ANNE HIRST Your Family Courselor

"Dear Anne Hirst: I am mar-ried to a soldier, who is now overseas. Since he left I've been sitting at home, night after night, and terribly lonesome . . I met a nice young man who works with me, and he asked me to out. with me, and he asked me to out.

I went, and had a very nice time.

"I am not looking for trouble,
Anne Hirst. I just want to have
some fun. But I am so confused!

We don't do anything wrong,
and going out once a week does
give me a lift. But I don't want
my husband finding out.

"Can you please advise me?
CONFUSED."

PLAYING WITH FIRE Your confusion is the result of your feeling of guilt. Your husband would not approve of susband would not approve of your dating any man, I expect — particularly this one, for you say, "I've been good, up until now." That reveals your potential feeling for him better than any words you did not, say. Why shouldn't he think lightly of you? A married woman who dates another ried woman who dates another

man invites propositions of any kind. Your dating him will not go unobserved, you know. Your husband, like so many other trusting soldiers, will probably

up, and give the job all you've
got. You will meet other lonely wives, and their quiet courage under the strain of anxi-ety and loneliness will be an inspiration.
I predict that, within week, you will have solved your own problem, and be heartily ashamed of your be-

TO "A WORRIED MOTHER": Stop worrying. The rule you are interested in still applies. When readers are reminded that this column appears in newspapers in almost every section of the country, and that their problems exist in every community group they are quick to realize that m answer to a question similar to their own is not necessarily my answer to theirs.
Your attitude in this affair was

exactly what it should have been, and I congratulate you. I appreciate your gratitude, too, for my opinion. REMEMBER SOLDIER'S

BIRTHDAY "Dear Anne Hirst: I am 17. and have been going steady with a soldier who is now overseas. My birthday was a few months ago, and not knowing about it, he did not send me anything. "Now his birthday comes soon. I don't know whether to send him something, or just a card. What shall I do? WORRIED GIRL"

Send the soldier an airmail birthday card, by all means It may arrive late. So why not write him a pretty note of good wishes? Say you have just learned about his anniversary, and as the card may not come in time. this little note will say you are thinking of him, and looking forward to the time you two can celebrate birthdays together. This will be a gracious gesture, and the more welcome because it is unexpected.

If you are a soldier's wife, use your leisure time to work for victory here. There is no better cure for loneliness. . . In any time of stress, consult Anne Hirst. She will have helpful ideas. Write her at this news-

Warning Winston

Surveying the volume high qualiyt of Churchill's subsequent literary achievement, it amusing to reflect that I was his first editor and Press censor. He came to me one day—I was then schoolboy editor of the Harrovian—with an article on recent assault-at-arms in the gymnasium. The article was highly critical, not to say scurrilous. I had to blue pencil several of the choicest witti-cisms in spite of the writer's

impassioned and almost tearfu Even what I passed in this and one or two subsequent arti-cles went rather beyond the conventionally restrained tone of the arrovian. Accordingly the headmaster, Dr. Welldon, summoned the young author to his study and addressed him in the following terms:

"I have observed certain ar-ticles in the Harrovain news paper lately not calculated to increase the respect of the boys for the constituted authorities of th school. As articles in the Harrovain are anonymous, I shall not dream of inquiring who wrote them. But if any more of the same character appear, it may be my painful duty to swish

Two gentlemen were introduced in the lobby of a Chicago hotel. "Pardon my not getting up," said one. "You see, I'm ail ing from arthritis." all right," beamed the other. "I'm Goldfarb from Grand Rapids."

The state of the s CHRONICLES GINGER FARM Women of all nations began their invasion of Toronto last

week. They overflowed the Royal York, the Walker House, the Y.M.C.A., the W.C.T.U. and the homes of personal friends. Dining-rooms, restaurants and coffee shops, all had a long line-up at rush hours. Americans, British, Canadians and folk from "down under" mingled with visitors and "observers" in colourful national costumes from Denmark, Holland, Norway and Sweden; from India, Ceylon, Pakistan, Egypt and Japan as, for the first time in its history, Canada was the meeting place for rural women from all over the world during the Seventh Triennial Con-ference of the Associated Coun-

try Women of the World. The first president of this great organization was a Canadian. Mrs. Alfred Watt who was elected at Stockholm, Sweden in 1933

the actual official opening tool place in Convication Hall, University of Toronto on August 14, followed by a tea on the campus at Hart House. The weather was ideal, bright sunshine accentuated the varied colouring of the picturesqe national costumes worn by delegates from far countries the glittering Egyptian costume, the dignity and charm of the Ceylon and Pakistan dress and the homespun, richly embroidered dresses from Scandinavia.

man for the opening ceremonies at which there was an impressive processional when the flags of the countries represented by the A.C.W.W. were carried in, slowly, solemnly, by members of the Junior Women's Institutes and the Homemaking Clubs of Canada. No doubt you will have read all the details in your daily paper so that anything I might say might be merely repetition. Yes, you may have read complete and exact reports but this I must add: No report, no photograph, can convey to you the unexplainable inward emotion that came to me as, in my dual capacity as W. I. member and press

At The Big Conference—A happy trio at the Get-Together party held at the Royal York to start off the ACWW Conference, were, to right, Mrs. Bessie Gray, Sarnia, a Chippewa Indian, in her national dress; Mrs. K. Kuppuswamy of Mysore, India; Mrs. S. Sem of Oslo, Nerway, in costume of Telemark, Norway. cessfully introduced the Wo- | representative, I stool on the

nen's Institute to England and Wales. Mrs. Watt was a woman tened. Believe me, I felt both with vision but it is doubtful if even Mrs. Watt visualized an or-ganization that in twenty years would reach its present mem-bership of nearly 6,000,000 women, representing 25 nations of the world. From this vast membership considerably over a thousand delegates registered for the Triennial Conference in Canada, to meet together for one specific purpose - to discuss ways and means of improving rural conditions in every country, but especially in under-developed pecially in under-developed areas. Round Table discussions are being held almost every day during the Conference, for the purpose of studying the economic problems of people living on the land. These discussions are exremely valuable as from them the women learn to appreciate he difficulties of other nations in dealing with problems which may be quite different from their own. One country may report a surplus of farm labour; another - Canada, for instance, a serious

Ideas, opinions and experiences are freely exchanged in these discussions, and, no matter what the subject may be, there is every evidence that most of these women have an extraordinary grasp of the situations inved, and, in most cases, definite suggestions for improvement are offered. Naturally the emphasis is on what women can, and should do in the world of affairs, all the way from educating the under-privileged to par-ticipating in the work of the United Nations. As one woman put it — "To educate a man is fine but educate a woman and you educate the whole family."

Preliminary activities had been

minary activities had been taking place for several days but

proud and humble to be a part of this great assembly. Day by day, one hears and reads distressing and conflicting reports or world and local affairs. But here, amid the women of many nations, I was conscious of an up-lift of spirit; a feeling that with so many fine and intelligent women taking an active interest. not only in their own problems but in those of other races and creeds, that somehow, out of chaos, we shall find peace, and good fellowship among all nations. I felt this even more trongly during the splendid service in the Memorial Hall at the ntario Agricultural College, uelph, attended by 21 bus-loads of delegates from Toronto head-quarters. The Rev. Dr. David M. Gallagher in his address, said that we no longer think of disance in terms of miles but of time - time in getting from one place to another - and how short a time it often is. In speaking of the "Associated Country Women of the World" he said in effect, how different would be its meaning if one word - "country" were left out. It would then e "Women of the World" which could suggest "worldy women" -the exact opposite to the true meaning of the A,C.W.W He also urged his listeners to take time, after the Conference, to think ahead. "Don't get so tired during the Conference," warned Dr. Gallagher, "that you have no time afterwards to make use of all you have seen and heard." Well, I shall be telling you more about this great confe future columns as, I can assure you, there is far more to it than most of us ever dreamed was

possible, and, as you know, it may be years before the A.C. W.W. is held in Canada again.

Some Queer Clubs - They're Really Exclusive!

All sorts of clubs cater in

people. Most unusual, peta is the Odd Volume Club h

sists of those with a liter

been written and

To-day it seems almost any excuse will serve to found a club whose membership is limited to people with the most unusual fications. These clubs, are eally exclusive.

o the list of really unusual clubs that announced as being formed in Britain by the mother of a murdered boy. Memebership of this one - one of the world's most exclusive and grimly unusual clubs — will be open only to the relatives of unsolved murder victims. At first the club-believed to be the only one of its kind in the world — will be restricted to the mothers of murdered children. To-day a lonely and broken-hearted woman wants to make contact with other mothers who will help her in forming the club.

One club — always open for embers—is that catering solely for males who are all womenhaters. Indeed, they are the men who have to pay alimony to the wives who have left them. Amongst the unique clubs in the United States is that reserved for people who, on occassion, "wish to kick themselves." This North Carolina body has actually had a machine installed for the gons.
Perhaps this is the age of the benefit of its members, who by

There is even one for people ugly faces. If, therefor, pressing a button receive a kick in the pants.

Borrowed Time can't stand the sight of your The world's most unusual clubs people can't, you should a for membership. No doubt include one whose members are all living on borrowed time. They will feel happy beside the but are men and women of different ages, and each with his or her noses and cauliflower ears own hobby. This club has but one rule. No one is eligible for membership who has not lived three months beyond the time given him by a doctor. Most of those enrolled are people suffering from some form of disease which cannot be cured, or whose energy has been sapped by surgical operations or who are too weak to fight illness.
As long ago as 1936 a Mrs.

Jesse Green started this club, and deaths, amongst the merbers, have been few Being tall has its drawbacks, especially if you are young and fond of dancing. Recently, therefore, a club was formed whose male members must be over six feet and the ladies not less than five feet eight inches. But why don't the "short" people, or those who require really "outsize gar-

ments," get together?
Even misers have their own gathering. Called the Split Farthing Club, the qualifications for nembership are meanness and prudence in the use of money. Many indeed are the bachelor's clubs. In every land we find them, but most of the membership subscriptions are not renewed after a year or two.

Even Tax Dodgers If you are fond of the eerie you may like to join the Ghost Club. Its members are very much of this world, and are people who are interested in psychical research. They make a nobby of investigating any ghost story that has pints of interest. If the Cigar Club, whose mem-

pipes - is still in existence, they should by now have invited Sir Winston Churchill to become their president, for one of the club rules forbids members to sidelines, and watched and lissmoke anything but cigars. The U.S.A. is, of course, the land of the really queer clubs. These range from those who dabble in black magic to one especially for red-heads. In the States the hen-pecked husbands, pole squatters, and even the income tax dodgers have clubs.

Sculpture By Touch-Totally blind since the age of four, 18-year old Genevieve Leroi of Paris, France, uses her sensitive hand to model clay by touch. The above sculpture, a nude called "Awakening," was featured at the 69th "Salon Des Fommes an exhibition of female painters, sculptors and decorators.

by John Russell

One of the fastest growing seg- , day, and hatchability has increasments of the poultry industry at | ed from about 30 per cent when increase in hatchability.

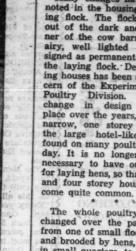

Strictly speaking, says A. B. Horrison, Central Experimental Farm, the term turkey "broiler" in misleading. Turkey "broilers" are usually either roasted or fried, and the term "fry-roaster" is coming in to general usage in describing this class of poultry.

wildly round. The disturbed flies | good fryer-roaster, Many grow-

turning red. certain however - the frye

The passing years have witnessed changes in all phases of poultry husbandry says T. M. MacIntyre of the Experimen Farm, Nappan. Egg production has increased from about 70 eggs per bird in 1887 to nearly 200 eggs per bird today. At the same time the backyard flock of these early years, which supplied the family with eggs only during the long days of spring and summer, has now changed into a real money earner for the farmer.

the setting hen with 14 eggs, to the mammoth incubator of to

the first artificial incubation work was done at Ottawa in 1895 to about 80 per cent of all eggs set today. Improved incubators and hatching technique, determined by experimentation, have been a major factor in this great

Progress in artificial brooding has followed progress in artificial incubation. Early bulletins put out by the Poultry Department for the widow of the progress of the progres for the guidance of poultrymen, show the proper type of coop for the broody hen and her small brood. This was followed by small brooders heated by kerosene lamps designed to simulate the conditions of the mother hen. As flocks grew larger, the need for changes in brooding practices became apparent and larger

Fryer-roaster turkeys are generally sold at from 10-14 weeks of age, when the birds average around 6-9 re unds in weight. At The movable colony house with one coal or wood burning brooder, designed to house from this age and weight, the efficiency of feed conversion is still high, with around 2.5-3 pounds of feed 200 to 500 chickens, was introrequired per pound of gain. This compares quite favourably with the feed to gain ration usually many as the best method of rearthe feed to gain ration usually

obtained with chicken broilers.

At the present time, the Beltsville White seems to be the most popular breed for producing the fly settles on a sweaty neck, | ville White seems to be the most shelters on a good grass range, while others prefer to raise their veloped by the United States Dechickens in confinement in the same house from the time they partment of Agriculture, is pre-ferred because of its good finishare day-old until they complete ing characteristics, and white the laving cycle. Steam, gas, oil feathers. In spite of its black and electricity are all satisfac pin-feathers, the Broad Breasted torily used as sources of heat for Bronze makes a surprisingly brooding chickens today its rapid growth rate, excellent ciency. It is necessary to subscald dark-feathered fryer-roas ers in order to remove the dark pin-feathers. The birds must then be frozen immediately, in

> As is the case in any new in dustry, there are many problems which have to be solved before all the "bugs" will be out of the fryer-roaster business From the breeding point of view a breed possessing the fleshing characteristics, rapid growth rate and high efficiency of the Broad Breasted Bronze, coupled with white feathering, would be desirable. Much remains to b understood concerning the feeding of fryer-roasters. Rations which stimulate rapid growth and good fleshing and finish need to be developed. There are many marketing and distribution prob lems to be solved. One thing is roaster turkey is here to stay.

Incubation has changed from

out of the dark and dingy cor out of the dark and dingy cor-ner of the cow barn into clean, airy, well lighted houses, de-signed as permanent quarters for the laying flock. Design of lay-ing houses has been a major con-cern of the Experimental Farms Poultry Division. A gradual change in design has taken place over the years from small place over the years, from small narrow, one storey houses, to the large hotel-like structures found on many poultry farms today. It is no longer considered necessary to have outside yards for laying hens, so that two, three and four storey house have come quite common.

The whole poultry scene has changed over the past 15 years from one of small flocks, hatched and brooded by hens, and housed in small quarters, to an industry where the technique of mass production is successfully applied

Called The Turn

friend of his opponent. In the very first round, Joe crossed a right to the jaw and sent the big fighter to the canvas in a heap. The referee bent quickly over the fallen man, picked him up and propped him on his feet. Then, turning to the press row, the ref-eree explained his action. "Sor-ry, gentlemen," he said. "That was just an accident. I tripped the fellow myself."

Joe Walcott chuckled at the

amazing effrontery of the third man in the ring and stepped for-ward to resume the fight. He feinted, poked his left in the feinted, poked his left in the giant's face, and crossed another terrific right to the jaw, felling the big man like an ok in a slaughter house. Then he walked across the ring to the horrified arbiter. "Pardon me, Mister Referee," he said in a voice loud enough for the men in the press row to hear, "for the edification of mah frien's and mahself, would you be good enough to tell me

With a roar of laughter in his ears from the gentlemen of the press, the prejudiced referee could do only one thing. He counted out the fallen giant where he lay.

WORTH WAITING FOR

A farmer was making one of A farmer was making one of his infrequent visits to a moving-picture show. The slapstick comedy showed a group of shapely maidens coyly undressing beside a pond. Just as things reached an interesting point, a railroad train obscured the view, When it had passed, the girls were already splaching about in the lake

The farmer remained rooted in his seat for four continuous showings. Finally an usher inquired. "Are you here for the winter, Pop?" The farmer answered, "I'm going to stay here till that train is a couple of minutes

A fighter who was capable of calling the turn was that fear-some little Barbodoes Demon, Joe Walcott, the 150-pounder who could lick heavyweights and of-ten did. One day, matched with a promising white heavyweight.

Joe found himself in the ring against two men when he learn-ed that the referee was a close

you be good enough to tell me, please, who in h--- knocked him down that time?"

Memory Selection: The love of money is the root of all evil: which while some have coveted after, they have erred from the faith, and pierced themselves through with many sorrows. 1 Timothy 6:10.

By Rev. R. Barclay Warren B.A., B.D.

THE CHRISTIAN'S USE OF

1 Timothy 6:6-19

There are perils to prosperity, too. How easy it is to become self-sufficient saying as the Laodicean Church, "I am rich, and increased with goods, and have need of nothing." The arrogance of this attitude is seen more clearly when Jesus describes the real condition of the church is real condition of the church in the words, "And knowest not thou art wretched, and erable, and poor, and blind, and naked". (Rev. 3:17).

The Summer cottage has been a snare to many. There are those

a snare to many. There are those who will drive a hundred miles to a cottage but on Sunday are not disposed to drive four miles to a nearby church. The churchgoing habit will not be recovered in the winter. A man may get a lot of tan during the summer lot of tan during the summer but may also forget God and the needs of his own soul. How poor

"They that will be rich fall into temptation and a snare, and into many foolish and hurtful lusts, which drown men in destruction and perdition". Mer present dishonest income tax reports in order to hoard more dollars. Some resort to business practices designed to destroy the command, "Thou shalt love thy

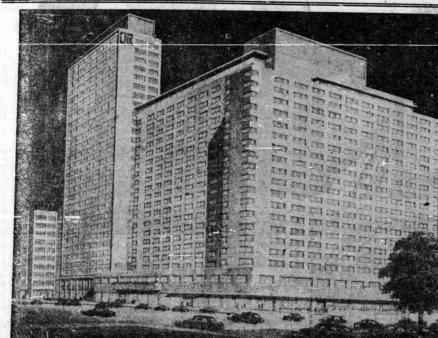

A few recognize their posse sions as a trust from God. They are not concerned about keeping to give. They are "laying up in store for themselves a good foundation against the time to come, that they may lay hold on eternal life". The man who lives for self has no treasure in heaven and at death he leaves all his earthly treasure behind. How poor he is! The Christian has the best of it, here and hereafter.

The Earth's Centre -What's It Like?

Nobody knows for certain, but scientists who have been studying earthquake waves for years have recently made some inter-esting deductions.

The earth has a core with a radius of 2,000 miles, believes one of them—Professor K. E. Bullen, of Sydney, Australia. This core is physically distinct from the earth's upper area, which ascends another 1,800 miles to the surface. miles to the surface. is now almost certain that

while the outer area of the cen-tral core is fluid, the inner core is solid and about eighteen times as dense as water, Professor Bul-What does he think the earth's inner core consists of? Probably iron, nickel, and perhaps some unknown and denser metals.

C.N.R. TO BUILD BIG HOTEL IN MONTREAL.—Plans for the construction of a large convention hotel on the Central Station site in Montreal have been approved by the Canadian National Railways board of directors and will be included in the railway's budget when it is submitted to the sessional parliamentary committee on railways as part of the financial programme to be laid before Parliament at the next session, Donald Gordon, chairman and president, has announced. The 20-storey, \$20,000,000 hotel will have upwards of 1,000 rooms and convention space capable of seating 4,000 persons at meetings and 2,500 at banquets. It will benefit all agencies engaged in the travel and tourist industry and will do much to attract conventions and visitors to Canada, and will be of great and direct benefit to Montreal, the Province of Quebec and Canada as a whole, Mr. Gordon stated.

The architect's drawing shows the new hotel facing on Dorchester Street (left) and Mansfield Street (right.) At the far left of the sketch is the present International Aviation Building, also owned by the C.N.R., and an idea of the size of the new hotel is, to be had by comparing the bulk of the two buildings. Between the hotel and the Aviation Building is a sketch of the new headquarters office building which is planned for later discussion between the railway and the city of Montreal for several years. When completed by the C.N.R. and private capital the development will rival in scope that of the world-famous Rock-feller Center in New York.

CNR Phote C.N.R. TO BUILD BIG HOTEL IN MONTREAL - Plans for the construction of a large convention hotel
