the gallon is gone, your wife will have \$32.20 to put into the bank and will have \$12.00 to start up in business again."

"If you live 10 years and continue to buy all your booze from your wife, then die with snakes in your boots, your wife will have \$32,700.00 on deposit — enough to bury you respectably, bring up your children, buy a house and lot, marry a decent man and forget she ever knew you."

An attractive girl and a plain, middle-aged spinster were waiting for a bus.

"Have a cigarette?" asked the girl, opening her case.

"What! Smoke in public?" exclaimed the woman, shocked to her depths.

"Why, I'd sooner kiss the first man who came down the street," but have a cigarette while you're waiting."

Pen, Scissors and Paste

The recent British census reveals that the number of non-earners in the United Kingdom is 16 per cent greater than the number of persons gainfully employed, and that the most marked increase in non-workers is among those who are recipients of government pensions. This prompts "The Times" of London to assert that "there is every reason for wanting further thought on retirement and retirement pensions."

The demand for earlier retirement, coupled with the longer life span of individuals, possibly in thirty years pensioners alone will make up nearly a third of the population and about half of the electorate.

The "Letter-Review" suggests that the only way to prevent the "pension bloc" from becoming the dominant political group is to require pensioners and all others who receive public funds without evidence of need to relinquish their right to vote.

It is reported that the CMC has operated with black ink these past twelve months which will be good news for the taxpayers. We usually open mail as we write this column and it just so happens that the letter to hand is from the Canadian Broadcasting Corporation, Toronto, with a four-cent stamp attached. We can't wait to see inside. Ah, a close to them you are apt to find difficulty in preserving your powers of concentration. The pesky little insects are loaded with electricity and every time they light on a bare part of one's anatomy they short circuit in some manner and the victim gets the full charge.

As a result of observations and enquiries, we discovered that bees were swarmed at our back door because they were at a depth of about 4 to 6 inches, instead of the usual 3 to 4, says Bob. What does it matter whether the National Radio System operates at a profit or a loss, so long as the unintelligent masses can get advice such as this for free.

What you don't say is sometimes as important as what you do say. At a Service Club meeting a member was introducing an important guest speaker. He said: "Some of you have heard our guest speaker before, some have not. Those of you who have not heard him, will look forward with pleasure to hearing him now."

We had a holiday last week, but the quietness we had anticipated never quite materialized. We had some visitors. As a matter of fact we had a swarm of visitors. The visitors hung around the back door for a full week and would be there yet if we hadn't poisoned them. We admit that administering poison is a pretty rugged manner to dispose of unwanted visitors but under the circumstances there seems no other alternative.

Our visitors were a swarm of bees. A swarm of bees, we might say, is a very interesting object of study, and for this reason we just got too close to them. If you get too close to them you are apt to find difficulty in preserving your powers of concentration. The pesky little insects are loaded with electricity and every time they light on a bare part of one's anatomy they short circuit in some manner and the victim gets the full charge.

More People Buy

than any other car!

Make no mistake about it CHEVROLET is the LEADER!

1st in Sales!
1st in Value!
1st in Demand!

Only one car can be the leader! Only one car can be the favorite! Only one car can be the most-sought, most-bought car in Canada! That car, year-in, year-out, is Chevrolet. In the first six months of 1953, according to the latest official registration figures, Canadians bought 41,660 Chevrolets. This is 12,401 more cars than were sold by its nearest competitor — dramatic proof of Canada's continuing preference for Chevrolets!

The tremendous popularity of Chevrolet means lower production costs. It means big savings that are passed on to you! And because Chevrolet value lasts, there are extra dollars for you when you trade in your Chevrolet, for Chevrolet consistently shows highest trade-in values of any car in Canada! Final proof of good value is the loyalty of Chevrolet drivers, a loyalty that grows stronger with every new year — with every great Chevrolet we build.

Although other cars are available, thousands of Canadians are waiting patiently to get their Chevrolet. No other car will do! Surely this is proof of Chevrolet's superiority... and its unchallenged place in the hearts of Canadian motorists.
