THE Calvert SPORTS COLUMN by Elmer Ferguson

The most important toe in the sports world does not, oddly enough, belong to a soccer player, a football or rugby ace, in fact this toe isn't employed in any part of the kicking business.

The toe belongs to the greatest shot-putter the world has ever known, big Parry O'Brien of Southern California University, Olympic champion and world record holder in the business of heaving the 16-pound missile for distance.

Just how did a toe become important to a shot-putter? You might ask. And the story is this:

In 1950, O'Brien had set a national college freshman record of 53 ft. 10½ in. Instead of being satisfied, his coach, Jess Mortensen began experimenting with O'Brien to the extent that by the athlete's sophomore year his putting style had been completely rebuilt.

Under the new style Parry's right toe is the key to his success. Most shot putters stand squared away in the ring but when he puts the shot O'Brien's big toe is pointed toward the rear of the circle. Among other things this means that his heel and back are to the direction of the put.

Mortensen believes this vastly improved O'Brien leg drive. Whatever did it, progressively this young stalwart has broken the National Collegiate Athletic shotput record, set a new mark for the National A. A. U., established the all-time Olympic record, and beaten Jime Fuch's world record. His most recent mark, when this was written, was two and three-quarter inches beyond the 59-foot mark.

Back in 1904, Ralph Rose was putting the 16-pound sho Back in 1904, Ralph Rose was putting the 16-pound shot appoximately 49 feet, at the time a tremendous heave which nobody believed would ever be excelled. Rose, a giant of a man, put the pellet 48 feet 7 inches to win the Olympic title. O'Brien's title-winning and record smashing Olympic heave was just beyond the 57-foot mark. But that was merely a start. Today's O'Brien, with his toe working smoothly to help provide great leg-drive in his push-off, is getting closer and closer to the 60-feet mark, and may be able to achieve this, come the 60-feet mark, and may be able to achieve this, come the next Olympics. Or perhaps sooner. At any rate, he's one athlete of whom you can truthfully say, he's the greatest the world has ever seen, and prove it by figures.

Recently, a fraction of an inch was added to Les Stee high-jump record of 6 feet 11 inches, and even though a technical flaw barred the new record, it indicates that techniques have improved leaps and bounds, particularly in field events,

..Plain Horse Sense.. by BOB ELLIS

The most important achievement of organized farming in Ontario since the end of the war was the establishment of the Ontario Hog Marketing Agency with its sales organization United

It was very successful in maintaining price even against re-peated attempts by the packers to bring prices down. To enable the agency to keep up the good work it is important that hog producers continue to give it full support by following its direc-

Send Hogs to Yards One of the difficulties encounthe agency in establishing prices is the recurrent shortage of hogs at the stock-yards. Too many hogs have been shipped direct to packing plants. In an open letter, published in ast week's Rural Co-operator. C. D. Black, manager of the sales ncy, explains the situation to all hog producers.

After reviewing the developments from the January price of cents to the present price of 35 cents, Mr. Black says that he "not worried about being able to keep the value of your prodt at this higher level than it has been for a number of years PROVIDED we get the hogs at the RIGHT PLACE and at the RIGHT TIME in order to do so." Mr. Black thinks that every hog producer should be aware of the complications and continues: "Regardless of what you may hear from any source the sic fact is that - price is established at the public market." "It, therefore, follows that is order to create and establish the true value of your hogs, it

Nine Billion Dollars To Fly To Mars

The race to design and build a "space station" is on. Scientists the world over are scrambling to complete plans for the first station, in such a race as the world has not seen since the splitting of the atom demanded a bomb. The nation, or group of nations, which succeeds in establishing this earth satellite could beat off all attempts of a rival power to do likewise and hold the entire earth in subju-

Hurtling around the earth at a speed of some 18,000 m.p h. the space station could bombard any city with guided missiles fitted with atomic warheads. There could be no defence against such attack, the satellite itself being out of range of anything but Dr. Walter Dornberger, famous as the scientist responsible for the vicious V-2 rockets which showered upon London in World War II, is now working for America, advising upon the development of guided missiles. The doctor has predicted that within twenty years man will have fashioned a rocketship capable of the trip to Mars and back, via an earth satellite. But, he adds, this great solar adven-ture will probably never take place, for it would cost ric less than £3,000,000,000 - perhaps

more! Certainly no single aircraft company could foot such a bill, but to a government - with side in mind is a different matter. This man-made moon could be

the perfect international "police-Under the direction of U.N.O., no Power could undertake secret preparations for war, without being observed. The space station could bring peace to the earth. £3,000,000,-000 does not seem much to spend upon the conquest of warfare. Since the Korean flare-up, the United States has spent nearly

Sponge 'Em

Many women who are accus-

Scrubbing a floor this way becomes about as easy as sweeping it with a broom. Hands never touch the mop end or the water and the whole operation is performed from an erect position. The mop is simply dipped into a pail containing a mild cleaning solution and rubbed over the floor. To lap up the loosened dirt and water, the mop end is first rinsed and then wrung out with a flip of the automatic squeezer.

These sponge mops are becoming as versatile as the popular cellulose hand sponge. When moistened with clear water and squeezed until all the water has been expelled, they make excel-lent rug cleaners and floor dusters. The sponge has such an attraction for dust, dirt and lint that the mop should be rinsed clean periodically under the kitchen tap. Their long trandles make them convenient for washing walls, windows, ceiling and other awkward areas. The automatic squeezer makes it easy for the housewife to control their

I. Here, also, were the five remaining charter members of the Mother Institute, the first inspired Adelaide Hoodless, who, from bitter experience, had recognized the need for greater knowledge among women - of nursing, medicine and a better way of living. Here, too, to greet the delegates was Marjorie Lee, daughter of Erland Lee; Mrs. Gordon Conant of Oshawa, daughter of Mrs. D. tween Canada and the U.S.A. for 140 years. Further evidence of the friendly relationship be-tween two great border countries Smith, the first W. I. president can be found in the burial ground across the road, where Canagrand-daughter of Adelaid dian and American soldiers, who once fought against each other,

Hoodless.
Across the sunlit hills, in the vicinity of the Gage home and amid the beautiful shade trees, it almost seemed as if the spirit of the pioneers was prebattlefield where they fell a Soldier's Monument has been sent at this A.C.W.W. pilgri-mage. Perhaps Mrs. Raymond Sayre felt it too as she said in her address — "The Story of Stoney Creek gives as four wrest a living from the soil.
Many of the early settlers were
United Empire Loyalists and
among them was a widow and fourth, it proves that everyand with what they have."

VALUABLE CHIPS Tim Bramer, aged seven, was enjoying his bag of potato altogether unlike the cruchy wafers—a diamond ring.
An indignant boy took himself off to the potato chip company's offices to protest. His annoyance was soon dispelled by the presentation of a fat monetary reward given him by the employee who had lost her engagement ring

while working in the plant.

Honeymoons That Weren't Too Sweet

Perhaps the shortest honey moon on record was that of the Portsmouth soldier who iumped his unit to get married. Thirty minutes after the ceremony he was in cells awaiting an escort back to have edge.

In the same class were Alex Hinney and his bride, Constance
Fleet, of Las Vegas. Alex and
his wife went through the marriage service to benefit under the
terms of a will. They collected the
cash on a 150-minute honeymoon
and then made a bee-line for
the divorce court the divorce court.

The most uncomfortable noneymoon was spent by the jester of Empress Anne of Russia. The empress didn't like his sense of marrying an old crone. The couple were compelled to spend their honeymoon in a house made of ice on the frozen surface of the river Neva Just

to make it worse, a bed was in-stalled which was carved out of a block of ice. What about the longest honey moon? Surely the Gosport couple who cruised round the world in a converted lifeboat are candidates here. They were away for
