

The excitement of the past week has been almost too much to bear. The Jarvis Sale was never more noticeable than on Tuesday morning. The excitement is largely created by the success of the May 24th celebration, and by the fine co-operation exhibited by the members of the Lions Club and their wives who work so hard to make this day possible. The May 24th show now seems to be pretty well established and with the continuing co-operation of all those associated with it is bound to be a success for a long time to come.

We don't know who we have to thank for the Jarvis Sale, but it is a fact that it has been a long time since we have had such a successful day. The Jarvis Sale is a success for a long time to come.

Pete Banks reports that a record number of cars were parked in the ball park on Monday. There was another inch of available space for a long time to come.

Jack Brokenshire's entry in the Jarvis Sale was just about the best example of what a calligrapher can do. The calligrapher's plan parade entry should be that we have seen in a long time.

Mr. and Mrs. Edgar Jones of Cayuga, were guests of Dr. and Mrs. E. M. Jones on the holiday.

News of the Countryside

From The Record's Correspondents

RENTON The community extends sympathy to Mrs. Fred Lloyd and family who were recently bereaved by the death of their son, Mr. Fred Lloyd, who died on May 24th.

HOLSTEEN HAS ELEVEN CONSECUTIVE HEIFER CALVES W. J. Burns, Carleton Place, Ontario, has a most unusual Holstein cow. She is Jean Pietje Ormsby, and her claim to fame is that she has had eleven consecutive heifer calves.

While they have no definite record covering this point, officials of the Holstein-Friesian Association of Canada cannot recall ever having heard of another cow with eleven consecutive heifer calves.

It was bred by John E. Wright, Jasper, Ontario, in whose herd her first heifer calf was born. The herd of W. J. Burns, all have been single births with the exception of a pair of twins born in 1950.

HYDRO RESEARCH Saves You Dollars

In Ontario Hydro's Research Division some 298 people, of whom 80 are Research Engineers, maintain a constant study of electrical, structural, mechanical and chemical problems, as well as the testing and quality control of all items used in the Commission's day-by-day activities.
